CHICAGO:
RAND, McNALLY & CO., PUBLISHERS.

1891.

ENTERED, ACCORDING TO ACT OF CONGRESS, IN THE YEAR 1891, BY
RAND, McNALLY & CO., CHICAGO,
IN THE OFFICE OF THE LIBRARIAN OF CONGRESS, AT WASHINGTON, D. C.

INTRODUCTORY.

With this volume of the LUMBERMAN'S DIRECTORY AND REFERENCE BOOK OF THE UNITED STATES AND CANADA is presented an entirely new compilation, containing several features never before incorporated in a directory or reference book, and which add greatly to the convenience and value of the work.

Among these features are: Giving details as to nature of business, whether wholesale, retail, commission dealer or manufacturer; kinds of woods sawed or dealt in, kind of power and style of saws used, and daily capacity of mills, financial rating of firms, the rules for inspection, classification, and measurement of lumber used in the various markets of the country; a digest of the different State laws affecting lumbermen and lumbering and liens for materials; a selected list of machinery and mill supply houses, by which a prospective purchaser of machinery or supplies can see at a glance where his needs can be supplied.

In compiling the work great care has been taken to secure accuracy, the information being gathered both by personal solicitation and circulars sent through the mail, a large force of men having been engaged for over a year, and no pains or expense being spared in prosecuting the work, as the publishers aim to furnish a reference book that will be as perfect as in human power to make. The same policy will be pursued in the future, even in a greater degree, as it is the intention to issue the Directory annually.

The digest of the various State laws relating to lumbermen and lumbering and liens for materials have been compiled expressly for this work, and will be thoroughly revised each issue.

In giving financial rating we have endeavored to be fair and impartial, using our best endeavors to secure correctness and reliability.

In conclusion we beg leave to tender thanks to our many patrons for the generous patronage given the work, and which we will ever strive to merit.

Yours respectfully,

RAND, McNALLY & CO.

L A W S

Relating to Lumbermen, Lumbering, and Liens for Materials.

Compiled expressly for the Lumberman's Directory by CLARK VARNUM, Attorney at Law,
Suite 414, Chamber of Commerce Building, Chicago, Ill.

ALABAMA.

FLOATING LOGS. Every person has a right to use, for the purpose of floating logs, in a proper and reasonable manner, any of the waters or streams of the State of sufficient size and depth for that purpose, for a reasonable part of the year.

EXTRUSION. Whoever willfully injures any mill-dam or other dam to create water-power, or any embankment necessary to such a dam, or removes, injures, or destroys any lock, bank, or culvert, shall be punished by a fine not less than \$50 nor more than \$500, and may be imprisoned in the county jail not more than six months.

LIEN FOR MATERIALS. Every person who furnishes materials for the erection or repair of any building or the construction of any vessel has a lien on such building or vessel, and also upon the land on which the building stands, if the materials were furnished to the owner or his agent or contractor. This lien takes preference over all other liens or incumbrances attaching after the material was furnished. If there was a mortgage on the property before the materials were delivered, the lien remains the prior claim against the building, and it may be sold and removed. Contractor has six months, laborers and journeymen thirty days, and sub-contractors four months, in which to file the claim for a lien in the office of the Judge of Probate of the county where the building is situated. Such claim must be sworn to, and must state the owner's name, the description of the real estate or property sought to be charged with a lien, and the nature of the contract under which materials were furnished, and also contain a bill of particulars of all materials, with prices. The taking of a note will not release the lien unless the parties so agree. A married woman's property is subject to a lien for materials furnished under contract with her husband, if she had knowledge of the contract. The lien is enforced by suit in a court of record of the county where the building is located; and such suit must be begun within ninety days after the materials are delivered. At any time after a lien has attached the owner may relieve the property from the lien by giving an acceptable bond for the payment of the lien.

LOG RUNNING. Any person who cuts loose or sets adrift any log or timber fastened to a dam, or stream, or who runs or floats any log or timber of another into any creek, bayou, or lake, with the intention of concealing or appropriating the same, shall be subject to a fine of not less than \$100 nor more than \$200, and may be imprisoned in the county jail not exceeding one year.

MILL DAMS AND RACES. A dam for any water-grist-mill, saw-mill, gin, or factory to be operated by the public, may be erected across any water-course not a navigable stream, to the owner in fee of the land on both sides of the stream, or on one side by filing an application with the Judge of Probate of the county where the same is to be erected, setting forth the name of the applicant, the purpose for which it is to be erected, a description of the land, height of the dam, and the name of the owner of the land on the opposite side of the stream, and serving a copy of the writ on the owner of the land on the opposite side.

OBSTRUCTING STREAMS. Constructing any stream used for floating timber to market shall be punished by a fine not less than \$25 nor more than \$250.

PROTECTION OF TIMBER. Any person who cuts down, girdens, destroys, or conveys away any oak, pine, cedar, poplar, walnut, or hickory on land not his own, willfully and knowingly, without consent of the owner, must pay to the owner from \$5 to \$10 for every such tree, according to kind.

SAW-MILL LEVEE. The owner of a saw-mill must not allow slabs, edgings, or saw-dust to fall into a stream so as to obstruct navigation, nor can he do so to the injury of a lower proprietor, unless he has gained a right therefor by twenty years' use of the stream for that purpose.

ARIZONA TERRITORY.

INJURY TO DAMS. Every person who willfully cuts, breaks, injures, or destroys any bridge, dam, canal, flume, levee, embankment, or other structure erected to create power for mining, manufacturing, reclamation, for agricultural purposes, or makes or causes to be made any aperture in such dam or embankment, with intent to destroy the same, is guilty of a felony, and shall be fined not exceeding \$500 or imprisoned not exceeding six months.

LOG MARKS. Any person cutting, altering, or defacing any mark made upon any log, or puts a false mark thereon, with intent to defraud the owner, is guilty of a misdemeanor.

LIEN FOR MATERIALS. All persons who furnish materials in the construction or repairing of any building or other improvement, have a lien thereon, and on the land whereon the same is situate and connected therewith. To fix and secure the lien, the contract for the furnishing of material must be filed in the office of the Recorder of the county where the property is situated. If the contract be an oral one, a duplicate copy of the bill of particulars, showing the materials furnished and the price, must be made, and one filed with the Recorder and the other given to the owner or his agent. A sub-contractor has only sixty days in which to file his lien, and in addition to the other requirements he must state therein the name of the builder or contractor to whom he furnished materials. The lien takes effect when the materials are delivered, and is preferred to all liens attaching after such delivery. Liens are foreclosed by suit in a court of record begun at any time within six months after the filing in the Recorder's office.

PROTECTION OF TIMBER. Any person who shall set fire to any wooded country or forest within this Territory, or shall accidentally set fire to such forest or wooded country and shall not use every effort to extinguish the

same, or shall build a fire for lawful purposes and allow it to extend into such wooded country or forest, shall be subject to a fine of \$1,000 or imprisonment not exceeding one year, or both.

TREES ALONG ACEQUIAS. Trees growing on the banks of any acequia or irrigating ditch, shall belong to the owner of the land through which the acequia runs.

ARKANSAS.

FLOATING LOGS. Every person taking up a raft or other timber found floating in any water-course, must go at once before some Justice of the Peace of the county and make affidavit that the property was wrecked or lost; that he was not instrumental in setting it adrift; also the quality and quantity of such property, and the time when it was taken up, and that he has not disposed of any of it. In twenty days thereafter he shall publish a full account of it in some newspaper in the State for three successive weeks, provided the property exceed \$50 in value. Upon complying with these requirements, the taker-up shall be allowed twenty per cent. of the value of the property, to be adjudged by some Justice of the Peace of the county in which the property is taken up. If the property is not claimed and title proved within one year, it becomes the property of the taker-up.

INJURING DAM. Every person who shall willfully and maliciously injure or destroy any mill-dam or other dam or levee, or shall make or cause to be made any opening in such dam or embankment, shall be guilty of a misdemeanor, and on conviction shall be fined in any sum not exceeding \$5,000.

INJURING RAFT. Any person injuring, cutting loose, or destroying any raft, boards, or other lumber, or any part thereof, being the property of another, shall be punished as in cases of larceny.

LIEN FOR MATERIALS. Every mechanic or other person who shall perform any labor or furnish materials for any building by virtue of any contract, express or implied, with the owner or proprietor, his agent, trustee, contractor, or sub-contractor, shall have a lien on both the building and the land for labor performed or materials furnished. When materials are furnished by a sub-contractor, he must give notice to the owner, at or before the time he furnishes such materials, of his intention to so furnish them, and of their probable value. It afterward the sub-contractor shall settle with the contractor, such settlement must be in writing and must be signed by the contractor and certified to be just. A copy of this settlement must be presented to the owner of the building, and within sixty days after the materials have been furnished the sub-contractor must file a copy of the settlement with the Clerk of the Circuit Court of the county in which the building is situated. This copy so filed shall be a lien on the building. At the same time he must also file a correct description of the property to be charged, which must be verified by affidavit. If the contractor shall refuse to settle with the sub-contractor, he shall make a full statement of materials furnished, giving all credits, one copy of which he shall serve on the owner, and within sixty days thereafter file a copy with the Circuit Clerk of the county. If the materials are furnished directly to the owner, he has ninety days in which to file such claim. Liens of this kind have the preference over those of subsequent date to the commencement of the building. All suits must be begun within six months by sub-contractors, and within nine months in all other cases, from the time of filing the account.

LOG MARKS. Anyone may use upon logs belonging to him any mark or brand not in use by another, which mark or brand shall be recorded in the office of the Inspector of Timber. No mark or brand shall be used until so recorded, nor shall any mark be used that has been in use by another. Any violations of these provisions shall subject the offender to a fine of \$10, one-half of such fine going to the prosecutor and the other half to the State.

LOGGER'S LIEN. Common laborers have a lien for wages on timber cut or handled, or for timber improved by the handling. If the amount due the laborer is less than \$200 he must, and if more than \$500 he may, go before a Justice of the Peace and make a sworn statement of the facts showing the amount due, the kind of service rendered, and what was produced. If the facts entitle him to a lien he shall have a judgment and a sale of the property to satisfy it.

PROTECTION OF TIMBER. Any person cutting down or destroying any kind of wood or timber growing on the land of another, or shall carry away such timber with intent to convert it to his own use, shall be subject to a fine of \$50. If the value of the trees cut down or destroyed shall exceed \$10, he shall be subject to imprisonment in the penitentiary for two years.

CALIFORNIA.

BOOMS. The Board of Supervisors of any county may grant the privilege of constructing booms, for the purpose of holding logs and timber, to companies, corporations, or individuals, and to prescribe the conditions on which the same shall be maintained, and the prices which may be charged.

FLOATING LUMBER. Whenever any lumber drifts upon any island in any of the waters of the State, or upon the bank of any such water, the owner may remove it by paying the owner or occupant of the land the amount of damages sustained. If the parties can not agree as to the amount of damages sustained, it is to be ascertained by appraisalment by two disinterested citizens of the county, at the expense of the owner of the lumber. If the property is not claimed by the owner within three months, the owner of the land must turn it over to the Sheriff of the county, who will sell it, and, after deducting expenses, will turn the residue of the money into the county treasury.

LIEN FOR MATERIALS. A lien is given by statute for all materials furnished to be used in the construction, alteration, or repair of any mining claim, building, wharf, ditch, flume, aqueduct, tunnel, fence, machinery, railroad, wagon-road, or other structure, whether supplied to the owner, his agent or his contractor. The lien is superior to all others attaching after the structure is commenced, upon both the structure and the land, and is superior to all prior incumbrances as to the structure, and it may be removed after the lien is enforced and the sale thereof has taken place. If the contract price exceeds \$1,000, the contract must be in writing and filed in County Recorder's office before work is begun, or else the owner will be liable for all materials furnished; but when so recorded, the owner can not be made liable for any greater sum than the written contract provides for. Of the contract price, at least twenty-five per cent. must be payable within thirty-five days after the contract is completed. The lien ranks in this order: 1, laborers; 2, material-men; 3, sub-contractors; 4, contractors. Each class share pro rata. If the proceeds are insufficient to pay that class in full. A claim for a lien must be filed in the office of the County Recorder, and the sub-contractor or material-man has thirty days after the completion of the structure, and the contractor sixty days, in which to so file. The claim should contain the names of the owner and contractor, the amount claimed to be due after allowing all payments and set-offs, the description of the property to be charged with the lien, and a list of the materials furnished, with the prices, and must be sworn to by the claimant. The lien is foreclosed by commencing suit in the Superior Court within ninety days after the filing. An attorney's fee is allowed as a part of the costs of foreclosing.

PROTECTION OF TIMBER. Any person who shall cut down or remove trees, logs, or timber from the land of another is guilty of a misdemeanor, and if convicted shall be subject to a fine of not less than \$10 nor more than \$200, and to be imprisoned not exceeding three months.

COLORADO.

INJURY TO MILL-DAMS. Whoever maliciously cuts down, destroys, or damages any embankment, mill-dam, or ditch belonging to another, shall be punished by a fine not exceeding \$100, or imprisonment in the county jail for three months. If the dam, embankment, or ditch was valued at over \$20, the punishment may be extended from one to ten years in the penitentiary.

LIEN FOR MATERIALS. Whoever furnishes materials under a contract with the owner of land for the construction or repair of any building or structure on such land, has a lien on the land and buildings for the value of the materials furnished. All persons are deemed owners who have a conveyable, transferable, or assignable interest in land or buildings. Lien claimants are of three classes: contractors, sub-contractors in the first degree, and sub-contractors in the second degree. Sub-contractors have forty days, and contractors sixty days, from the furnishing of the last of the material in which to file notice of their lien in the office of the Recorder of the county where the land is situated. Such notice must state when and what materials were furnished, the price, the amount due, the name of the owner and contractor, and the description of the land and property charged with the lien. Liens may be assigned. Suit must be brought in a court of record to enforce the lien within six months after the notice is filed. Liens take priority in the following order: 1, sub-contractors in the second degree; 2, sub-contractors in the first degree; 3, contractors; and are paid in that order when the property does not sell for enough to pay all in full. The provisions of this lien law apply to materials furnished for railroads, highways, mines, and ditches.

LOG RUNNING. Anyone desiring to float logs or timber in any of the streams of the State, shall execute a bond running to the people of each county through which the timber is to be floated, in a sum to be approved by the County Commissioners, and conditioned to cover all damages that may accrue to bridges, dams, or irrigating ditches along the route.

PROSECUTION OF MILL-DAMS. Any person who willfully sets on fire any body of timber on any lands in this State, shall be subject to a fine of \$50 to \$300, or imprisonment from fifteen days to three months; and if any person willfully and maliciously sets on fire any woods other than his own, or permits a fire set or caused to be set by him to pass onto the lands of another, and damage his timber, he shall be subject to a fine not exceeding \$300, or imprisonment in the county jail six months, or both fine and imprisonment.

CONNECTICUT.

CONVERSION OF TIMBER. Whoever shall cut, destroy, or carry away any trees, timber, or under-wood standing or lying on the land of another, or on town common or on any other land, or on the land of another, without the consent of the owner and all who shall be necessary to the offense, shall pay to the injured party \$2 for every tree one foot in diameter, and for all trees over one foot three times their value in addition to the \$2; for all trees under one foot in diameter, six cents. If the offense is committed on undivided lands, the action must be brought in the name of the proprietor; if on town commons, in the name of the town.

INJURY TO MILL-DAMS. Whoever willfully and maliciously injures or destroys any dam, or embankment, or mill-dam, or dam for the purpose of creating water-power for any saw-mill or grist-mill, shall be punished by a fine not exceeding \$500, or imprisonment in State's prison not exceeding seven years.

LIEN FOR MATERIALS. A lien is given upon a building or railroad, and also upon the land on which the same is situated, for the value of all materials furnished for the construction, erection, or repair of such building or railroad. The lien is superior to every other incumbrance attaching after the improvement is commenced; but it only extends to those who have contracted with the owner or his agent, or have procured the owner's assent to contract with his contractor. To perfect the lien the claimant must make, subscribe, and swear to a certificate stating the amount claimed, the description of the premises on which a lien is claimed, the kind and quantity of materials furnished and their values, and the date of the commencement of the lien. Within sixty days after the last of the material is furnished, this certificate must be filed in the office of the Town Clerk, except that in case the lien be claimed on a railroad the filing must be in the office of the Secretary of State. The lien is enforced by foreclosure in a court of chancery, and suit to foreclose must be begun within two years after the lien is perfected.

MILL ACT. Any person wishing to construct a dam for a water mill or to construct race-ways, if he can not agree with the owner of the property to be taken by the price, may sue out a writ for the appointment of commissioners to assess the damages. This is begun by filing a petition in some court having jurisdiction, stating that the improvement is a public benefit; that navigation will not be obstructed; that it will not interfere with existing water mills nor affect the health of the neighborhood. Upon paying the damages as assessed by the commissioners he may proceed with the construction, and may maintain it so long as it shall be a public benefit.

OBSTRUCTION OF STREAMS. Every person who shall place any material in any stream or water course which shall tend to obstruct navigation, shall be fined not less than \$10 nor more than \$100. If ordered removed within thirty days and he neglects or refuses to do so, it may be removed by any other person at the offender's expense.

PROTECTION OF TIMBER. Any person maliciously burning, injuring, or destroying any body of timber, or timber, or log, shall be punished by imprisonment in the State's prison not exceeding seven years, or by a fine not exceeding \$200.

DELAWARE.

LIEN FOR MATERIALS. Whoever furnishes materials to an amount in excess of \$25 in value for any house, building, structure, or vessel, under a contract with the owner or his contractor, has a lien which attaches to the property for which it was furnished, and also to the land on which it stands and sufficient of the land surrounding for reasonable use of the building. This lien takes precedence over all incumbrances attaching after the material commenced to be furnished. The contractor must file his statement under oath, with name of owner, description of property on which lien is claimed, kind and value of materials furnished, amount due, and the time when the work was commenced and finished, stated therein. This statement is filed in the office of the Recorder of the Superior Court of the county where the building is situated, or in case of vessel, of that in which the materials were furnished. Sub-contractors must so file within ninety days after furnishing material, and contractors can not file until ninety days after the building is completed, and must file within thirty days thereafter. In case of a vessel the statement must be filed within four days after the material is furnished, or within four days after the vessel is launched and ready for sea. There is no priority among lien-holders; if property is not sufficient to pay all they share pro rata. The lien is enforced by attachment. For materials furnished to a tenant the lien attaches only to the leasehold interest held by the tenant.

PROTECTION OF LUMBER. The malicious burning or destruction of lumber or timber of any kind is punishable by a fine not exceeding \$100 and imprisonment not exceeding one year, with two-fold damages to the party injured.

MILLS AND MILL-DAMS. Whenever any person desires to erect a saw-mill and a dam for the purpose of supplying water for it, he must file a petition in the Court of General Sessions, setting forth the proposed site, height of the dam, and that it will be a public benefit. Fourteen days' notice must be given to all parties whose interests will be affected, after filing the petition. Thereupon the Court will appoint five disinterested men as commissioners, who will appraise the damages to be done to the property at the beginning of the next term after such appointment. The applicant must pay all damages and expenses before he will be allowed to proceed with his work.

FLORIDA.

BOOMS. Booming companies will be allowed for the purpose of securing owners from loss while floating lumber or timber down water courses in this State; provided no unnecessary delay is occasioned to navigation of boats and vessels. Any person doing injury to such booms shall be liable to fine and damages to the owner or owners thereof.

DRIFTING TIMBER. Anyone finding lumber, logs, or rafts adrift in any of the water-courses of this State, may seize the same where found, or the nearest place of safety, and so soon as possible thereafter he must advertise the same at the county court-house, stating the kind of lumber, where found, and where secured. If the owner claims the property within sixty days and establishes his right thereto, it shall be delivered to him upon paying the finder reasonable expenses. If it is not claimed it must be sold, and after paying the finder, the residue of the money must be placed in the hands of the Circuit Clerk of the county where the property was found. Any person not disposing of property taken up according to the provisions of this act, shall be deemed guilty of larceny.

INJURY TO MILL-DAMS. Whoever willfully and maliciously injures or destroys any dam, reservoir, or trench, or any machinery of a water mill, cotton gin or press, shall be punished by imprisonment not exceeding five years, or by a fine not exceeding \$500 and imprisonment in the jail not exceeding one year.

LIEN FOR MATERIALS. Whoever furnishes any material whatsoever, which is made or wholly or partially prepared for use, to any mill or manufactory, to be manufactured into any article of value, and who does any work on any logs, lumber, or timber, as raftsmen or timber-setters, has a lien on the material and on all articles manufactured therefrom, to the extent of the value of his material or work; and whoever furnishes any engine, windmill, car, or machine, or instrument or part thereof, for any railroad, telegraph, telephone, mill, distillery, or other manufactory, has a like lien on the articles furnished. The person furnishing materials or machinery for the construction, repair, or improvement of any building or manufactory, has a lien on the building or manufactory and on the interest of the owner in the land on which same is situated. Laborers and contractors who cut, raft, or sell logs or timber have a lien thereon, and also on the lumber manufactured therefrom, until compensated for their services. Contractors must furnish the person having the work done with a list of all sub-contractors and material-men engaged upon or furnishing material for the building, and the contractor who has the contractor of any lien, unless he show that such persons have all been paid; and thereupon a lien is established against a contractor failing to pay the money due such persons, if he shall have received it under promise to pay them. To effect the lien, the furnisher files a verified notice of his claim to a lien, in the office of the Clerk of Court of the county where the property is situated, within sixty days after the improvement is completed, setting out a description of the property, the owner's name, the kind and value of materials furnished, and the amount due. The lien must be enforced within six months from the time the improvement is completed; and the method of enforcement is ordinarily by attachment issued out of the Circuit Court of county in which the property is situated.

LOG MARKS. All persons floating lumber or timber down the current of rivers or water-courses in this State, may adopt a particular brand or mark to be used and applied on all such lumber or timber. Those making use of such brand and mark shall file the same for record, with the Clerk of the Circuit Court of the district. Any person using, altering, or defacing such brand or mark after it is recorded, is guilty of felony.

MILL ACT. Any person wishing to erect a water-mill and a dam for running it, who owns land on one side of a stream and part of the bed, and can not agree with the owner of the opposite side, or with the parties whose lands are to be flowed, as to the damages, may have commissioners appointed for that purpose. A petition is filed in a competent court, setting forth all the facts, and the court at once proceeds to appoint commissioners who appraise the damages and make return as to the amount. Then payment of the claims the applicant has the right to begin his construction.

OBSTRUCTION OF STREAMS. Any person obstructing any water-course or navigable stream, by felling any tree or trees, or causing the same to be felled, and shall not remove such obstruction within twenty-four hours, shall be subject to a fine not exceeding \$50.

GEORGIA.

FLOATING TIMBER OR LOGS. Any person attempting to dispose of any drifted timber or lumber taken up by him is prohibited on pain of forfeiture of \$500, one-half to the owner of the property, and the other half to the person who has been taken up without the authority of the owner, shall be subject to a fine of \$50 for each offense, and to imprisonment not exceeding six months.

INJURY TO DAMS. If any person shall unlawfully, willfully, and maliciously injure or destroy any meadow-bank, rice-bank, mill-dam, or any other dam or bank, such person or persons offending shall be punished by imprisonment in the penitentiary not less than one nor more than three years, or by both fine and imprisonment.

LIEN FOR MATERIALS. Any person furnishing lumber or materials for the improvement of real estate has a lien on the premises so improved for the value of materials furnished. When the materials are furnished by virtue of a contract with some person other than the owner, it will be binding on the owner only to the extent of his indebtedness to such other person. When the materials are furnished to a lessee the lien is binding upon the "improvements" and the lessee's interest in the land. Within thirty days after the materials are furnished the party claiming a lien should file a notice of claim in the office of the Clerk of the Superior Court, setting forth an itemized bill of the materials furnished, the names of the parties, the amount claimed, and a description of the property. All suits must be begun within twelve months. When materials are furnished to a contractor or sub-contractor, the person so furnishing should give the owner written notice of his intention to furnish materials and that he will claim a lien therefor, describing the property on which the improvement is to be made. Machinists putting up, furnishing, or repairing steam mills, have a lien similar to that of the mechanics, and similarly enforced. The lien may be defeated if the mechanic does not substantially comply with his contract, or should fail to have his lien recorded in the Clerk's office of the county within three months after the work is completed, or should not bring his action within twelve months.

LUMBERMAN'S LIENS. All persons furnishing saw-mills with timber and such supplies as are used in carrying on a saw mill, have a lien on the mill and the products for the timber or supplies furnished. Laborers employed in rattrig, lumbering, and operating steam saw-mills have a lien on the product of their labor for their wages.

IDAHO TERRITORY.

CONVERSION OF LUMBER. Whoever willfully and without authority takes, with intent to deprive the owners, any saw-logs, timber, lumber, posts, or cord-wood owned by another person, or otherwise injures or destroys such property, is guilty of a misdemeanor.

FLOATING TIMBER. Whenever any timber drifts upon any island in any of the waters of this Territory, or upon the bank of any such water, the owners may remove it upon payment to the proprietor of the land the amount of damages he has sustained. If they can not agree as to the amount of damages it may be ascertained by appraisement by two disinterested citizens of the county. If the property is not claimed within three months from the time it was drifted, the owner of the land must deliver a bill of his charges and the appraisement of damages, together with the timber, to the Sheriff of the county. Thereupon the Sheriff will, after posting notice, in three days sell the property, and after deducting expenses, turn the residue over to the County Treasurer, who, on order from the Probate Judge, will pay this residue to the owner; provided he lay claim and prove title within one year.

INJURY TO DAMS. Whoever willfully and maliciously cuts, breaks, injures, or destroys any dam, canal, flume, levee, or embankment, or makes any opening with intent to injure or destroy the same, shall be punished by a fine not exceeding \$1,000, or imprisonment in the Territorial prison not exceeding two years, or by both the fine and imprisonment.

LIEN FOR MATERIALS. Persons are given for material furnished in the construction or repair of any building, mining claim, bridge, ditch, fence, machinery, railroad, wagon-road, or aqueduct to create hydraulic power, by virtue of contract with the owner or his contractor. The lien attaches to the improvement and to enough adjacent land for its convenient use, and is superior to any other incumbrance created after the first of the material is furnished. To secure the lien the contractor must, within sixty days from the completion of the contract, and the sub-contractor within thirty days from the completion of his contract, file a notice of claim in the office of the Clerk of the District Court. The lien is foreclosed by suit in the District Court begun within ninety days from the filing of the notice.

PROTECTION OF TIMBER. Any person cutting down or carrying off any wood or under-wood, tree or timber, or who girdles or otherwise injures any timber or tree on land belonging to another, or on the public grounds or commons of any city or town, shall be liable to such private individual or to the city or town for treble the amount of damages sustained.

ILLINOIS.

FLOATING TIMBER. A person taking up a raft or timber found adrift on any water-course must go before a Justice of the Peace of the county within five days and make oath to the facts, exactly describing the timber and where found. The Justice issues a warrant to a constable, and he summons three respectable householders, who appraise the property. If the owner does not reclaim the property within six months, it is sold by the Justice, and from the proceeds he paid all costs and a reasonable compensation to the taker and the appraisers. If the owner does not appear, the money in the county treasury is paid to him; if not, it belongs to the county.

INJURY TO MILL-DAM, RACE, ETC. To maliciously injure, remove, or destroy any canal, levee, dam, reservoir, or trench, or the gear or machinery of any mill, or to draw off, or procure to be drawn off, the water from any mill-pond, reservoir, canal, or trench, whereby any water-power is injured and its use impaired, is an offense punishable by fine of \$500 or imprisonment for one year.

INJURING RAFT. To let loose or injure, without consent of the owner, any boom, raft, or other lumber, is punishable by fine of \$1,000 or one year's imprisonment, and renders the perpetrator liable to double damages.

LIEN FOR MATERIALS. Persons furnishing materials under contract with the owner of any lot for the erection or repair of any building thereon or appurtenance thereto, are entitled to a lien upon the building and lot for the amount due. Sub-contractors and workmen are required to accept the sworn statement of the contractor or owner to give the owner true notice to give notice of their claim for a lien within forty days after the completion of the sub-contract, or within a like time after payment should have been made to him. Whenever the original contractor desires to draw any money from the owner under his contract, he must give the owner a statement under oath of the names and names of sub-contractors or workmen, and the amounts due to become due to each, and each shall receive one-half of the money due contractor, sufficient to pay them. Until such statement is made, contractor has no lien or right of action against owner. If owner pay before receiving such statement, or without retaining enough to pay what is or will become due sub-contractors and workmen, the payment is illegal, and does not deprive sub-contractors or workmen of their rights. To enforce the claim to a lien, a bill in equity must be filed in a court of record, setting out the contract, the work done, the description of the land, the premises, and such other facts as fully disclose the rights of the parties. All persons interested in the realty may be brought in as parties to the suit. If there be several liens, a distribution may be made between them, if necessary, and the owner can not be required to pay more than the amount contracted to be paid to the principal contractor. There is no preference between lien-holders. The liens are preferred to all incumbrances except those on the land before the erection was begun, and take preference over such prior incumbrances upon the building, but not upon the land, and the whole property may be ordered sold and the proceeds properly apportioned. The suit should be begun by sub-contractor or workman within three months, and by contractor within six months, from time material was furnished. The lien exists for all materials furnished to any railroad corporation necessary to the construction, maintenance, or repair of its railroad, and six months before such lien holder can sue to enforce their lien. If the railroad contractor fail to complete his contract, any sub-contractor may, within three months, by suit in equity, have the lien-holder's rights

adjudicated and established. Any lien-holder must sue within thirty days after notice to do so from any person interested.

MILLS AND MILL-RACES IN VILLAGES AND CITIES. The municipal board in each city and village have authority to allow the construction of mills, mill-races, or feeders, through or across the streets, under such restrictions as they may deem proper.

OBSTRUCTION OF STREAMS. Preventing, hindering, or impeding the rafting or floating of mill-logs or lumber down any stream or water-course used for that purpose, by casting, felling, or depositing any tree or other obstruction across or into the stream, is punishable by fine of \$500 or six months' imprisonment; provided, that this does not apply to mill-dams constructed or maintained for manufacturing or other lawful purposes.

PROTECTION OF TIMBER. Whoever cuts or destroys any tree standing on land of another, or on school or church lands, forfeits and must pay to the owner from \$3 to \$8 for each tree, according to the kind. If the owner do not sue, any other person may, and one-half the amount so recovered goes to the owner and the other half to the plaintiff.

SITES FOR MILLS. Any person owning land on one or both sides of a water-course, who desires to build or repair a mill or erect or improve a dam, may, if the compensation for the land taken can not be agreed upon, cause the damage to be appraised by filing a petition in the County or Circuit Court and giving notice to all persons interested, both personally and by sixty days' publication in some newspaper. After the requisite notice has been given, a jury is selected to ascertain and report just compensation and decide whether the health of the neighborhood will be injuriously affected. If not, and the improvement will not injure any existing mill, the applicant is allowed to make the improvement by paying the damages assessed by the jury. Applicant has three months after jury report in which to decide whether he will pay amount fixed by the jury. If he does not accept their verdict, the proceedings are at an end. If he does accept he must pay the damages, with all costs and a reasonable attorney's fee, and must make the improvement in from one to three years, according to its nature. If the improvement, after erection, be destroyed, the owner has five years in which to replace it.

INDIANA.

INJURY TO DAMS. Any person injuring any dam, drain, embankment, ditch, or other construction made in pursuance of law or for the purpose of protection to any highway, railroad, or bridge, shall be subject to a fine not exceeding \$50 and imprisonment in the county jail not exceeding thirty days.

LIEN FOR MATERIALS. Contractors, sub-contractors, and all persons furnishing material or machinery for erecting, repairing, or removing any structure, have a lien thereon, and also on the real estate on which same is situate, for the amount their due, by filing in the office of the Recorder of the county where the structure is located, within sixty days after the material was furnished, a notice of their intention to hold a lien, accompanied by an itemized description of the claim, and a sworn description of the real estate on which the structure stands. If the material be furnished for the construction of a railroad, a lien is given on the railroad, its right of way, its appurtenances, and its franchises. The lien begins when the work or repairs is commenced, and is entitled to priority over incumbrances created after that time. The lien extends only to the right, title, and interest owned therein by the person for whose benefit the material was furnished. The lien is enforced by suit in the Circuit or Superior Court, commenced within one year from the filing of the notice in the Recorder's office. Notice of the beginning of such suit should be entered in the "Lis Pendens Record," a public record kept in the office of the Clerk of the County, in order to effect constructive notice of the enforcement of the lien. The lien extends to materials furnished for repairs, equipments, etc., of boats and water craft.

MILL DAMS AND RACES. Any person desiring to erect or heighten a dam for a saw-mill, or to acquire property for race-ways, and who can not agree with the owners of the property to be taken or damaged as to the price, shall file a petition in a court having competent jurisdiction, asking for the appointment of commissioners to assess the damages. When the applicant pays the damages as appraised by the commissioners, he may proceed to erect the dam.

NAVIGATION IMPROVEMENT COMPANIES. Any number of persons, not less than three, may associate themselves into a company for the improvement of navigable streams in this State. The articles of association must state the amount of capital stock, the number of shares, the number of directors, and the period of time the company or corporation is to exist. These articles are filed with the Secretary of State, who, when the capital stock is all subscribed, issues to such company articles of incorporation, giving them authority to do all the acts of a corporate body.

OBSTRUCTION OF STREAMS. Whoever erects, maintains, or continues any artificial obstruction in, or across the bed or channel of any navigable stream in this State shall be fined not more than \$500 nor less than \$5 for each week such obstruction may have been continued or maintained.

PROTECTION OF TIMBER. Whoever maliciously sets fire to any woods or anything growing or being upon the land of another, or permits any fire to pass from his own land on to that of another, to the injury or destruction of such one's property, shall be fined not more than \$100 nor less than \$5, and imprisonment in the county jail not exceeding thirty days.

IOWA.

LIEN FOR MATERIALS. Every person furnishing materials, machinery, or fixtures for any building, erection, or improvement upon land by virtue of a contract with the owner, his agent, trustee, contractor, or sub-contractor, has a lien for the value of the materials upon the building and the land on which it is situated. If the materials be furnished to a tenant, the lien covers the leasehold interest and the building, and even though the lease be forfeited for non-payment of rent, the lien on the building continues, and building may be removed at any time within thirty days after the foreclosure sale. The person furnishing the materials must, to make his lien effectual, file his claim in the office of the Clerk of the District Court of the county in which the building is situated. This claim must be a bill of items of materials, with prices, and a just and true statement of the amount due. The affidavit of the person claiming the lien must be filed with this bill of items; and must state the fact of a contract with the owner to furnish materials, and must contain the name of the person to whom the materials were furnished, the owner's name, and a description of the land on which the building was erected. Those who contract directly with the owner have ninety days from the furnishing of the materials in which to file their lien. Sub-contractors have only thirty days in which to file, and they must also during that thirty days serve a notice on the owner of the filing of the lien in order to prevent the owner from paying the contractor. When so filed in time, the lien takes precedence over any incumbrance attaching after the building was commenced. After the expiration of the ninety days allowed contractors, and up to two years after the materials were furnished the contractor may still file his lien, and it will be valid against everybody except good-faith purchasers of the building or of the materials most concerned, and if he file his claim and serve his notice on the owner after his thirty days have expired, and at any time within two years; but in such case the lien will only be effectual to the extent of the amount which the owner owed the contractor when the notice was served. Contracts made by the husband for buildings upon the property of the wife are not sufficient to form a basis for a lien. A lien can not be taken upon a public building or public improvement, but can be upon a building or work of internal improvement, such as that by private capital, such as railroads, canals, viaducts, etc. If the contractor takes collateral security when he contracts to furnish material he can not have a lien. But after his contract has been carried out, and he

becomes entitled to a lien, he may take collateral security without affecting his lien. All liens of this class are enforced and foreclosed, and a special foreclosure sale ordered by a suit in equity in the District Court of the county where the lien was filed. Such suit must be commenced within two years and ninety days from the time the last of the material was furnished, and within two years from the time when the lien was filed.

DRIFTING LUMBER. A person taking up logs, lumber, or hewn timber found afloat must go before a Justice of the Peace or a Notary Public, within five days, and make oath to the fact, particularly describing the timber. The affidavit must be transmitted to the Clerk of the District Court, to be entered in the estray book. If the value does not exceed \$5, and the timber is not claimed in three months, the taker-up is entitled to it. If the value is more than \$5, it must be sold by the Sheriff, and the proceeds, after paying expenses, turned into the county treasury.

STOPS FOR MILLS. Any person owning land on one or both sides of a water-course, and who wishes to erect or raise a mill-dam, or construct or enlarge a race, for the purpose of propelling any machinery, may file a petition asking a license therefor, in the office of the Clerk of the District Court of the county where the mill is to be erected. The party intending to erect the mill is the plaintiff in such petition, and all persons whose lands are overgrown or affected are the defendants. An order is then issued to the sheriff, who summons a jury to view the lands, hear testimony, examine witnesses, and appraise the damages. The report of the jury is filed in court, and if objected to or appealed from, a trial is had to wit as to whether the license is reasonable and of public benefit, and as to the amount of damages such land-owner will sustain. The applicant for the license must pay all costs and the damages awarded. The license is forfeited unless the work be begun under it within one year, and finished within three years, and said work destroyed, if not completed within the same time. Owner of mill-site may enter upon lands of others adjacent to his mill-dam or race for the purpose of erecting embankments to prevent the diversion of the water or injury to the mill.

PROTECTION OF TIMBER. If any person willfully cut down or carry away any timber or wood from the land of another, he shall be punished by fine not exceeding \$500 or imprisonment not exceeding one year; but if the value of the timber cut down or carried away is not more than \$50, and if the imprisonment exceed thirty days. The trespasser is also liable in civil damages to the owner for three times the value of timber injured or destroyed.

INJURING MILL-DAM OR RACE. To maliciously injure or destroy any mill-dam, race, lock, canal, trench, or reservoir, or draw off the water therefrom, or to injure any of the machinery of any mill, is an offense punishable by not more than one year's imprisonment and fine of not over \$500.

EXERCISING FORCE. To maliciously injure or destroy any boom or raft is an offense punishable by the same fine and imprisonment as the injuring of a mill-dam, and renders the person liable to the owner for double the damages sustained.

KANSAS.

CULTIVATION OF TIMBER. It shall be lawful for the Board of County Commissioners of any county in this State to offer a bounty to every person who shall plant and properly cultivate for a period of five years one or more acres of forest trees, in any sum not exceeding \$10 for each acre so planted and cultivated. These provisions shall not apply to lands held as timber claims under any of the timber-culture laws of the United States.

LIEN FOR MATERIALS. Any person furnishing, under contract with the owner of land, or his trustee, agent, husband, or wife, materials for the erection, alteration, or repair of any building or structure situated thereon, or any fence or footwalk on or in the adjoining street, has a lien on the whole property for the amount due him therefor. The lien is preferred to all incumbrances attaching to the property after the improvement is begun or materials furnished. To complete the lien the claimant must file in the office of the Clerk of the District Court of the county where the land is situated a statement showing the names of the owner, the contractor, and the claimant, the items of material furnished, with prices and the amount claimed; which statement must be verified by affidavit. If a promissory note has been given for the debt the list of items and values may be omitted if a copy of the note be set out and the affidavit shows that it was given for materials so furnished. The sub-contractor has sixty days and the contractor four months from the furnishing of the last of the material in which to file his statement for a lien. The sub-contractor must also serve on the owner or occupant of the land a written notice of such filing, or, if the owner can not be found in the county, and the land be unoccupied, may post such notice in some conspicuous place on the land. The owner can not be made liable for the amount due him therefor, if the lien is properly verified and recorded, nor can he pay the original contractor within the sixty days allowed sub-contractors in which to file their lien; but he may pay sub-contractor and apply amount so paid on original contract. All liens and claims therefor are assignable, but the assignee takes them subject to the defenses thereto. Liens of this class are enforced by suit in the District Court of the county where the property on which a lien is claimed is situated. Such suit must be brought within one year from the filing of the lien, except that if a note has been given for the amount due, the note falls due in which to begin suit. All incumbrancers must be made parties to the suit, including the contractor, if a sub-contractor claims a lien, and different suits by different lien-holders may be consolidated and the rights of all persons interested adjudicated, and the real estate sold and proceeds distributed as the court may direct. Owner or contractor may give a good bond to the State of Kansas for the use of the lien-holders; and thereupon all liens are discharged and lien claimants must sue on the bond. Owner may also, at any time after any liens have been filed, compel their adjudication by commencing a suit for that purpose. If any lien is not attempted to be enforced within one year from time when filed, the Clerk cancels it.

MILL DAMS. Any person desiring to erect a mill-dam upon his own land across any water-course, and shall deem it necessary to raise the water by such dam, if he can not agree with the owner of the land on the opposite side as to damages, may file a petition with the Judge of the District Court of the county in which such dam is erected, asking for the appointment of commissioners to appraise the damages. When such a petition is presented the Judge will appoint three disinterested persons, who will assess the damages and report their decision to the Court. When the applicant meets the conditions as imposed and pays all damages, he will be allowed to erect his structure.

KENTUCKY.

CONDEMNATION OF LAND FOR MILL-DAM. Any person owning land on a water-course, and desiring to erect a grist-mill or other mill useful to the public, and needing a dam in or across the water-course, may, by petition in writing filed in the County Court of the county in which the larger portion of the land is situated, obtain therefrom a writ for the purpose of making the condemnation, which shall embrace all the land claimed, and demand, whether lying in the same or different counties. Ten days' notice must be given to every person whose rights would be affected by the condemnation. The writ shall be directed to the Sheriff of the county, who will at once empanel a jury of twelve men, who shall decide as to the height of the dam and the amount of land condemned which is not owned by the applicant and which is covered by the bed of the stream. When the applicant shall have paid to the several parties the amount of the damages as ascertained by the Court, he shall have a writ of possession and otherwise proceed according to such leave.

CONVERSION OF LUMBER. Any person converting to his own use any drifting or stranded logs or lumber to the value of \$20 or more is guilty of

a felony, and may be imprisoned not less than one nor more than five years. Whoever feloniously cuts down or carries away, on or from the land of another, any timber or logs of the value of \$2, may be imprisoned for one year in the penitentiary. If the value is more than \$2 and less than \$20, he shall be fined not less than \$10 nor more than \$100, or imprisoned for six months, both fine and imprisonment.

DRIFTING LUMBER. Anyone taking up drift logs or timber in the O'Leo, Kentucky, Licking, and Little Sandusky rivers, is entitled, for each deck of timber, \$10; for each raft of forty logs or more, \$5; for each raft of not less than ten logs, \$1; for each single log, 25 cents. The taker-up has a lien on the logs or timber for his charges, and upon ten days' notice may sell the same for costs. Any excess must be paid into the county treasury by the officer making the sale. If the taker-up cuts or destroys any such timber or the marks thereon, he shall be subject to a fine of not less than \$10 nor more than \$200.

LIEN FOR MATERIALS. Material-men are given a lien, dating from the commencement of the work, upon the improvement and the interest of the employer in the land, for all materials furnished for the erection, improvement, or repair of any building or structure or any fixture thereto. Sub-contractors acquire a lien upon the amount due the contractor by giving the employer written notice of their claim, and that they look to the land and improvements for their compensation. If the materials are furnished to a tenant and he does not pay, and the lessor after taking possession refuses to pay, the building or improvement may be removed after sale under the suit to enforce the lien, if such removal will not injure previous improvements. The claim for the lien must be filed in the County Clerk's office within sixty days after the material is furnished, and it must state the name of the person to whom the material was furnished, the amount due, a description of the property on which a lien is claimed, and a bill of the items furnished, with prices. The lien is enforced by suit in equity commenced by anyone claiming a lien within twelve months from the completion of the work. If one lien claimant commence such suit, all others may file and prove up their liens without formal pleadings.

LOUISIANA.

LUMBERER'S LIEN. Employees of saw, planing, and shingle mills, and saw, blind, and door factories, have a lien on all manufactured material for thirty days after the maturity of the debt due them for wages; but this lien does not affect such material in the hands of good-faith purchasers.

LIEN FOR MATERIALS. Those persons who supply the owner or other person employed by him, his agent or sub-contractor, with materials which are intended for and are used in the erection or repair of any edifice or other work, have a lien or privilege on the building or work erected, and not exceeding one acre of land on which building or edifice is erected. If the improvement be made at the instance of the tenant, the privilege attaches only to the leasehold. To perfect the lien the seller must record in the office of the Recorder of Mortgages of the parish where the property is situated the act containing the bargain made, or a detailed statement under oath of the amount due, or the acknowledgment by the debtor of the amount due. The lien is good as to third parties from the date of recording. There is no priority between lien-holders. The sub-contractor may deliver to the owner an attested account of the amount and value of the materials furnished, and the owner must retain such amounts from subsequent payments due contractor. On receipt of such an account, the owner must furnish a copy to the contractor. If the contractor does not notify the owner within ten days that he intends to dispute the claim, the owner may pay the sub-contractor and deduct from amount owing contractor. If the sub-contractor and contractor can not agree as to the amount, the dispute may be adjusted by three arbitrators. The lien continues for five years from the date of recording, and is enforced by suit in court. There is also a lien given on vessels for materials furnished, but it only continues for six months from the time of furnishing the materials.

MAINE.

CONVERSION OF TIMBER. Whoever takes, carries away, or otherwise converts to his own use, without the consent of the owner, any log suitable to be sawed, or any other lumber, whether the owner is known or unknown, or cuts or destroys any mark made thereon, with the intent to claim the same as his own property, shall forfeit for every such log \$30, one-half of which sum shall go to the State and the other half to the complainant. Possession of logs with the marks cut out or defaced is presumptive evidence of guilt. The owner of the log is bound to recover by a suit in court, and it is his duty to find them, and it is a misdemeanor to obstruct the search.

INJURY TO DAMS. Whoever willfully or maliciously injures or destroys any dam, reservoir, canal, or trench, or the machinery of any mill or manufactory, shall be punished by imprisonment not more than three years or by fine not exceeding \$500.

LIEN FOR MATERIALS. Materials furnished for the erection, alteration, or repair of a house, building, or appurtenance, by virtue of a contract with the owner or his agent or sub-contractor, are entitled to a lien. Property was also held liable if materials are furnished to a sub-contractor, or after notice to the owner of the intention to furnish materials and claim a lien therefor, unless the owner gives notice to the furnisher that he will not be liable. The lien attaches to the building and to the land on which it is situated. If the person for whose benefit the materials were furnished has no interest in the land, the lien only attaches to the building, and if he be a tenant, it only attaches to the building and such interest in the land as he may have. To perfect the lien the contractor must file his claim for a lien within ninety days after material is furnished; but the sub-contractor who furnishes after giving the notice mentioned above has only thirty days in which to file. The claim for a lien must be verified and filed in the Town Clerk's office. It should set forth a description of the property, a list of the materials furnished, with prices, the name of the owner and of the person to whom furnished, and if by a sub-contractor, that the notice was given to the owner. The method of enforcing the lien is by petition in court and attachment. There is also a right to a lien for materials furnished for vessels. Such right continues for four days after vessel is launched, or if launched at the time, for four days after they were furnished. This lien is enforced by attachment, and the vessel may be sold pending the attachment, and the proceeds held to await the judgment in the suit.

LOG DRIVING. When logs of different owners become mixed during a drive, the owner may drive any or all of the mixed lumber to the mill, and a lien is given for thirty days after the logs have arrived at their destination.

LUMBERMAN'S LIEN. A person having performed work or labor in cutting, hauling, or rafting logs or lumber, is entitled to a lien for the value of his services, to continue sixty days after the logs have arrived at their destination for sale or manufacture, to be enforced by attachment. The lien is not lost by the manufacture of the logs or timber into lumber or merchandise.

TOWN RIGHTS. Town officers have the power to open lumber roads, to be used only when the ground is covered with snow. Any person wishing a lumber road must pay into the town treasury an amount equal to the damages and expenses of the location of such road, for the benefit of the owner of the land over which it is laid.

MILLS AND DAMS. Any person may erect on his own land a water mill and a dam to raise the water for working it, upon or across any stream not navigable. No such dam shall be erected to the injury of any mill or dam already existing on the same stream. Any person whose lands are damaged by being flowed by a mill-dam may obtain compensation therefor by com-

plaint to the supreme judicial court of the county where any part of the lands are situated. No compensation shall be awarded for damages sustained more than three years before the filing of the complaint.

OBSTRUCTION OF STREAMS. The owner of a saw-mill is himself liable, as well as his tenant, for the unlawful obstruction of a stream by slabs, edgings, or mill waste. Booms constructed on rivers and streams capable of floating logs to market must provide for the passage of logs of other owners, and if the owner of a drive has no need to use a boom, boomage can not be collected of him, even though his logs are accidentally stopped by the boom. If slabs, edgings, saw-mill refuse or other waste are cast into a stream to such an extent that navigation is impeded or rendered more difficult, or lower owners are injured, it is deemed an unlawful obstruction and use of the stream. The demand for damages for such obstruction must be made at least thirty days prior to the commencement of the suit.

PROTECTION OF LUMBER AND LOGS. Any person who maliciously, without the consent of the owner, cuts away, lets loose, injures, or destroys any boom, raft of logs, or other lumber or structure on any place, which is not the owner or legal possessor, shall be subject to a fine not exceeding \$500 and imprisonment not less than one year, and shall also be liable to the person injured for double the damages sustained.

STRANDED LOGS. In case logs or lumber are thrown or lodged on the banks or land contiguous to streams or rivers, they become forfeited to the owner of the land over two years. In case the land is improved, and after five years in case they are not improved, the owner must sell it, and after the sale the owner of the land must advertise the same within one year. The owner of the logs may remove them before they have become forfeited, on tendering damages caused by lodging and to be caused by the removal.

MARYLAND.

DRIFTING OR STRANDED LOGS. Any person taking up drifting logs or lumber, if the property is not claimed at once by the owner, must advertise it in some newspaper for three successive weeks, and if after three weeks no owner have claimed it is not claimed by the owner, must sell it, and after deducting for himself if two weeks for each log and defraying costs of advertising, must pay the residue to the owner when he proves the title to his property.

LIEN FOR MATERIALS. Buildings erected, repaired, or improved, to the extent of one-fourth their value, machines, houses, or bridges erected, constructed, or repaired, and vessels built, equipped, or repaired, are subject to a lien for materials furnished for that purpose. The lien also extends to so much of the adjacent ground as may be necessary for the reasonable use of the building or structure, and the owner may fix the boundaries of such adjacent grounds, or, if he does not do so, by writing filed with the Clerk of the Court before the materials are furnished, the Court will fix the boundaries on application of the lien claimant. If the materials are furnished for the use of a tenant, the lien only attaches to his leasehold interest. If the owner be a married woman and her husband contracts for the improvement, a written notice should be given her (but a lien will be claimed). If the furnisher be a sub-contractor, he should also give the owner written notice that he claims a lien within sixty days after supplying the materials. Taking other security compels the material-man to first resort to the security taken, and hold the property only for the balance; but the lien is waived if it is agreed that the other security is taken in lieu of the lien. To secure the lien, the claim therefor must be sworn to and filed in the Superior Court of Baltimore or in the Circuit Court of the county, within six months after the last work was done, or, in case of a vessel, within six months from the time the work was commenced. Such claim should state the names of the owner and contractor, the amount due, the items and prices of the materials furnished, and the description of the property on which a lien is claimed. The lien is superior to all incumbrances created after the commencement of the delivery of the materials, and is enforced by bill in equity or by scire facias; but such a lien must be commenced within five years from the time the claim was filed, or, in case of vessel, within two years, or lien will expire by limitation.

MASSACHUSETTS.

CONVERSION OF TIMBER. Whoever unlawfully takes, carries away, or otherwise converts to his own use, without the consent of the owner, any log suitable to be sawed, or other timber, or any mast or spar lying or being in a river or stream, or his servant or agent, shall be liable to a fine of not less than \$5 nor more than \$20, or by imprisonment not less than thirty days nor more than six months.

DRIFTED TIMBER. Logs or timber carried by floods onto lands adjoining any of the inland waters of the State may be removed by the owner within six months, upon tendering the owner of the land damages caused by the logs and to be caused by the removal. If the property is not reclaimed it becomes the property of the land owner.

INJURING MILL-DAM. Whoever willfully breaks down, injures, removes, or destroys any mill-dam, canal, trench, or reservoir, or who shall injure or destroy any water mill or steam mill machinery, will be liable to imprisonment not to exceed five years, or fine not exceeding \$500 and imprisonment not exceeding two years.

LIEN FOR MATERIALS. Any person furnishing materials for the erection, repair, or alteration of any building or structure, by agreement with or contract, or any person having authority to act for the owner, who has a lien on the building or structure, and on the interest of the owner in the lot of land on which same is situated, to secure the amount due and the costs which may accrue in enforcing the lien. If the materials be furnished by a sub-contractor, he must before furnishing the same give written notice to the owner that he intends to claim a lien, and a statement of the materials he proposes to furnish and for what purpose. The owner must then at once give the material-man by writing notice that he will not be responsible, or, failing to do so, the property will be held liable. To avail himself of the lien, the material-man must, within thirty days after the material is supplied, file in the Registry of Deeds of the county or district in which the structure is situated a statement of a just and true account of the amount due him, with all just credits given, together with a description of the property and the name of the owner, which statement must be sworn to by the owner, or his agent, and filed with the Town or City Clerk of the port within four days after the sailing of the vessel. The lien is superior to all incumbrances created after that time. Liens may be dissolved by the owner giving bond, with sureties, to pay the claims or the value of the property thereby released. The lien must be enforced by a suit commenced within ninety days from the time when the last of the materials was furnished. A lien may be taken on a vessel for materials furnished in construction or repair thereof, but the statement must be filed with the Town or City Clerk of the port within four days after the sailing of the vessel.

LOG DRIVING AND RAFTING. No person shall float timber or logs in the Connecticut River, unless properly secured in rafts and under the care of a sufficient number of persons to prevent damage. If damage results by a failure to take proper precautions and to put on a sufficient force of drivers, the owner and every person who causes or permits the logs to be driven are jointly and severally liable for all damages.

MARKS AND BRANDS. Any person wrongfully altering or defacing a mark on a log or stick of timber is liable to a penalty of \$10 for each mark, and to pay treble damages to the owner. Possession with marks destroyed or defaced is presumptive evidence of guilt.

MILL-DAMS. Any person may erect and maintain a water mill, and a dam to raise water for the same, across any stream not navigable. Such a dam shall not be injured, nor any mill lawfully existing, whether above or below it on the same stream, nor be used on the land or about a grist mill, or for any conveyance, or authority from such owner. The person whose lands will be

flowed by such a dam may obtain compensation by filing his complaint before the Superior Court of the county in which the dam lies. But no damages will be allowed for more than three years previous to filing the complaint. This complaint, when filed, should contain a description of the property and a statement of the amount of damages. Notice must be given to the owner of the mill or dam at least fourteen days before the complaint is to be heard in court. After the payment of the damages as assessed by the jury, the applicant may go on with his work.

PROTECTION OF FISHERY. Any person who willfully and maliciously burns, or otherwise destroys or removes any pile of wood, boards, timber, or any trees lying or standing on the land of another person, shall be punished by imprisonment not exceeding five years, or by fine not exceeding \$500 and imprisonment in the jail not exceeding one year.

MICHIGAN.

INJURY TO DAMS. Any person who willfully breaks down, injures, removes, or destroys any dam, reservoir, or any other structure of a similar character, shall be punished by imprisonment not more than five years, or fine not to exceed \$500 and imprisonment in the county jail not more than one year.

LIEN FOR MATERIALS. Every person who shall furnish materials in pursuance of any contract with the owner, part owner, lessee, contractor, or sub-contractor, for the erection, ornamenting, or repairing of any building, machinery, wharf, cistern, or other structure, may have a lien on the building or improvement and upon the title or interest of the owner or lessee in the land on which the same is situated, not exceeding one-quarter section, or, if in a city or village, on the lots on which the improvements are made. If the owner be a married woman and the materials are furnished under a contract with her husband, there will not be a lien unless the materials were furnished with her knowledge or consent. If the improvement be made upon a homestead, no lien can attach unless the contract be in writing and signed by both husband and wife. To cause the lien to attach, a certificate, verified by the oath of the person supplying the materials, or someone in his behalf, containing a copy of the contract, if in writing, or, if oral, a statement of its terms, a statement of the amount owing, the name of the owner, and a description of the property, must be filed in the office of the Register of Deeds of the county where the property is situated. This certificate must be filed within sixty days after the last of the material was furnished; and sub-contractors must serve written notice of such filing on the owner. Liens take precedence over all incumbrances created after the first of the material was furnished, and take priority as between themselves from the time of filing. Proceedings to enforce the lien and to determine the amount and priority are by suit in court begun within sixty days from the filing.

LOGGER'S LIEN. Any person performing labor in cutting, hauling, or driving logs, timber, or lumber, including the cook of a logging camp, has a lien for his services upon the logs or lumber. The claimant must file a written statement of his lien in the Clerk's office of the county where the services are performed, except for lumber got out to be run down the Manistee River, in which case the lien shall be filed in the Manistee County Clerk's office. If the work was done between the first days of October and April, the lien must be filed before the first day of May, otherwise it must be filed within thirty days after the completion of the services. A transfer of the lumber before the expiration of the time for filing can not discharge the lien.

LUMBERMEN'S EXCHANGES. Any number of persons not less than twenty-five may associate as a lumber exchange. They may assemble and elect officers and adopt a name, constitution and by-laws, and thereupon become a corporation possessed of legal corporate powers and liabilities, and with the power of acquiring and holding personal property and real property to the value of \$500,000. Its affairs shall be managed by a board of directors of not less than five nor more than thirteen. The exchange may appoint inspectors of lumber, and the certificate and mark of the inspector will pass in all cases of the quality of the lumber. The exchange may have members, and all such dealings shall be governed by the rules and by-laws of the exchange.

MARKS AND MARKING. Every person, firm, or corporation putting logs or timber into any of the streams of the State running into Lake Michigan shall have some distinctive mark, and impress the same conspicuously on each log. The mark must be recorded in each county through which the logs pass, and in each case the log shall be given to a booming company doing business on the waters on which they are to be floated, and the mark must have been approved by the President and Secretary of such company; and upon the request of a booming company a party shall change his mark if unsuitable. The penalty for counterfeiting a mark is imprisonment not exceeding five years, or a fine of not less than \$100 nor more than \$2,000.

ABOLITION OF DAMS. Whoever erects a dam upon his own land, or upon the land of another, without the latter's consent, or desires to erect such a dam, and can not agree with the owner of the land on the opposite side of the stream, and whose lands would be flowed or injured, as to the amount of damages, may file a petition with the Clerk of the Circuit Court asking that commissioners be appointed to appraise the damages. After such an appraisal and the payment of all damages and expenses as assessed, the applicant will be allowed to go on with his work.

IMPROVEMENTS IN NAVIGATION. Any number of persons may associate for the purpose of improving the navigation of any river by deepening the channel and constructing piers, dams, and canals, and may take tolls for the passage of vessels, boats, rafts, logs, and timber through the improvements made. The articles of association must contain the name of the corporation and set forth the stream and section proposed to be improved, the names and residences of the stockholders, and the number of shares which shall be owned by each, the term of the corporation, not less than three nor more than seven; the place of the company's principal office, and the term of existence, not to exceed thirty years. Upon filing such a certificate in the Clerk's office of the county where the office of the company is situated, and in the office of the Secretary of State, the associates become a corporation with corporate powers and liabilities. A draft of the proposed improvement must be made and submitted to the Board of Supervisors, which shall appoint a committee to prepare a report thereon. In its discretion, alter, amend, and grant the application, and fix the time in which the improvement shall be completed. In case of a failure to complete, all right to collect tolls is forfeited. Tolls are to be graduated according to the distance run on the improvement, and are fixed by the Board of Control. Stockholders are jointly and severally liable for the corporate debts. Any stream which may have been improved is open to all persons having logs or timber to run, on payment of the local tolls, and a corporation having undertaken to improve a stream is bound to keep the improvements in order and to keep the stream free from obstructions and ready for use. There is no authority for using or appropriating private property without the owner's consent, and the corporation is liable for negligence in the use and maintenance of its works. But it has been held that a booming company is not an insurer against overflows and damages resulting from jams. Excessive rains or rainfalls, causing floods, may be taken into consideration in fixing public liability. If negligent management or carelessness enlarges a jam. It has been held on all logs and lumber run for tolls, and in case logs are put into an improved stream and an insufficient force is put on to run the same, the company owning the improvement may take charge of and run them, and have a lien for the expense.

OBSTRUCTION OF STREAMS. Any person who shall willfully and maliciously obstruct the navigation of any river or stream which is now or may hereafter be declared a public highway, by felling any tree thereon or by putting into any such river or stream any refuse, lumber, slabs, or other

waste materials, shall forfeit for every such offense a sum not exceeding \$25.

PROTECTION OF LOGS AND LUMBER. It is unlawful for anyone but the owner or his employee to take possession of or run any timber or lumber in any of the waters of the State. It is unlawful to cut or deface any mark or put on another mark, and a person wrongfully doing so is guilty of a misdemeanor, as is also a person receiving logs into booms or manufacturing them into lumber without the consent of the owner. A violation of any of these provisions subjects the offender to fine and imprisonment, and makes him liable to pay the owner treble damages. Anyone having logs or timber in any of the waters of the State may lawfully search booms and ponds for lost property. Logs which may have been lodged or thrown upon lands adjoining rivers may be removed by the owner within two years, upon payment of the damages caused by the occupancy and removal. Provided the logs are lying upon farming lands, they must be removed within thirty days after the owner has received notice of the trespass. If they are not claimed and removed within the prescribed time, they become the property of the land-owner.

RUNNING, BOOMING, AND RAFTING COMPANIES. Any number of persons not less than five may form a corporation for the purpose of running, booming, and rafting logs, timber, and lumber. The articles of association must be filed in the Clerk's office of each county in which the corporation proposes to construct or use booms. The corporation may acquire and hold real estate not exceeding 15,000 acres. It has power to construct booms in any of the navigable waters named in the articles of association, provided the consent of all riparian owners whose lands will be occupied or injured be first obtained, and provided such booms be constructed and operated so as not to obstruct navigation. Tolls shall be charged and collected by the thousand feet. Before the first day of May annually, the board of directors shall fix a uniform and reasonable price per thousand feet for the ensuing season. It shall be sufficient to pay all expenses, including officers' salaries and a profit of not less than 12 per cent. on the capital stock. All receipts and expenditures shall be ascertained before the 15th of January annually, and the surplus, if any, after deducting all expenses and a dividend of 12 per cent., shall be paid over to the persons from whom tolls were collected, in proportion to the amount collected from each. The corporation has a lien on all logs and timber run for its charges; and in case logs are put into a stream on which it operates booms, and a sufficient force is not put on to run them, and a jam or obstruction to navigation actually occurs, the company may take charge of and run them, and it has a lien for the charges. But the owner of logs can not be compelled to use booms or the works of a corporation unless he so chooses. Not will the simple delivery by a person to a booming company of a list of his log marks operate as a contract for the receiving and running of all logs so marked. When a person or a company has undertaken a drive, the cost of driving logs which have become mingled can not be charged to the owner of the drive, but must be collected of the owner of the logs, or by selling the logs. There is a decision holding that it is impracticable to actually measure logs while in the water, and a rule that boomage charges shall be ascertained by counting the logs into the boom is a reasonable one. The stockholders of a booming company are jointly and severally liable for the debts of the company.

MINNESOTA.

CONVERSION OF TIMBER. In all cases of wrongful or unlawful taking or conversion of logs or timber, or where they are intermingled with others so that they can not be distinguished, or where they are intermingled with others so that where the owner of the logs is instrumental in causing them to be so mixed he must bear the loss. If the logs or timber are marked so that they may be distinguished, he may recover them when so intermingled, or they may all be sold and he be allowed his share of the profits upon proving his property in those cases where they can not be identified.

LIEN FOR MATERIALS. Whoever furnishes material for the construction or repair of any water-craft, building, structure, superstructure, railroad, telegraph line, or other improvement, by virtue of a contract with the owner, agent, contractor, or sub-contractor, has a lien thereon, and also on the land on which it is situated, not exceeding one acre in a city or village or forty acres in the country. If the material be furnished by anyone other than the original contractor, the lien shall not exceed the actual value thereof; and if furnished with the owner's knowledge it is held to be at his instance, unless he gives notice to the contrary in writing to the furnisher personally or by posting on the premises. Homesteads are not exempt from liens. To secure and continue the lien, the person furnishing materials must make a written statement of the amount actually due and owing, that the same is for material furnished, and in what construction or repair, the time of first and last item of the account, a description of the property to be charged, the name of the owner according to his best information, and notice of his intention to hold a lien. This statement must be verified by the claimant, or his agent and filed in office of Register of Deeds of the county in which the premises are situated, within ninety days from the last item, but if material was for a water-craft, railroad, telegraph line, or telephone line, the statement is to be filed in office of Secretary of State. When the statement is filed it continues a lien until one year from date of last item; within which year suit must be commenced to enforce the lien or it will be lost.

LOGGER'S LIEN. Laborers on logs and timber have a lien for their services upon the logs or timber cut, run, or hauled, to be enforced by attachment. To preserve his lien a claimant must file a statement, showing what his labor commanded and ended, the rate of compensation, and describing the logs or timber on which the lien is claimed, with the Surveyor-General of the district in which the logs may be. If the labor was performed between the first days of October and April, the statement must be filed before May 1st; otherwise it must be filed within thirty days after the completion of the labor.

LOG MARKS. Whoever cuts logs must, before putting them into the water, record the mark to be put upon them, and mark them with such mark. The mark is prima facie evidence of ownership. Log marks may be sold and transferred, and the sale of the mark will operate as a sale of all logs bearing it. Logs or timber not bearing any distinctive mark shall not be deemed, in the courts of the State, to be the property of the person who has cut them or claims to own them. Any person wrongfully taking logs or timber from the waters of the State, or from the adjoining banks or land, or defacing or counterfeiting a mark, is guilty of a misdemeanor, and is liable to the holder and innocent parties of the owner double damages.

LOG RUNNING AND DRIVING. All rivers and streams of sufficient size for floating or driving logs are public highways, and no dam or boom shall be constructed on such without a sluice-way or lock arranged so as to permit the passage of logs without unreasonable delay. Without such arrangement a dam is a nuisance, and the owner must abate it within thirty days after receiving notice from a person interested, or become liable to pay anyone injured by it \$5 a day and actual damages. In case of accidental intermingling of logs, if the person in possession does not turn over the share or shares belonging to another upon demand, the other may maintain an action for his proportion without being obliged to identify his logs.

MILL-DAMS. Any person may obtain the privilege to erect a dam across any stream not navigable, upon his own land, or across the outlet of any pond, lake, or body of water which has been incumbered by the survey of the United States, by filing a petition in a probate court, paying for the appointment of a board of commissioners to appraise the damages which may result to any persons having riparian rights.

SAWDUST AND MILL REFUSE. The owner of a saw-mill has no right to allow sawdust or refuse from the mill to fall into the stream, to the injury of a lower proprietor, although there is no other way of disposing of it without rendering the mill useless, and even though it is the custom so to do,

unless it appear that the mill could not have been constructed so as to avoid the necessity.

SLUICING DAMS. The Board of County Commissioners, after public notice and hearing, may grant to any person the right to construct a dam to raise a head of water for sluicing logs, when the land on both sides of the river is in the possession of the applicant, and they are satisfied that a sluice-dam is necessary at that point. The licensee must give a bond, with sureties approved by the board, for a diligent and proper construction and maintenance of the dam, and with such other special conditions as the board may impose. The board establishes the rates for sluicing, and the owner has a lien on logs sluiced for the charges.

MISSISSIPPI.

LIEN FOR MATERIALS. Every building erected within the State, all machinery and fixtures, or additions to or repairs of same, and the land on which erected, and all water-craft, are liable to lien for materials furnished therefor. The amount of land covered by the lien consists of the lot or curtilage on which the erection or improvement is made. The lien does not take effect as to purchasers or incumbrancers until the contract for materials is filed in the office of the Chancery Clerk of the county where the building was erected. If the land is owned by a person not a party to the contract, lien will not attach to such land unless owner gave written consent to the lien for the improvement. There is no lien in favor of sub-contractors, but sub-contractor may, if contractor fails to pay for materials, serve notice on the owner, and from the time of such service he has a prior claim to the amount owner then owes contractor. Suit must be brought to enforce the lien within six months after the maturity of the debt, or the lien is lost.

LOGGER'S LIEN. Every person engaged or about to engage in cutting or rafting cypress, pine, or ash timber, for sale or transport, and upon filing in the Chancery Clerk's office of the county where the labor is performed an affidavit of such intention or of such labor, specifying the owner, the time of service and the compensation, together with a description of the tract from which the timber is cut, and the authority by which it is cut, has a lien on the logs or lumber cut or rafted for his services.

MILL-DAMS. When any person owning land on one side of the stream or water-course, the middle of which is the dividing line, desires to erect a mill-dam or other obstruction for the purpose of water-power, and cannot agree with the owner of the opposite bank as to the amount of damages, he may make application to the Board of Supervisors of the county in which the land lies for a jury to appraise the damages. Thereupon such board, after giving ten days' notice to the owner of the opposite side, will issue a writ directed to the Sheriff of the county, commanding him to summon twelve men as a jury to fix the damages. The inquest so made and sealed by the jury, together with the writ, shall be returned by said Sheriff to the clerk of the Superior Court. When damages and expenses have been paid, the applicant may begin his work.

OBSTRUCTION OF STREAMS. If any captain or master of a vessel, or any other person, shall obstruct or cause to be obstructed any navigable river, creek, or other water-course in any manner, he shall be subject to a fine of \$1,000 or imprisonment not to exceed six months.

PROTECTION OF TIMBER. Whoever shall cut down, or take away already cut down, any cypress, white oak, chestnut, or black walnut on the land of another without the consent of the owner of said land, shall pay to such owner \$15 for every such tree cut down or carried away; and for every tree not otherwise described he shall pay \$5.

RAFTING AND DRIVING. If logs or timber are put into any of the waters of the State, for the purpose of rafting or driving, and a sufficient force is not put on to drive the same properly and safely, any other person or company having logs to run may take possession of the improperly managed drive, in case of a jam or obstruction to navigation, and have a lien on the same for the cost.

MISSOURI.

DRIFTING LOGS OR LUMBER. Whoever takes up any raft, logs, fire wood, or timber adrift on any of the streams of this State, shall be entitled to one-fourth of the proceeds of the sale of such raft or timber. If the value is less than \$10 the taker-up may retain the entire amount for his trouble, if the property is not claimed within one year by the owner. If the property is valued at more than \$10 and less than \$100, any Justice of the Peace may place in the hands of the constable a warrant authorizing him to sell the property and to pay one-fourth of the proceeds to the taker-up. If the owner does not prove title within six months thereafter he shall turn the residue into the county treasury.

LIEN FOR MATERIALS. Persons furnishing materials, machinery, or fixtures for any building, erection, or improvement on land, or for repairs thereof, under contract with the owner, proprietor, or his agent, trustee, contractor, or sub-contractor, may have a lien on the erection and on the land, not exceeding one acre in the country or the lot in a town or city. The lien only covers the title or interest which the possessor has for whose use the structure is erected. The lien attaches to buildings when the land is previously incumbered, and the building may be removed when the lien is enforced. The lien attaches to the leasehold interest of the tenant, and the buildings and improvements erected by the tenant may be removed within sixty days after the lease term expires. Contractors must serve written notices on the owner of the county where the building is a just and true account of the amount, after allowing just credits, with a description of the property sufficient to identify the same, the name of the contractor, or both. This statement must be sworn to by the claimant of the lien, or by some person for him. The lien has precedence over all incumbrances created after the commencement of the building. Sub-contractors must serve written notices on the owner that they have a claim, ten days before filing the lien. If the owner is absent, such notice is served by filing with the County Recorder. Suit to enforce a lien must be commenced within ninety days after the lien is filed, and must be prosecuted without delay. If the sub-contractor file lien it is the duty of the contractor to defend the suit thereon, and the owner may withhold the money due the contractor during the pendency of the suit.

MILL-DAMS. Anyone owning land on one side of a stream, and a part of the bed, who desires to erect a saw-mill or dam, if he can not agree with the owner of the opposite side, or with the owners of the land which will be flowed, may file a petition in the Circuit Court of the county in which the mill or dam is to be erected, and such court will issue a writ directed to the Sheriff of the county commanding him to summon a jury to appraise the damages. Notice must also be served on the proprietors of the land at the time such petition is filed. After the payment of damages and expenses the applicant secures a right to erect his mill or dam.

MONTANA.

CULTIVATION OF TREES. Whenever any person who is a resident of this Territory and shall hereafter plant and properly cultivate for two years one or more acres of said land in forest trees, he shall for the next six years following thereafter have and receive a full and complete exemption of trees so planted and cultivated; provided the said trees shall stand not more than nine feet apart and shall be kept in good growing condition.

LIEN FOR MATERIALS. Every person who shall furnish any material, machinery, or fixture for any building, erection, bridge, ditch, dam, canal, mining claim, quartz lode, city or town lot, ranch, railroad, telegraph, telephone, or electric-light line, gas pipe, motor pipe, or other improvement, shall have a lien thereon to secure payment for materials furnished. The lien covers the interest in the real estate held by the person at whose instance

the improvement is made. Real estate belonging to minors, married women, or corporations is subject to lien for improvements made for their use, benefit, or enjoyment by the guardian, the husband, or the officer of such corporation. The extent of the real estate covered by the lien can not exceed one acre in the country or the lot on which the building is situated in a city or town. The lien takes precedence over all other incumbrances as to the building or improvement; and as to the real estate, it takes precedence over all incumbrances arising after the building or improvement was commenced. The lien is perfected by filing with the Recorder of the county where the improvement and real estate are situated, within forty-five days after the materials were furnished, a just and true account of the amount due and owing after allowing all credits, and a correct description of the property sought to be charged with the lien. This account must be verified by the affidavit of the claimant. A mistake in the description will not invalidate the lien if the property is so described that it can be identified. The lien is enforced by a suit brought in the District Court. Suit must be begun within one year and must be presented without unnecessary delay. All persons interested in the real estate, either as incumbrancers, owners, or lien-holders, must be made parties or they will not be bound by the suit. Liens filed within thirty days are liens of the first class, and the others are liens of the second class. Liens of the first class take precedence over liens of the second class. All liens of the same class share pro rata.

PROTECTION OF TIMBER. Every person who shall willfully burn or cause to be burned any pile or parcel of wood or timber, being the property of another person, shall be punished by imprisonment in the Territorial prison not less than two nor more than five years.

NEBRASKA.

LIEN FOR MATERIALS. Any person who furnishes materials, machinery, or fixtures for the erection, repair, or renewal of any house, mill, manufactory, building, or appurtenance, by virtue of a contract with the owner, may have a lien on such improvement and on the lot or land on which it stands. The lien is superior to all incumbrances created after it is filed. To perfect the lien, an account must be made of the items of material furnished, with the prices, and duly verified and filed in the office of the Register of Deeds of the county in which the materials were furnished, within four months after they were so furnished. The Register of Deeds records such an account in a special record kept for recording liens, and known as the "Mechanic's Lien Record." If the contract to furnish materials was in writing, a copy must be recorded with the account. If a note has been given, it is sufficient to file the note and the account, with an affidavit that the note had been given therefor. If a sub-contractor desires a lien, he must, within sixty days after the materials are furnished, file his claim for a lien. The owner can not pay the contractor within that sixty days, or, if he does so, it is at his own risk. But after the sixty days, unless the sub-contractor files his lien, he may do so. Each lien continues in force for two years after the date of filing, and suit may be brought to enforce a lien at any other civil action. If the contractor sues the building, the owner may go on and finish far enough to prevent waste. The lien-holder may notify the owner to insure, and if the owner refuses or neglects to do so for ten days, the lien-holder may insure for two-thirds the value of the lien, and may recover for insurance money so paid out. The lien-holder must discharge the lien as soon as paid, at the request of any person interested, or failing so to do for ten days, he shall forfeit to the party requesting the discharge of the amount of the lien filed.

MILL-DAMS. Any person desiring to erect a saw-mill dam, and who can not agree with the owner of the land on the opposite side of the stream as to the damages, may file a petition in the District Court of the county where such lands lie, setting forth the place where such dam is to be erected, its height, its title to the land, whether legal or equitable, a correct description of the lands above and below the dam, and the names of those whose lands will be injured. The court will then issue to the Sheriff of the county a commanding him to summon twenty-four disinterested citizens, from which number the plaintiff and defendants will select a jury by alternately striking out one from such list. This jury thus selected will assess the damages. Ten days' notice must be given to each of the defendants before the commencement of the proceedings.

PROTECTION OF TIMBER. Anybody who materially injures or destroys the shade trees of another, or permits his animals to do so, shall be liable a fine of not less than \$10 nor more than \$30 for each tree so injured. One half of all fines thus collected shall go to the owner of the trees injured and the other half into the school fund of the State.

NEVADA.

CONVERSION OF LUMBER. Any person who unlawfully alters or destroys any marks made by the owner upon logs, or who shall convert them to his own use without the consent of the owner, shall forfeit for the benefit of the school fund a sum not to exceed \$5 for each log, lumber, or timber so defaced or converted. The offender will also be liable in civil action to the owner for treble the value.

INJURY TO DAMS. Every person who willfully and maliciously cuts, injures, or destroys any mill-dam, canal, or other structure erected to create hydraulic power, or shall make any aperture in such dam with intent to destroy or injure the same, shall be fined not more than \$1,000 or imprisoned not less than one year.

INJURING RAFT. Whoever burns, injures, or destroys any pile or raft of wood, boards, or other timber, or who cuts loose or sets adrift any raft that is the property of another, shall be punished by a fine not exceeding \$500 or imprisonment not exceeding six months.

LIEN FOR MATERIALS. Any person who furnishes materials for the construction or repairing of any building or superstructure to the amount of \$5 have a lien for their payment. The lien covers the building or superstructure and the land on which it stands, together with so much adjacent land as is appropriate to its reasonable use for the purpose for which constructed. The lien attaches as soon as the materials are furnished, and takes precedence over all incumbrances created thereafter. To perfect the lien a claim therefor must be filed in the office of the Recorder of the county where the building is situated. This claim must be verified by the affidavit of the claimant, and must show the amount due, the materials furnished and their prices, the correct description of the property, and the owner's name. The contractor has sixty days from the completion of the building, and the sub-contractor thirty days from the furnishing of the material, in which to file the claim for a lien. Sub-contractors must at once notify owner of filing of claim for lien. Suit to enforce the lien must be begun in the District Court within six months after the date the lien is filed.

LOGGERS' LIEN. Laborers employed in cutting or handling timber, have a lien for their services upon the logs or timber produced or handled. They are empowered to take the timber into possession, and hold it pending an action to enforce the lien, which must be commenced within sixty days from the time when the right to a lien accrues.

OBSTRUCTION OF STREAMS. Any person obstructing any mill-race, mill-dam, or other waterway, or who shall pollute or damage the same, or who shall pollute such a stream by casting into it any offensive or unwholesome matter, shall be subject to a fine not to exceed \$1,000, and the nuisance may be abated by the Sheriff of the county at the expense of the offender.

PROTECTION OF TIMBER. Whoever cuts down or carries away any wood or timber, or injures any tree or other under-wood, either on the land of another individual, or on the commons or on the lands of the State, or on the lands of such individual, city, or town for treble the amount of damage done. Such damages may be assessed in any civil court having jurisdiction.

RAFTING OR BOOMING COMPANIES. Any number of persons not less than five may be formed into a corporation for the purpose of rafting, driving, booming, and rafting logs, timber, or lumber on any of the streams in this State. Notice must be given of time and place where such persons may meet and subscribe articles of incorporation, adopt by-laws, and elect directors in some newspaper published in the county, and also in one published in an adjoining county. The articles of incorporation should set forth the name of the corporation, the number of years it shall exist, which must be less than thirty, the number and names of directors, and the stream on which the logs are to be carried, to be carried on. The articles must be filed in the office of the Secretary of State. Thereafter such persons shall be constituted a body corporate for the transaction of business.

NEW HAMPSHIRE.

DRIFTED TIMBER. The owner of improved land upon which logs or timber have been cast or become lodged, has a lien upon them for the damages caused by the occupancy and the removal. If the owner of such logs does not pay the damages within seven months after they have been agreed upon or assessed by the selectmen, the logs are forfeited to the owner of the land. If they are lodged upon unimproved land, they may be detained until the damages are paid. A person appropriating or converting floating or lodged timber to his own use is guilty of larceny.

LIEN FOR MATERIALS. Any one furnishing materials, by himself or others, to the amount of \$15 for any building or appurtenance, by virtue of a contract with the owner, has a lien on the building and on the lot on which it stands for the value. The lien continues for ninety days after the materials are furnished, and within that time proceedings to enforce it by attachment must be commenced. In case materials are furnished to a contractor, and not by virtue of a contract with the owner, the material-man must serve on the owner a written notice of his intention to furnish, and to claim a lien therefor. The lien extends to material furnished to other persons, if they are furnished by the contractor, or if the company must have notice as in the case of buildings; and in all cases the material-man must render a statement to the owner or company, every three months, of the kind and value of the materials and the balances due. A lien is also given against vessels for materials, to continue for four days after completion, and must be enforced by attachment.

LOGGERS' LIEN. Anyone performing labor to the amount of \$15 in rafting, hauling, or cutting logs or timber, is entitled to a lien for the value of his services. It continues for ninety days after the services are performed, and must be secured and enforced by attachment against the logs or timber cut or handled.

MILL-DAMS. Any person may erect and maintain a mill-dam upon his own land, and in case he can not agree with riparian owners whose lands are injured or flowed, either party may file a petition for the appointment of commissioners to assess the damages, and to ascertain whether the flowage will be in furtherance of the public use or benefit. If the commissioners shall decide in favor of such improvement, the person proposing to erect the mill-dam shall pay the damages and 50 per cent. additional. Either party may have the right to erect the mill-dam or the amount of damages tried by a jury.

NEW JERSEY.

INJURING TIMBER. Whoever cuts down or injures any trees standing on the land of another, without the owner's permission, or saws up any such trees or logs therefrom, knowing the same to have been so wrongfully taken, is guilty of a misdemeanor, and shall be punished by imprisonment at hard labor.

LIEN FOR MATERIALS. Every building erected in the State, and the lot or curtilage on which it stands or appurtenant thereto, is subject to a lien in favor of any person who furnishes materials, by himself or others, for the erection, alteration, or repair thereof. Additions to buildings and fixtures for manufacturing purposes are considered as "buildings." The curtilage can not exceed half an acre, nor include other buildings. If the materials be furnished for buildings or improvements erected at the instance of a tenant, the written consent of the owner must be obtained before the lien can cover more than the tenant's leasehold interest. Buildings erected on real estate belonging to a married woman, under direction of her husband, will be deemed to have been erected with her consent unless she files in the County Clerk's office a notice describing the property, and stating that she does not consent to such erection. When a building is erected by contract in writing, and the contract filed in County Clerk's office before the materials are furnished, the contractor only has a lien, provided that upon payment of each installment releases be made by all who have furnished materials or done work. These releases must be produced in case of a dispute. If the contract be not in writing, or in writing and not filed, the lien attaches. The lien attaches at the time the materials are furnished, and takes precedence of incumbrances created after that time, except in case of repairs, when lien only takes precedence from time of filing in County Clerk's office. To perfect the lien, a claim therefor, verified by the oath of the claimant or his agent, stating the name of the owner and of the person who contracted the debt, and containing a bill of items of the property and the materials furnished, with prices and the amount due, must be filed in the County Clerk's office of the county where the building is situate, within one year after the materials are furnished; and within that one year suit must be commenced to enforce the lien, and each suit diligently prosecuted within three years. Mortgagees who are affected by the lien must be made parties to the suit. A right of lien is given for materials furnished for vessels. It is enforced by attachment.

PROTECTION OF TIMBER. Any person who shall take up any timber or lumber, and shall carry the same more than twenty yards from the margin of the river in which found, or shall neglect to advertise the same according to law, or in any way appropriate the same, is guilty of a misdemeanor. Anyone taking up drift lumber which is not claimed by the owner within six days, may advertise it for six weeks, and thereupon have it sold at public auction. The proceeds after deducting the costs of the advertisement, and must contain a bill of items, with prices, the amount due, the name of the owner, and a true description of the property to be charged with the lien

NEW MEXICO TERRITORY.

LIEN FOR MATERIALS. Persons furnishing materials to be used in the construction or repair of any building, bridge, ditch, flume, railroad, or other improvement, may have a lien for their value upon the improvement and upon the land on which it is situated. Every contractor, sub-contractor, and architect are deemed agents of the owner in contracting for materials. The lien begins to attach when the materials are furnished, and takes precedence over all incumbrances created or recorded thereafter. Owner and contractor shall be held responsible for all improvements made, and with his knowledge unless he gives notice that he will not be responsible within three days after acquiring knowledge of the construction. To perfect the lien a sub-contractor must file his claim within sixty days after the materials are furnished; a contractor within ninety days after completion of contract. The lien is discharged unless suit be commenced in the District Court within one year from the time of filing the lien. The lien, when filed, must be verified by the affidavit of the claimant, and must contain a bill of items, with prices, the amount due, the name of the owner, and a true description of the property to be charged with the lien

NEW YORK.

CONVERSION OF LUMBER. Whoever shall convert to his own use, without the consent of the owner, any logs, timber, or lumber found adrift in any of the waters of this State, shall for every such offense forfeit triple their value as damages to the owner.

DRIFTING LUMBER. Whenever any logs or timber, in rafts or otherwise, shall be drifted upon any island in any of the waters of this State, or upon the bank of any such waters, the owner may remove the same by paying the taker-up the damages sustained. If the owner does not claim the property within three months, the taker-up must deliver to the Clerk of the city or town a statement of the amount of such lumber or logs, and the mark or marks, if any, upon them, and by doing so, he may detain the property until the owner pays the damages. If not claimed within six months, it must be sold at public auction, twenty days' notice having been given before such sale. After all damages have been paid the Clerk must pay the residue into the county treasury.

INJURY TO MILL-DAM. Whoever willfully or maliciously removes, injures, or destroys any pier, boom, or dam lawfully erected or maintained upon any water within this State, shall be punished by imprisonment for not more than two years.

LIEN FOR MATERIALS. Any person who, with the consent of the owner, his agent, contractor, or sub-contractor, furnishes materials for the building or alteration of any structure, including railroads, bridges, trestles, public buildings, etc., or the appurtenances to any house or lot, or in equipping any building with machinery or fixtures, may obtain a lien upon the premises for the agreed price, or if no agreed price, for the value remaining unpaid, to the extent of the party's interest as owner, lessee, or vendee in possession. The lien attaches at the time of furnishing of the first of the materials. It is preferred to any incumbrance made or recorded after commencing to furnish materials, and to any assignment for benefit of creditors made less than thirty days previously. It is not subject to be defeated by payment to sub-contractors more than the price agreed to pay contractor. The notice and claim of lien must contain the names of the parties, owner, contractor, and sub-contractor, and their residence, the amount due, a bill of items showing what the lien is for, and a description of the premises. It must be verified. The place of filing such notice and claim of lien is in the County Clerk's office. The time of filing varies in different localities. In most of the county clerk's offices, the claim must be filed after the materials are furnished. In most of the cities it must be filed within thirty days. In the cities of New York and Buffalo, and the counties of Kings, Queens, Onondaga, and Rensselaer, four months is allowed. If lien claimant be a sub-contractor, he must serve written notice on owner, and can only hold lien for amount due contractor at the time notice is served. The lien is enforced by a suit begun within one year from filing of claim therefor. Notice of the commencement of such suit must be given by filing his pendens notice or the lien will terminate with the year. The claim may be renewed for a second year by a written order properly and duly filed within the first year, showing that it has been extended by an order of the owner.

LOG RUNNING AND BOOMING. No dam can be erected on any river or stream of the State which is recognized by law or use as a public highway, for the purpose of running or floating logs or lumber, without an apron in the middle of the stream, at least fifteen feet in width and sufficient for the safe passage of logs and lumber. The number of booms must open the same for the passage of logs within ten days after receiving notice from anyone desiring to drive, under penalty of \$50 a day for a failure, besides actual damages. Persons desiring to run logs may construct chutes or aprons in dams already built and may reconstruct new dams, piers, or booms or other works necessary for the passage of logs, on paying damages to all persons injured; in case of disagreement, the damages to be assessed by commissioners appointed by the County Court.

MARKS AND BRANDING. Any person cutting logs or timber into a public stream for the purpose of running the same, must select a mark which must be recorded in the County Clerk's office of the county in which such stream is wholly or in part situated. Each log or stick of timber must be conspicuously marked. Any person intending to run logs must first execute a bond, with sureties, in the sum of \$5,000, to be approved by the County Judge of the county or counties through which it is designed to float the logs, as an indemnity against damage which may ensue to public or private property. A failure to do so is a misdemeanor, punishable by a fine not exceeding \$5,000, or imprisonment not exceeding six months, or both. The foregoing provisions do not apply to the Hudson River.

PROTECTION OF TIMBER. Any person willfully injuring or destroying any wood or timber standing or growing, or which has been cut down and is lying on the land of another, or of the people of the State, or who cuts down or injures any shade or ornamental tree, is punishable by imprisonment not exceeding six months or a fine not exceeding \$250, or both.

NORTH CAROLINA.

INJURY TO DAMS. Whoever shall cut away, destroy, or injure any dam, or who shall obstruct any race, canal, or water channel used for furnishing water for any mill, factory, or machine works, shall be subject to both fine and imprisonment, and also to a civil action by the party injured.

LIEN FOR MATERIALS. Material-men have a lien on every building, lot, farm, or vessel for materials furnished by them to build, repair, or remove. The lien also covers the lot on which the building or improvement is made, and is superior to any lien or other claim against the materials furnished. The claim for a lien must be filed in the office of the Clerk of the Superior Court within twelve months after the materials are furnished. This claim must be verified, and must contain the names of the parties, a bill of the items so as to show the amount due, and a description of the property on which a lien is claimed; and if there be a special or a written contract, its terms must be stated. To enforce the lien a suit must be begun in the Superior Court within six months after the lien is filed. Sub-contractors must not only file a claim, but also file a notice before he sues his contractor, and furnish owner with statement of amount due. Owner may require contractor to furnish an itemized statement of amounts due material-men. Owner may not retain enough out of contract price to pay material-men. Owner can not be held liable to sub-contractor for any greater sum than was due contractor when notice is given him of the claim of a lien by sub-contractor.

MILL-DAMS. Anyone desiring to erect a mill-dam on a stream of which he owns one side and part of the bed, and who can not agree with the owner of the opposite bank as to the amount of damages, may file a petition in the Superior Court of the county where such dam is to be erected, and the court will appoint three disinterested persons as commissioners who will assess the damages. After payment of all damages and costs, the applicant will have a right to begin his construction.

OBSTRUCTION OF STREAMS. If any person willfully fells any tree or puts any obstruction in any branch, creek, or other stream, whereby navigation of such stream by any raft or flat may be impeded, delayed, or prevented, he shall be subject to a fine not to exceed \$50 or imprisoned not to exceed thirty days.

NORTH DAKOTA.

BOOMS. It is lawful for any person having logs or lumber in any stream navigable for water-craft to boom the same along shore, securing the boom by means of piers or stakes driven into the banks or to the trees on the shore, providing a sufficient passage is left for navigation.

INJURY TO FLOATING LOGS. Any person removing or injuring any floating logs, or any logs stranded upon the bank of any water-course in this

State, is guilty of a crime, and shall be punished, if the property so taken or injured is worth more than \$100, by imprisonment not less than three months nor more than one year. If the property is worth less than \$100, the offender shall be fined not less than \$20 nor more than \$80. Any person buying, receiving, or secreting such logs, knowing that they have been removed, shall be subject to the same penalties as the offender.

LIEN FOR MATERIALS. Any person furnishing any materials, fixtures, or machinery for any building, erection, or improvement on land, including all works of internal improvement, to be used in the construction or repair thereof, under a contract with the owner, his agent, trustee, contractor, or sub-contractor, may have a lien upon the building or improvement, and also on the land of the owner on which such building or improvement is situated, for the amount due him for materials so furnished. If collateral security is taken no lien can be taken. The lien must be filed in the office of the Clerk of the District Court within ninety days by the contractor, and within sixty days by the sub-contractor, after the materials have been furnished. This lien must contain a just and true account of the demand due after all just credits have been allowed, a correct description of the property to be charged with the lien, the name of the person against whose property the lien is demanded, and must be verified by affidavit. The sub-contractor may also file his lien after the sixty days and within six months, but in such event he will only be entitled to a lien for any balance not paid to the contractor. Liens take priority in the order of filing, and are preferred to any incumbrances created after the improvement is begun. A lien for materials furnished (tenants only) may be obtained and enforced against the land on which the materials furnished may be sold and removed as against the landlord or a prior incumbrancer. Suit to enforce a lien must be begun in the District Court of the county where the property is situated. Several actions to enforce liens may be consolidated. The court may allow \$5 for drawing a lien. The lien-holder must bring suit within thirty days after a written demand is served, or he will lose his lien. If a lien has been paid and the lien claimant perfects for ten days, and to acknowledge satisfaction in the record in the Clerk's office, he shall forfeit \$25, and shall be liable for all damage occasioned by his neglect.

LOG MARKS. Any person cutting, altering, or defacing any log mark, or putting a false mark upon any log, with intent to defraud the owner thereof, is guilty of a misdemeanor, and shall be punished by imprisonment not exceeding one year.

PROTECTION OF TIMBER. Whoever injures or destroys any timber standing on the land of another, renders himself liable in damages to the owner for triple the damage inflicted.

OHIO.

DRIFTING TIMBER OR LOGS. Any person taking up drifting logs or lumber in any of the streams of this State shall be allowed from 25 to 75 cents for each log so taken up. If the owner does not claim his property within sixty days, the taker-up must report the same to the Circuit Clerk of the county, who, after thirty days' notice, must sell the property, and, after defraying all expenses, if the owner does not claim his property within one year, turn the residue into the school fund of the State.

INJURY TO DAMS. Whoever shall willfully break, throw down, or destroy any lock, bank, or dam belonging to any stream or canal in this State, shall be liable to the owner for more than three times the value of the dam, and also liable in a civil action for all damages sustained.

LIEN FOR MATERIALS. A person who furnishes materials or machinery, by virtue of a contract with the owner or his authorized agent, for the construction, repair, alteration, or removal of any vessel, building, manufacture, furnace, bridge, or other structure, or for the digging or boring of any gas, oil, or other well, or in mining coal, may have a lien on the vessel, house, or machinery, a description of any notes given therefor, a copy of the contract if in writing, a statement of the amount and times of payment, and a description of the land on which the improvement is situated, or to which it may be removed. This statement is recorded in a book kept for that purpose, and when so filed and recorded a lien is created which relates back to the time when the first of the material was furnished and continues for six years after such filing, and until final judgment in a suit brought in the Court of Common Pleas of the proper county to enforce the lien.

MARKS AND BRANDING. Any person floating logs or timber in any of the navigable streams or water-courses in this State may adopt any mark or brand, and impress the same upon such logs or timber, by first recording it with the Clerk of the County Court. Anyone altering, defacing, or destroying any brand or mark thus recorded shall be liable to a fine of \$25.

MILL-DAMS. Any person desiring to erect a mill-dam or other embankment on any of the navigable rivers or streams in this State, shall first obtain from the Board of Public Works an order authorizing him to erect such a dam or embankment, in which he shall set forth that it will not interfere with the navigation or other commercial purpose for which the stream is to be used. Any violation of this provision will subject the offender to a fine not exceeding \$1,000.

NAVIGATION IMPROVEMENT COMPANIES. Any number of persons may form themselves into a company for the improvement of any streams or water-courses for navigable purposes, and may prescribe a reasonable rate of toll for the privilege of using such streams.

PROTECTION OF LUMBER. Whoever maliciously sets fire to or burns any lumber or timber, the property of another, if of the value of \$35 or more, is liable to imprisonment not less than one year nor more than three; or, if less than that value, to be fined not less than \$5 nor more than \$100 and imprisoned not more than thirty days.

OKLAHOMA TERRITORY.

INJURING DAM. Any person maliciously injuring or destroying any dam, embankment, or other structure erected to create hydraulic power, is guilty of a misdemeanor, and shall be punished by imprisonment not exceeding one year.

INJURY TO TIMBER. Whoever cuts down or destroys any timber, or carries away any timber already cut down, is guilty of a misdemeanor, and shall be punished by imprisonment not exceeding one year.

LIEN FOR MATERIALS. Whoever furnishes any materials, fixtures, or machinery for any building, erection, or improvement on land, including all works of internal improvement, to be used in the construction or repair thereof, under a contract with the owner, his agent, trustee, contractor, or sub-contractor, may have a lien upon the building or improvement, and also on the land of the owner on which such building or improvement is situated, for the amount due him for such materials furnished. If any collateral security is taken, no lien can be attached. The lien must be filed in the office of the Clerk of the District Court within ninety days by the contractor, and within sixty days by the sub-contractor, after the materials have been furnished. This lien must contain a just and true account of the demand after all just credits have been allowed, a correct description of the property to be charged with the lien, the name of the person against whose property the lien is demanded, and must be verified by affidavit. The sub-contractor may also file his lien after the sixty days have expired, and within six months, but in such event he will only be entitled to a lien for any balance not paid to the contractor. Liens take priority in the order of

ding, and are preferred to any incumbrance created after the improvement is begun. A lien for any materials furnished to a tenant will be binding only on the leasehold interest. Buildings erected from materials furnished may be sold and removed without the landlord or a prior incumbrancer. Suit to enforce a lien must be brought in the District Court of the county where the property is situated, and must be begun within one year from the time the materials were furnished. Several actions to enforce liens may be consolidated. No homestead exemption shall operate against a lien for materials. The court may allow \$5 for drawing a lien. The lien-holder must bring suit within thirty days after a written demand is served, or he will lose his lien. If a lien has been paid, and the lien claimant neglects for ten days to acknowledge satisfaction in the record in the Clerk's office, he shall forfeit \$25, and shall be liable for all damages occasioned by his neglect.

PROTECTION OF LOGS. Whoever removes or injures any floating logs, or any logs which have floated and are stranded, is guilty of a crime, and if such floating or stranded logs are worth more than \$100, may be punished by imprisonment not less than three months nor more than one year, and fined not less than \$10 nor more than \$100. If the property is worth less than \$100, the offender shall be fined not less than \$25 nor more than \$50. Any person buying, receiving, or secreting such logs, knowing that they have been removed, shall be subject to the same penalties as the offender.

OREGON.

IMPAIRING BOOMS. Whoever willfully breaks, cuts away, injures, or destroys any boom or raft lawfully established in this State, shall be punished by imprisonment not less than three months nor more than one year.

MILL-DAMS. Any person owning land on one side of a stream, and desiring to erect a mill, heighten a dam, or build, enlarge, or repair any race, whereby the land of any other person will be taken, doubted, or damaged, may apply to the Clerk of the Circuit Court of the county in which the mill is to be located, and obtain a Sheriff's writ to the amount of damages. The writ, after viewing of the property on the court, the amount of damages appraised. Thereupon the court issues a summons to all interested persons, directing them to appear at the next term of court and show cause why leave to erect such a structure should not be granted. If it appears to the court that the structure will be a benefit to the public, and that no dwelling-house, out-house, or garden will be overthrown, a license is granted upon the applicant paying all damages and costs. To avoid forfeiture of his license, the applicant must complete the structure or improvement within one year, and must complete it within three years. If the property should by any means be destroyed, the owner must rebuild it in the same time.

LIEN FOR MATERIALS. Every person furnishing material to be used in the construction, alteration, or repair of any building, wharf, ditch, dam, tunnel, fence, machinery, aqueduct, or other structure or superstructure, under contract with the owner, has a lien for the amount his due therefor upon the improvement, and upon the materials which are constructed, or to be constructed thereon, required for the convenient use thereof to be determined by the Circuit Court at the time of the foreclosure of the lien, if the land belong to the person causing the improvement to be made. Every contractor, sub-contractor, architect, builder, or other person in charge of whole or part of the work, is deemed to be the agent of the owner of the building. To effect a lien a notice, duly verified by affidavit and containing a bill of the items of materials, with prices, the amount of the claim, and a description of the property on which a lien is claimed, must be filed with the County Clerk. The original contractor has sixty days from the completion of his contract in which to file such notice; the sub-contractor must file within thirty days after he ceases to furnish materials. Suit must be begun to enforce the lien within six months after the notice is filed, or if credit be given, then within six months after the debt is due; but no lien can continue in force more than two years from the time the improvement is completed. Liens are also given to the contractor, sub-contractor, architect, or other contractors, upon all the property of the railroad corporation. The aggregate of all such liens shall not exceed the original contract price between railroad company and contractor, nor can a company be made liable for more than is due contractor when notice is served on officer of company of the intention to claim a lien, with a copy of the contract attached. Such a notice must be served within twenty days after furnishing material. A company may release a lien by paying sum due original contractor to Clerk of Circuit Court of county where executed office is, and publication of notice thereof for two weeks in some newspaper of general circulation in that county.

LOGGERS' LIEN. Any laborer working in a lumber or logging camp has a lien on the timber or logs cut by him for the amount due for his work. To enforce a lien of this character, the timber or logs must be seized within twenty days, or a verified copy of his demand must be filed in the office of the County Clerk within thirty days after ceasing work. Suits for the enforcement of liens upon a claim against a lumberman must be begun within six months after the demand is filed, and must be diligently prosecuted.

PENNSYLVANIA.

FLOATING LUMBER. Persons taking up lumber, logs, shingles, or timber found adrift on the rivers of this State, are governed by local laws applicable to each river or waterway. The local laws provide for the marking of marks of designation, the recording of such marks, the price for each log so taken up, and the methods of sale and the distribution of proceeds in case the owner does not appear and claim the property.

INJURING DAM. Whoever maliciously injures, damages, or destroys any dam, bank, or breakwater is guilty of a misdemeanor, and may be punished by imprisonment for six months.

INJURING TIMBER. Any person cutting down any tree or timber on the lands of another, without his consent, or knowingly purchasing lumber made from trees so cut down, shall be punished by imprisonment not over one year or fine not to exceed \$1,000.

LIEN FOR MATERIALS. In nearly all the counties of the State all buildings, mines, iron works, bridges, etc., are liable to a lien for the materials used in their erection, alteration, improvement, or repair, and furnished under contract with the owner or his contractor. The lien also covers the ground on which the improvement stands and so much more contiguous as is necessary for reasonable use. If materials are supplied under a contract made with a tenant, the written consent of the owner is needed to make the claim valid. The lien takes precedence of every other incumbrance attaching after the commencement of the building. If a husband erects a building on his wife's land with her knowledge or consent, a lien will attach for the materials; but the lien must be filed against both husband and wife. To effect the lien a claim therefor must be filed in the office of the Clerk of Common Pleas within six months after the materials were supplied. Such claim must set forth the name of the lien claimant, of the owner, of the contractor, architect, or builder (if the contract was made with such person), the amount claimed, the materials furnished and the dates when furnished, and the prices, the locality, and such a description of the building as shall be sufficient to identify it. The lien is enforced by the issuance of a writ of sequestration and a writ of habere facias. This writ must be returned within five years from the time the materials were furnished, but if judgment is not obtained within five years from the issuance of the writ the lien is lost. Agreements between the owner and the contractor bind sub-contractors.

[NOTE.—The State of Pennsylvania has many local laws respecting liens for materials. Some of them only apply to one or two counties. To attempt to give a statement of the provisions of these many and varied local provisions would serve no useful purpose.]

LOG-DRIVING COMPANIES. Corporations may be formed for the purpose of driving and floating saw-logs, lumber, and timber on any stream exceeding twenty miles in length. Such a corporation has the power to pursue its

vocation in the usual methods for driving, and may construct dams and slides and reservoirs for holding water. The free navigation of the stream for other persons must not be obstructed. In streams which are non-navigable, or in which navigation is difficult, a corporation has power to clear out the channel and improve the navigation, but in such manner as not to obstruct descending navigation, whenever that is possible. A majority of the stock must always be held by persons owning land drained by a stream on which the corporation conducts business. The improvement must be for the public benefit, and all persons may take advantage of the same upon the payment of reasonable charges to be fixed by the officers, not to exceed ten cents per thousand feet for lumber passing through the improvement. Before commencing operations the company must file a bond in the Court of Common Pleas of the proper county, to be approved by the court, conditioned to indemnify all persons who may be damaged by the improvements. All riparian owners, including owners of dams and saw-mills, must be compensated for damages which may ensue to them by reason of the operations of the company, and in case an agreement can not be reached, the company may have the damages assessed, and obtain title to land by proceedings similar to those by which land is condemned for public use. Tolls may be collected as soon as reasonable improvements, lessening the hazard of navigation, are completed.

LOGGERS' LIEN. Laborers engaged in cutting, hauling, or driving logs or lumber, may have a lien for their services to the amount of \$300 for services performed within six months before the death or general assignment of the owner, or a sale of the logs on execution. Claimants must give notice to an executor or administrator, or to an assessor or Sheriff, as the case may be, before a sale of the property, in order to preserve their lien.

MILL-DAMS. Riparian owners on any of the navigable streams of the State are authorized to erect dams, providing navigation is not thereby obstructed, closed, or private property infringed upon. If on complaint it is found that these restrictions have been violated, the court shall order an indictment to be found.

SAW-MILL REFUSE. It is unlawful for any person to put into, or place so that the same will slide into, any navigable stream or tributary used for floating, running, or manufacturing lumber, any slabs, edgings, or refuse, without the intention of directing or caring for the same. A violation of the law is punishable by a fine not exceeding \$50.

RHODE ISLAND.

LIEN FOR MATERIALS. The real estate built upon, repaired, or improved at the request of the owner thereof, is pledged for the payment of materials furnished therefor, subject only to such incumbrances as were outstanding when the work commenced. If the real estate belong to a married woman and the request is made by the husband, the wife's written assent must be obtained. If the person making the request be a tenant, the leasehold interest is all that can be held subject to the lien. Sub-contractors have the same right of lien as contractors if they give written notice of their claim to a lien to the owner, and file same with the Town Clerk of the town where the land is situated, within sixty days after the materials are placed on the land. Contractors must file their claim within four months after default in payment under a written contract, or within six months after the work is commenced if the contract be oral. The claim must be verified by affidavit and must contain a description of the property on which a lien is claimed, a list of the materials furnished and to whom supplied, the name of the owner and contractor (if any), the prices, the credits (if any), and the amount owing. The lien must be enforced at the next term of the Superior Court of the county after being filed. Mortgagees, owners, and all other persons interested must be made parties to the suit.

LOG MARKS. Any person altering or defacing any mark put upon lumber or logs by the lumber surveyor shall be punished by a fine not less than \$50 for every such offense.

MILL-DAM. Anyone may erect and maintain a dam for a water mill upon his own land, or the land of another with his consent, and parties who are injured or damaged by the setting back of the water or the maintenance of the dam may file a petition and have a jury to appraise past damages, future yearly damages, or gross future damages. In such cases the damowner may not detain the water more than twelve hours. All damages occasioned by the flowing, backing, stopping, or raising of the water are a lien on the mill and dam and all the appurtenances from the time suit is begun to recover such damages.

SURVEY OF LUMBER. All lumber brought into the State for sale must be inspected and surveyed by the local lumber surveyor and the contents marked thereon. Merchandisable lumber and refuse lumber are each marked with a durable mark indicating the quality. Buying, selling, or taking delivery of lumber bought outside the State, or raising the lumber having been so inspected and marked, is forbidden, and a penalty of \$1 per thousand feet is imposed for any violation of this provision.

SOUTH CAROLINA.

FLOATING TIMBER. Any person taking up lumber or timber found floating in any of the streams of this State, without paying the proceeds from such sale to the owner, shall be fined and imprisoned at the discretion of the court in which the offense is tried.

INSPECTION OF LUMBER. All ranging timber must be bought and sold by board or superficial measurement, under penalty of not less than \$100 nor more than \$500 for each offense. All timber and lumber brought to market for sale at the ports of Charleston, Port Royal, Beaufort, and Georgetown must be inspected and measured by one of the licensed measurers appointed by the City Council.

LIEN FOR MATERIALS. A lien is given upon the property, and the land on which it is situated, to anyone who furnishes materials for the erection or repair of any building or structure or vessel, with the consent of the owner or person acting for him, for the value of such materials. If the improvement is upon land belonging to a married woman, her consent should be obtained. Sub-contractors must serve written notice on owner of their intention to furnish materials, specifically describing them, and that a lien will be claimed. The owner may then advise sub-contractor that he will not be responsible, and if he does, no lien will attach. To make the lien effective a verified claim therefor, stating name of owner and contractor, containing a bill of items of materials furnished, with prices, and a description of the property on which a lien is claimed, must be filed in the office of the Clerk of the Court of Common Pleas within thirty days after the materials are furnished. To enforce the lien, a suit must be commenced thereon within ninety days after the materials are furnished. Liens on vessels must be filed within four days after the vessel leaves the port where the materials were furnished.

MILL-DAMS. No dam or embankment can be erected or kept up in any of the streams of this State which causes the land of another to be overflowed, without such person's consent; nor can water be reserved or kept back be let off so as to injure or destroy the crops of another.

OBSTRUCTING STREAMS. Whoever cuts down or places any timber or tree in any river or creek and who shall not remove such obstruction within forty-eight hours thereafter, shall be subject to a fine of not more than \$25 or imprisonment not over ten days.

SOUTH DAKOTA.

BOOMS. It shall be deemed lawful for any person having logs or lumber in any stream navigable for a water-craft to boom the same along shore,

securing such boom by means of piles or stakes driven into the banks or to the trees along the shore, provided a passage-way sufficient for navigation is left open in such stream.

FLOATING LOGS. Whoever removes or injures any floating or stranded logs found upon any of the water-courses or streams in this State is guilty of a crime; and if the logs so removed or injured shall be valued at more than \$100, shall be imprisoned not less than three months nor more than one year. If the property is worth less than \$100, the offender shall be subject to a fine of not less than \$20 nor more than \$80. Whoever shall buy, receive, or secrete such logs, knowing that they were removed, shall be subject to the same penalties as the offender.

LIEN FOR MATERIALS. Whoever furnishes any materials, fixtures, or machinery for any building, erection, or improvement on land, including all works of internal improvement, such as railways, etc., to be used in the construction or repair thereof, under a contract with the owner, his agent, trustee, contractor, or sub-contractor, may have a lien upon the building or improvement, and also on the land of the owner on which the same is situated, for the amount due him. If collateral security be taken, no lien can be had. The lien must be filed in the office of the Clerk of the District Court within ninety days by the contractor, and within sixty days by the sub-contractor, after the materials have been furnished. This lien must contain a just and true account of the demand due him after all just credits have been allowed, a correct description of the property to be charged, the name of the person against whose property the lien is demanded, and must be verified by affidavit. The sub-contractor may also file the lien after sixty days and within six months, but in such a case will only be entitled to a lien for any balance not paid to the contractor. Liens take priority in order of filing, and are preferred to any incumbrances created after the improvement is begun. A lien for materials furnished tenant only covers the leasehold interest. Buildings erected from materials furnished may be sold and removed as against the landlord or a prior incumbrancer. Suit to enforce a lien must be begun in the District Court of the county where the property is situated. Several actions to enforce liens may be consolidated. The court may allow \$5 for drawing a lien. The lien-holder must bring suit within thirty days after a written demand, or he will lose his lien. If a lien has been paid and the lien claimant neglects for ten days to acknowledge satisfaction in the record in the Clerk's office, he shall forfeit \$25, and shall be liable for all damage occasioned by his neglect.

LOG MARKS. Injuring or defacing any mark or brand upon logs, or placing a false mark thereon, with intent to defraud the owner thereof, shall be deemed a misdemeanor, and shall subject the person so offending to a prisonment not exceeding one year.

PROTECTION OF TIMBER. Any person injuring or destroying any timber standing on the land of another shall be liable to the owner for triple the damage inflicted.

TENNESSEE.

INJURING MILL-DAM. Whoever willfully and maliciously injures or destroys any dam, lock, canal, trench, reservoir, or any of the machinery of a mill, or draws off the water from any mill-pond, reservoir, canal, or trench, shall be subject to a fine of not less than \$10 for such offense.

LIEN FOR MATERIALS. A lien is given to whoever furnishes materials, by virtue of a special contract with the owner, for the construction or repair of a house, or the furnishing or erection of fixtures, machinery, or improvements. If the contract be made with the mortgagee or vendee who holds subject to a vendor's lien, and the mortgagee or vendee do not object within ten days after being notified in writing, the lien for materials will take priority over the mortgage or vendor's lien. If the material be furnished for an improvement on lands owned by a married woman, the contract must be in writing and signed by her, or else the material-man will have no remedy save to remove the building after ten days' notice. The lien covers the building or improvement and the lot or land on which it is constructed, and takes precedence of all incumbrances created after the material is furnished. Sub-contractors must notify the owner in writing, within thirty days after materials are furnished, that a lien is claimed, and this will continue their lien for ninety days from date of such notice, provided a statement of the material furnished be filed with the County Registrar and by him recorded in the "trust book." The liens of sub-contractors can in no case exceed the amount which the owner agreed to pay the original contractor. The lien of the original contractor continues for one year and until the final decision of a suit to enforce it brought within such year in a court of record of the county where the building or improvement is situated.

LOG MARKS. Whoever cuts out, defaces, or destroys the marks or brands placed by the owner upon any saw-logs which he sets afloat on any stream, with intent to convert such logs to his own use to the damage of the owner, renders such wrong-doer liable to a fine of not over \$50 or imprisonment at the discretion of the court.

MILL-DAM. No saw-mill can be erected, unless the party seeking to do so owns the land on which the dam is to be erected, or obtains the written consent of the owners. After obtaining the written consent of the owners, he must file a petition in the County Court of the county where such dam is to be erected, setting forth the nature and object of the improvement. Notice is given by posting at the door of the court house, and the court at the following term fixes the terms and the time of the privilege, and issues a decree giving such person permission to begin his construction.

TEXAS.

LIEN FOR MATERIALS. Persons furnishing materials for the erection or repair of any house or building of any description may have a lien on the building and on the land on which it is situated, not exceeding the lot it is in a city, or fifty acres if in the country. The contract must be made with the owner or his contractor, and if it be for an improvement on a homestead must be in writing and signed by both husband and wife, and acknowledged and recorded like a deed. It is safer to have the wife's contract or her consent in writing if she owns the land. To perfect the lien there must be filed in the office of the County Clerk, within four months after the last of the material is furnished, a verified statement showing the articles furnished, with prices, the amount due, the name of the owner, and a description of the property. With this statement there must also be filed the contract if it be in writing; if it is an oral contract its terms must be given in the statement. The sub-contractor must file his lien, give to the owner a notice of the amount his due and the name of the contractor owing him. This notice must be given within thirty days after materials are furnished, and owner must retain amount due contractor; then, if sub-contractor is not paid, he may, in ten days after giving such notice, claim a lien for the amount owner owed contractor when notice was given. Liens are enforced by suit in the District Court commenced within one year.

LOG DRIVING AND LUMBERING. Any person engaged in floating or rafting logs or timber on any of the waters of the State, must make quarterly reports on the first days of April, July, October, and January, or within fifteen days thereof, showing the number of logs cut and floated during the preceding three months, the survey of lands from which cut, and the number cut from each survey, and a description of the brand placed on each. The reports must be filed with the Clerk of the county where the timber was cut.

LOG MARKS. Every person engaged in rafting or floating timber must have a brand, and mark every log or stick of timber put into a stream. The brand must be recorded in every county where he cuts timber. A certificate of the County Clerk, containing a description of the brand and the name of the owner, with a transfer on the back, is evidence of the ownership of a log marked with that brand. Any person buying or selling a log while afloat, or that has been floated, unless the same is branded, is guilty

of a misdemeanor. It is a misdemeanor to float an unbranded log, or to counterfeit or deface a brand, or to take into one's possession a branded or unbranded log without the consent of the owner.

UTAH TERRITORY.

INJURING DAM. Whoever maliciously cuts, breaks, injures, or destroys any dam, canal, embankment, or other structure erected to create hydraulic power, or makes any aperture therein, with intent to injure or destroy the same, is guilty of a misdemeanor, and shall be punished by a fine not over \$300 or imprisonment not over six months.

LIEN FOR MATERIALS. Persons furnishing materials by contract with the owner of land, his contractor or sub-contractor, for the construction, alteration, or repair of any building, structure, or improvement on or in land, including railroads, tramways, wagon-roads, toll-roads, canals, bridges, wharves, ditches, flumes, aqueducts, reservoirs, mines, lodges, shafts, tunnels, belmies, etc., have a lien on the land and the building, structure, or improvement, for the value of the materials furnished, to the extent of the interest or claim of such owner. The lien also covers all water rights pertaining to the property; and in case of corporations, it attaches to the franchise and charter privileges. A person furnishing materials under contract with the principal contractor is a sub-contractor in the first degree; if he furnish under contract with a sub-contractor in the first degree, he is a sub-contractor in the second degree. The lien relates back to the time of furnishing the materials, and has priority over all subsequent incumbrances, except taxes. To perfect the lien, a statement must be filed in the office of the County Recorder, containing a notice of intention to hold a lien, a description of the property charged with the lien, and an abstract of the indebtedness, showing the whole amount of the debt and what materials it is for, the whole amount of credit, and the balance due or to become due. This statement must be verified by affidavit of the claimant, or someone on his behalf, and must be filed within thirty days after the materials are furnished, and within sixty days, after the materials are furnished. A sub-contractor of either degree who intends to furnish materials may file a statement in advance, containing a notice of intention to claim a lien, a description of the property, and the probable value of the material to be furnished, and serve a copy thereof on the owner, and the effect is to enjoin the owner from paying the amount named to the contractor. If liens of different classes are filed, they take precedence as follows: (1) Sub-contractors of the second degree; (2) Sub-contractors of the first degree; (3) Contractors; and the court enforcing the lien decrees their respective order. Suit to enforce a lien must be brought in the District Court within one year from the time the statement is filed.

PROTECTION OF TIMBER. Whoever cuts down or destroys wood or timber on the land of another, or carries away such timber after being cut down, with intent to defraud the owner thereof, or maliciously injures or destroys any raft of wood or lumber, by cutting loose or setting adrift the same, shall be subject to a fine not more than \$500 or imprisonment not over six months. To cut or remove any timber from any of the public lands, with intent to dispose of the same, shall subject the offender to a fine not less than \$100 nor more than \$1,000.

VERMONT.

DRIFTING TIMBER. Logs or timber which may have become lodged on or near the banks of streams, or against dams, are forfeited to the owner of the land or dam, if not removed by the first day of November annually. The property must be publicly advertised according to law before a forfeiture accrues. Anyone stopping floating timber or destroying a mark, with intent to defraud, is liable to pay the owner three times the value, and to pay actual value if there is no fraudulent intent.

INSPECTION OF LUMBER. In each town an inspector of lumber is elected, whose duty it is, at the request of any person interested, to examine and classify the quality of lumber and shingles, and measure lumber, and give a certificate showing the result of such examination and inspection.

LIEN FOR MATERIALS. A lien for materials furnished for the erection, repair, or removal of any building may be created upon the building, and on the land on which it is situated and necessary to its reasonable use, by causing to be recorded in the office of the Town Clerk of the town where situated a memorandum signed by the claimant asserting the lien. This memorandum must contain the name of the owner, a description of the property on which a lien is claimed, the items of materials, and the amount due. The lien takes precedence over all incumbrances created after the materials were furnished. Land owned by a married woman is not liable to a lien unless she assents to the contract for improvement. Within three months after the memorandum is filed, or within three months after the debt for the materials is due, an action on the claim must be begun; and in that suit the property on which a lien is claimed must be attached within five months after judgment is obtained; then a certified copy of the record is recorded in the town clerk's office, which causes the lien to become in the nature of a mortgage to be foreclosed by a court of chancery. A lien may be had on vessels for materials furnished, provided there be a previous demand for payment. This lien only continues for eight months after the completion of the vessel.

LOGGER'S LIEN. Anyone performing labor in cutting or drawing logs has a lien on the logs handled, or his services, to continue for sixty days after the labor is performed. The claimant must file a statement of his claim and of the contract in the Clerk's office of the town where the service was performed. The lien may be enforced by attachment. Suit for enforcement of a lien must be begun within thirty days after the performance of the labor.

LOG MARKS. Whoever willfully and maliciously defaces any mark or brands placed on logs shall be liable to imprisonment not exceeding ninety days; and driving nails, spikes, or bolts in logs designed to be sawed, with intent to injure life or property, shall subject the offender to imprisonment not over one year.

MILL-DAMS. Anyone desiring to erect a dam for a saw-mill, and who can not agree with the owner of lands which are required, or which will be flowed or otherwise damaged, may file a petition and have commissioners appointed to assess the damages and condemn the property as for a public use.

PROTECTION OF LUMBER. Any person willfully and maliciously burning boards, lumber, or timber shall be punished by imprisonment in the State prison not more than five years or fine not over \$500. The selection of any town or the mayor of any city may order an inquest to be held as to the cause and manner of burning of any such timber or lumber, if, in his judgment, the public good so requires.

VIRGINIA.

FLOATING LOGS. It is a misdemeanor to float loose logs down the Notaway or Blackwater rivers.

INSPECTION OF LUMBER. All kinds of lumber, staves, shingles, and saw-logs must be inspected and branded with its quality and the number of superficial feet. Bad or unmerchantable lumber is rejected or culled, and certificates given as to lumber which is found merchantable.

LIEN FOR MATERIALS. Lumber dealers and other persons furnishing materials for the construction, repair, or improvement of any building or structure permanently annexed to the freehold, has a lien for the material furnished, upon the building or structure and so much land as is necessary for the proper and convenient use thereof. If the material was for repairs, no lien attaches unless the repairs were ordered by the owner or his agent.

To perfect the lien, the general contractor must, within thirty days after the building is completed, or the work otherwise terminated, file in the office of the clerk of the court of the county or corporation in which the building is located, the affidavit of the clerk of the chancery of Richmond if the building be in that city, an account showing the amount and character of the materials furnished, the prices charged therefor, the payments made, and the balance due, verified by the affidavit of the claimant or his agent, and containing a description of the property, as well as his intention to claim the benefit of the lien thereon. The clerk indexes and records such claim, and from the time same is filed all persons are deemed to have notice thereof. The sub-contractor may give his agent a written notice of the amount and character of his claim, but the owner can not be made liable for any greater sum than was due the principal contractor when notice was so given. The sub-contractor may give notice to the owner in writing of probable value of materials intended to be furnished to the principal contractor, and after he has furnished the materials, and within thirty days after the building is completed, must furnish owner with a correct account, verified by affidavit, of his claim against the principal contractor, and the amount due to him; and this will have the effect to render the owner liable to the sub-contractor to the amount owing the principal contractor when the written notice was given. If the principal contractor within ten days object to the claim furnished the owner by the sub-contractor, the matter is referred to arbitrators chosen by the contractor and sub-contractor; and the owner may pay the amount awarded by the arbitrators, or the amount claimed by the sub-contractor, and when the claim is made, the contractor and sub-contractor shall be entitled to credit on the amount owing the principal contractor. The lien taken by the general contractor inures to the benefit of the sub-contractor who has given the notice of his intention to furnish materials. If person causing building to be erected be a tenant, the lien on the land only covers his leasehold estate. Incumbrances on the land before the building was begun are superior to the material-man's lien as to the land and inferior as to the building, and when the lien is created the whole property is sold for the former owner's land, exclusive of the improvement given to the prior incumbrancer and the residue to the lien-holder. Incumbrances created after the building was begun are inferior to the lien. Lien of sub-contractor is preferred to that of his general contractor. All liens are enforced by a suit in equity, which must be brought within six months from the time when the whole amount covered by the lien becomes payable.

MILL-DAMMS. Any person having a water-course on his land, or who has taken one, and who proposes to build a mill useful to the public, may apply to the court of the county where the mill is to be erected for leave to build or raise a dam, or to cut or enlarge a canal or water-course. Ten days' written notice must be served on all persons whose lands are affected, and the court then appoints commissioners who inquire whether any residence or its appendages will be taken or overflowed, whether navigation will be obstructed, and whether the health of the neighbors will be annoyed. The commissioners also fix the reasonable limits of the land to be taken or flowed and assess the amount of damages. When this report of the commissioners has been presented, the court may hear the whole matter, and grant or refuse the permit. If granted, the party desiring to erect such mill must pay all damages, and then becomes owner of the realty prescribed by the commissioners. He must then begin his mill within one year and complete it within three years. If it should be destroyed he must begin to rebuild within two years, and complete five years, or the land will revert to its former owners. All dams must be provided with the "McDonald Fishway," under penalty of \$5 per day, and also such dams must be inspected by the Supervisors of the county twice each year, in April and October.

WASHINGTON.

BOOMS. Booms may be constructed on streams and other waters of the State, if constructed so as to leave an unobstructed passage-way for water-craft, rafts, etc. Charges are regulated by law. The lowest boom on a stream is required to catch all floating logs, and is entitled to charge boomage thereon.

DYKES AND DAMS may be caused to be constructed by parties to be benefited, on petition to County Commissioners, for purposes of irrigation, reclaiming tide-lands, etc.

FLOATING LOGS, ETC. It is a misdemeanor for any person to take up saw-logs, hewn or other timbers found floating in streams, bays, etc., which are marked with any private mark or brand. This does not apply to booms which are required by law to catch floating logs.

LIEN FOR MATERIALS. Every person performing labor upon or furnishing materials to be used in the construction, alteration, or repair of any mining claim, building, wharf, bridge, dyke, flume, tunnel, fence, machinery, thresh, water-wheel, aqueduct, or any other structure, or who performs labor in any mine or mining claim, has a lien upon the same for labor or materials furnished at the instance of the owner or his agent. The contractor, sub-contractor, architect, builder, or person in charge of the construction is the agent of the owner. Lien covers a convenient space of land about the structure. If the person causing the building to be erected owns less than the fee of the land, the lien covers no more than his leasehold interest. The lien is created within ninety days from the completion of the structure. Actions for foreclosure of liens must be brought within eight months of date of filing, unless a credit is given thereon, in which case the action must be brought within eight months from date of credit, and in no event can an action be maintained after two years from the date of filing. Should the owner of the real estate desire to prevent a lien attaching to the realty, he is required to post notice on the premises.

LOGGERS' LIENS. Every person performing labor, or who shall assist in obtaining or securing saw-logs, spars, piles, or other timber, has a lien upon the same. This right extends to the cook in the camp. Lien extends to lumber sawed and at the mill. Lien must be filed within thirty days, and may cover a period of eight months prior to the date of filing; must be foreclosed within twelve months.

LUMBER DISTRICTS. The Governor shall designate lumber districts and appoint inspectors for the same. It is the duty of these inspectors to scale all logs cut therein for market, and all contracts of sale not based on these scales are void.

LUMBER ROADS. Condemnation proceedings may be had for the purpose of constructing roads and chutes for the marketing of timber; when constructed, such roads are under the control of the County Commissioners and are public highways.

MARKS. Marks and brands for logs are required to be described and recorded.

STREAMS. It is a misdemeanor for mill proprietors to cast sawdust in rivers, creeks, or streams. The obstruction of navigable portions or channels of streams, bays, or harbors used for the navigation of vessels and water-craft is made a misdemeanor; dams and booms may be constructed in the channels of streams and provided with passage-ways.

TREE-PASS. Unlawful to cut or destroy timber upon public or private property, wild lands, etc.; the removal of such timber declared to be larceny.

WEST VIRGINIA.

BOOMS AND BOOM COMPANIES. In most of the counties of this State it is competent for five or more persons to form a corporation for the purpose of constructing booms to stop and secure boats, logs, lumber, and other timber. No boom can be constructed on a navigable stream except above all navigation. These corporations are formed by subscribing stock, executing

articles of incorporation, and the performance of all other requirements necessary to organize a corporation for pecuniary profit. Such corporations have the power of obtaining, through condemnation proceedings in the court of the county where located, so much real estate as is required for the transaction of its business, upon payment of the damages. The damages are ascertained by a committee of viewers appointed by the court for that purpose, and from whose assessment either party may appeal and have the amount ascertained by a jury trial in court. Such corporations have power to construct booms, clear channels of streams and bays, or to destroy, build, or repair mills, manufacture and sell lumber, and transport their lumber and logs down-stream. They may charge boomage or toll for stray logs, lumber or timber of others boomed, and have a lien on the same for the payment of such tolls. They also have power to sell such stray logs if the owner does not appear and claim within ninety days, and at the end of one year pay the proceeds of such sale, less costs and tolls, into the school fund. **INSURING BOOMS.** Whoever willfully and maliciously injures or destroys any boom or other work connected therewith, or removes, alters, or defaces any marks on logs or timber intended to be boomed, shall be punished by fine and imprisonment in the discretion of the court, and also renders such offender liable for treble the damages sustained.

LIEN FOR MATERIALS. Every person who shall furnish any material in the construction, alteration, or repair of any house or building on land, by virtue of a contract with the owner or his agent, or who shall furnish any material to a contractor who has such contract in conformity to the terms of his contract, may have a lien for the value of the material upon the building and the land on which the same is situated. A just and true account of the amount due after allowing all credits, with a description of the property on which a lien is claimed, and the name of the owner, if known, must be subscribed and sworn to and filed in the office of the clerk of the county where the property is situated, within sixty days after the last of the materials shall have been furnished or attached in preference to all incumbrances created after the materials are furnished. A sub-contractor must give notice to the owner in writing within thirty days after the delivery of the material, stating the amount of his demand and that he claims the benefit of the lien. The sub-contractors can not hold the owner of the property for any greater sum than was due the contractor when such notice was served, unless they gave written notice to the owner before furnishing any material to the contractor for payment, in which case the amount of the principal contractors' contract be not exceeded. The lien is enforced by a suit in equity brought in the Circuit Court of the county where the property is located. Such suit must be commenced within six months after the account is filed. A lien is also given for materials furnished for construction or repair of boats or vessels, but such lien only continues for three months after the materials are furnished.

MILL-DAMMS. Any person having a water-course on his own land, or who owns the land on one side of a stream, and who proposes to build a mill useful to the public, may apply to the court of the county where the mill is to be erected for leave to build or raise a dam, or to cut or enlarge a canal or water-course. Ten days' written notice must be served on all persons whose lands are affected, and the court then appoints commissioners who inquire whether any residence or its appendages will be taken or overflowed, whether navigation will be obstructed, and whether the health of the neighbors will be annoyed, to fix the reasonable limits of the land to be taken or flowed and assess the amount of damages. When this report of the commissioners has been presented, the court may hear the whole matter and grant or refuse the permit. If granted, the party desiring to erect such mill must pay all damages, and then becomes owner of the realty prescribed by the commissioners. He must then begin his mill within one year and complete it within three years. If it should be destroyed he must begin to rebuild within two years, and complete it within five years, or the land will revert to its former owners. All dams must be provided with the "McDonald Fishway," under penalty of \$5 per day, and also such dams must be inspected by the Supervisors of the county twice each year, in April and October.

OBSTRUCTION OF STREAMS. Felling timber into a stream and allowing the same to remain in, thereby obstructing and preventing the floating of rafts or timber of any kind, is an offense punishable by a fine not more than \$100.

TIMBER TRADE-MARKS. Every dealer in timber may adopt a trade mark by a writing particularly describing such mark, duly acknowledged the same as a deed, and recorded in the office of the Clerk of the County Court of the county where his principal place of business is located, and published for four weeks in some newspaper printed in such county. The owner of such mark must cause it to be plainly impressed on each piece of his timber, and defacing or destroying that mark, or using it on logs or timber not owned by the proprietor, is an offense punishable by a fine not less than \$20 nor more than \$100.

WISCONSIN.

DRIFTED TIMBER. In case logs, timber, or lumber become lodged or are thrown upon lands adjoining a stream, they may be removed within eighteen months, on tendering the damages caused and to be caused by their removal, by its lien claimant advising the prior incumbrancer of the logs, and making roads when necessary to get at and haul the logs, on tendering reasonable damages. If the logs are not removed within eighteen months, the owner of the land may remove them, and upon so doing he has a lien for twice the cost of removal and the damages caused, and may sell enough to cover the amount, upon giving legal notice.

INSPECTION OF LUMBER. The State is divided into sixteen lumber districts, in each of which the Governor appoints a lumber inspector, whose duty it is to inspect, in person or by deputy, all logs, lumber, or timber when requested by the owner, and give a bill and certificate showing the number of logs inspected, the number of feet in board measure contained therein, and at whose request sealed and measured, and to whom. This certificate of inspection is presumptive evidence of all facts stated therein in all courts of the State.

LIEN FOR MATERIALS. Every principal contractor who furnishes materials or machinery for or in the erection, construction, repair, protection, or removal of any building or structure, which is or becomes a part of the freehold, may have a lien thereon and on the land on which it is situated, not exceeding one lot in a municipality or forty acres in the country. The lien attaches when the building is commenced. It takes priority over liens or incumbrances subsequently created, but there is no preference between liens on the same improvement. Fixtures may be removed from the realty by its lien claimant if the prior incumbrancer is so great as to render his lien on the land valueless. To effect the lien a claim therefor must be filed in the office of the Clerk of the Circuit Court within six months from the date of the last charge for materials, and the suit to enforce the lien must be commenced within the next six months, except that the lien claimant may extend that time one year by filing an affidavit in the same office, to be annexed to the lien, setting forth the interest he has in the property by virtue of his claim. The claim for a lien must describe the real estate on which a lien is claimed, and set out the names of the parties, the contract for the furnishing of the materials, a list, with prices, of the materials supplied, the last date of furnishing, and the amount due. Sub-contractors, to acquire a lien, must, within sixty days from date of last charge, serve a written notice on the owner, setting forth that they had contracted with the principal contractor, what materials were furnished, and the amount due. If this notice be in due time, the sub-contractor may then file claim for a lien the same as the principal contractor.

LOG DRIVING AND LUMBER COMPANIES. Any three or more persons may form a corporation under the general law for the organization of corporations for lumbering and improving rivers, and driving, sorting, and delivering logs and timber. Such corporations have peculiar powers in addition to the powers bestowed by law on other corporations. No injunction restrain-

ing a company of this kind from continuing its legitimate work can issue until a judgment for damages obtained against it has been paid for sixty days. The corporation first taking possession of a stream for its purposes has exclusive power to improve the stream by clearing and straightening the channel, cutting canals, closing sloughs, and erecting piers and booms, and everything necessary for the sphere of its operations; but navigation shall not be obstructed nor a dam erected below the head of steamboat navigation. In case the company can not agree with riparian owners whose lands are injured or which may be needed for improvements, the damages may be assessed and the lands condemned by a jury impaneled for that purpose. No navigable slough can be obstructed without the written consent of the owners of both sides. The company may charge reasonable tolls, to be fixed by the board of directors, and may take possession of and drive all logs put into the stream, the owner of which has not put on a sufficient force to run properly without blundering main drives, and the company has a lien upon such logs. A company, however, is not authorized to take possession of logs until some actual obstruction has been caused. A booming company or an individual having contracted to drive logs to a certain point is bound to discharge any liens for tolls which may arise on the way. It has been decided that it is a reasonable rule to ascertain boomage charges by counting logs into the boom, inasmuch as actual measurement while in the water is impracticable, and therefore a booming company may maintain an action for charges as soon as they have been ascertained in this way, without waiting until it has agreed with the owner as to the quantity run. A booming company is not an insurer. In a legal and technical sense, against overflows and damages resulting from jams. It is only liable in case, by willful and negligent management, it causes an overflow or creates or enlarges a jam. Corporations organized for this purpose may purchase and own and hold stock in other corporations of like character.

LOGGER'S LIEN. Persons performing service in cutting, rafting, or handling timber or manufacturing lumber, have a lien on the timber or lumber for their demands. They must file a verified claim in writing in the office of the Clerk of the Circuit Court, setting forth the nature of the claim and a description of the property on which a lien is claimed. If the services were performed between November 1st and May 1st, the claim must be filed before the first day of June; otherwise it must be filed within thirty days after the last day of labor. The lien may be enforced by attachment, and a transfer of the timber or lumber before the expiration of the time within which a lien may be filed will not discharge a claim.

LOG MARKS. Any owner of logs or timber may choose a mark and give to the lumber inspector of his district, who shall record it. Such mark can not be used by any other person, and the owner must mark all of his logs with it. Logs and timber marked with such mark are presumed to belong to the person in whose name such mark is recorded. Counterfeiting such a mark is an offense punishable by imprisonment not to exceed five years or fine not over \$1,000. No mortgage, bill of sale, or other written instrument affecting the ownership of marked logs, is of any validity as to third parties unless the same shall have been recorded in the office of the lumber inspector of the proper district.

MILL-DAMS. Any person owning land on which to place his mill may erect a mill-dam across any stream not navigable. If existing mills, or mill sites on which mills have been maintained and the right to which has not been lost by abandonment, are injured, the dam can not be erected. The height of the dam and the damages which other land-owners may sustain are fixed by a jury appointed by the court for that purpose, at any time within three years after the dam is constructed. Any person whose land is overflowed may institute proceedings by complaint in the Circuit Court of the county where the injured land is situated. The questions at issue are there tried by a jury, who shall assess the amount of damages sustained within the preceding three years, the amount of damage the land-owner will annually

sustain thereafter, and what sum in gross will be just and reasonable compensation for the injury sustained by the perpetual maintenance and use of such dam. They shall take into consideration the benefits which the land-owner will obtain, and deduct the same from the amount of damages. The land-owner may elect to take the gross sum or the annual damages. If the gross sum is chosen, the mill-owner must pay within three months. The annual damages is a lien on the mill property, and if not annually paid execution may be issued and the mill, mill-dam, and appurtenances sold. Either party becoming dissatisfied with the annual damages may bring a new suit for the purpose of increasing or diminishing such annual amount, and have the question retried.

MILL REFUSE AND OBSTRUCTION OF NAVIGATION. It is unlawful to throw or deposit sawdust, shavings, or edgings in any lake or bay connected with the great chain of lakes navigable for vessels, or to throw edgings, shavings, or shingle sawdust into the Wisconsin or its tributaries, excepting the Pinking. It is likewise unlawful to obstruct the navigation of any stream by banking or browling logs therein.

WYOMING.

BOOMS. No boom or dam can be constructed on any river of sufficient size for floating or driving logs, lumber, or timber, unless there is a sluiceway, lock, or other fixture permitting such logs, lumber, or timber to pass through without unreasonable delay. All creeks and streams of sufficient size for floating or driving logs, lumber, or timber are free public highways for that purpose.

LIEN FOR MATERIALS. Material-men have a lien for materials employed or used in the erection or repair of houses or buildings, by virtue of a contract with the owner or his agent. The lien covers the building and the ground on which it stands, also sufficient contiguous land for reasonable use of the building. The claim for the lien must be sworn to and filed in the office of the Register of Deeds of the county where the building is situated, and should contain a bill of items of materials furnished, with prices, the name of the owner, and a description of the property on which a lien is claimed. Ninety days is allowed in which to file after the last of the material is furnished; and proceedings must be commenced in court to foreclose the lien within one year. If there was a written contract for the furnishing of materials, it should be filed with the claim. Sub-contractors place the responsibility for their claim upon the owner by delivering to him an attested and verified account of the amount and value of the materials furnished, and the amount due. The owner then becomes responsible to the sub-contractor for the amount he then owes the contractor.

LOG MARKS. It is the duty of owners of logs, lumber, trees, and timber, floating the same down any stream, to brand them with a good, sufficient brand, selected by them and recorded by the County Clerk or Register of Deeds of the county where the stream is situated. The altering or destroying of any such brand on any such logs or lumber is an offense punishable by a fine not less than \$10 nor more than \$50, and renders the offender liable to treble damages to the owner. Possession of the property with the marks altered or destroyed is presumptive evidence of guilt.

PROTECTION OF LUMBER. Whoever willfully takes up logs, lumber, or timber from a stream, removes the same from land on which they have lodged, destroys such property, or purchases, receives, or secretes the same, knowing it to have been so taken up, shall be subject to imprisonment not less than three months nor more than one year.

SAWDUST AND MILL REFUSE. Any saw-mill owner who permits sawdust or mill refuse from his mill to be placed in any stream, body of water, or ditch, shall be liable to a fine not less than \$10 nor more than \$50.

RULES

FOR

Inspection, Classification, and Measurement of Pine and Hardwood Lumber

IN THE

VARIOUS MARKETS OF THE COUNTRY.

BALTIMORE.

Adopted by the Lumber Exchange, June 22, 1835.

In the inspection of hardwood lumber it is essential that the inspector use his best judgment, based upon the following rules laid down for his guidance:

The standard knot must be a sound one, and not exceeding 1 1/4 inches in diameter.

Splits are to be considered as defects, and usually reduce the piece to a lower grade.

Mill culls are never regarded as marketable, and any cull which will not work to the use for which the size is applicable, without wasting more than one-half, is a mill cull.

The standard lengths are 12, 14, and 16 feet, but 15 per cent. of 10-foot lengths may be allowed.

In black walnut and cherry 10 feet is considered as standard, and 15 per cent. of 8-foot lengths may be admitted in the first and second grades.

All badly manufactured lumber should be reduced in grade.

Newels must be inspected with a view of the adaptability of the piece for the intended use, as in many cases it can not be utilized for other purposes. They shall be cut outside of the heart to square the following sizes: 5, 6, 7, 8, 9, 10, and 12 inches when seasoned. The lengths must be 4 feet or the multiples thereof.

All rotten, shivered, and shaky ends shall be cut off in measurement when the board or plank will make 8, 10, 12, or 14 feet long clear of the bad end, and be graded in the grade the part will make, except culls, which shall be counted full in all cases.

Face cracks in all cases will reduce one grade. If badly face-cracked, so that one-half of the board or plank can not be used without waste, then it shall not be counted.

The inspector in all cases is to keep a separate tally of each size and quality. All boards and plank to be measured and graded on the inferior side.

The standard thickness shall be recognized as 1, 1 1/4, 1 1/2, 2, 2 1/4, 3, 4, and 5 inches in all classes of hardwoods, and in all cases the board or plank shall be full thickness, parallel in width, square edges and square ends.

All tapering pieces of lumber to be measured one-third the distance from the narrow end when 12 inches and over in width at the center, and when less than 12 inches wide at the center, to be measured at the narrow end.

Worm-holes are to be considered one of the most serious defects in hardwood lumber.

All inspectors inspecting hardwood under these rules shall mark the quality upon the lumber so inspected, when required.

Lumber inspectors are required to use due care in handling and marking lumber, so as not to interfere with the use of any part of the stock by careless handling or marking.

Black Walnut. Cherry shall be inspected in three grades—firsts, seconds, and culls. Firsts shall not be less than 7 inches wide and free from defects. At 10 inches wide will admit of defects equal to 2 inches of sap on the edges. Defects may increase with width, but not such as to cause waste when used for first-class work. Seconds shall not be less than 6 inches wide, and at 6 inches may have one sound knot. Defects may increase proportionately with the width. Sap on the face side shall be measured out. Culls shall include all lumber not up to the standard of seconds. Mill culls to be excluded from this grade.

Poplar or Whitewood. Inspection grades shall be known as firsts, seconds, and culls. Firsts shall not be less than 10 inches wide, and at this width shall be free of all defects; at 12 inches wide, 2 inches of white sap, and at 16 inches wide 4 inches of white sap shall be allowed—proportionate increase of sap to be allowed according to width. In lieu of the sap one standard knot shall be allowed for every 12 inches of sap. Seconds shall not be less than 6 inches wide, and clear up to 8 inches. Over 8 inches may have two sound knots not exceeding 1 1/4 inches in diameter, and 2 inches of white sap; at 10 inches defects equal to 3 inches of white sap, or two sound knots 1 1/4 inches in diameter. Defects may increase with width, but two-thirds of the entire piece must be suitable for manufacture of first-class work without waste. Culls shall comprise all widths and sizes not up to standard of second grade. Lumber usually designated as "mill culls" is not included in this grade. In poplar marketable thickness shall be recognized as 5-8, 4-4, 5-5, 6-4, 8-4, 2-6, 3, and 4 inches; 2-3, 1-3, 5, and 6 inches and up are classed as special sizes. When squared the sizes shall be 3 x 3, 4 x 4, 5 x 5, 6 x 6, 7 x 7, 8 x 8, 9 x 9, 10 x 10, etc. All square stuff to be cut clear of the heart, clear in quality, and cut large enough to hold sizes when seasoned. Such as are not prime shall be graded as No. 2, or culls.

Ash. The inspection grades shall consist of firsts, seconds and culls. Firsts shall be not less than 8 inches wide, and free from all defects. Sap shall not be considered a defect if bright and sound. Seconds shall be not less than 6 inches wide, and at 8 inches may have two standard knots. Defects may increase with the width; must be free from heart, dry rot, dote, and worm-holes. Culls shall include all grades not up to the standard of seconds.

Oak. Inspection same as ash, excepting timber. In which sound knots and heart not showing on the outside shall not be considered defects. Birch, beech, maple, elm, and hickory, same inspection as ash. In first-grade hickory, 6 inches in width and 8 feet in length shall be allowed.

Quartered Oak. Quartered oak shall be inspected as firsts, seconds, and culls. Firsts shall be 5 inches and over wide, and clear of all defects.

Seconds shall be 4 inches and over wide, and will allow one or two standard knots at 6 inches, or a little sound, bright sap. No other defects shall be allowed in this grade, but defects may increase with the width of the piece. All not up to the standard of seconds shall be graded as culls.

Cherry. Cherry shall be inspected in three grades. Firsts shall not be less than 6 inches wide and free from defects. At 10 inches wide will admit of defects equal to 2 inches of sap on the edges. Defects may increase with the width, but not such as to cause waste when used for first-class work. Gum spots are excluded from this grade. Seconds must be 6 inches and over wide; will admit of two standard knots; sap on the face side to be measured out. Defects may increase with the width in proportion. A small proportion of small gum spots will be allowed, but in no case shall they be of such a character or quantity as to seriously damage the piece. Culls shall include all not up to the standard of firsts and seconds.

Cherry, ash, and walnut counter-tops shall be 12 feet and over long, 17 inches and over wide, 1-4, 3-4, 6-4, and 8-4 inches thick, and must be clear of all defects.

Cherry, ash, and walnut strips, 6 inches and under wide, when in separate lots, shall be counted as firsts, seconds, and culls. Firsts shall have one face and two edges clear. Sap on face side of ash, when bright, to be counted. Seconds will admit of two standard knots or sap, which on face side of cherry and walnut shall be counted out. All not up to the standard of seconds shall be designated as culls.

Cherry strips shall be 6 feet and over long.

YELLOW PINE FLOORING

Adopted by the Exchange, January 17, 1887.

All lumber intended for flooring shall be measured at its narrowest place.

Yellow pine lumber known as Virginia and North Carolina, of 1 and 1 1/4 inches in thickness, in order to rate as No. 1 flooring in quality, shall have one side free from knots, snakes, and stain, the other side to be sound. No 2 Virginia and North Carolina flooring consists of boards with small sound knots on the best side, and to be free from worm-holes and shakes. Sap-stained boards are included in the No. 2 grade. Black-stained boards the entire length are classed as No. 3 or box. All boards not coming up to the grade of No. 2 in quality are classed as box or culls, excepting condemned boards which are thoroughly unsound or rotten.

Southern flooring 1-4 and 5-4. No. 1 Southern yellow pine heart-faced lumber admits of 1/2 inch of sap on one edge of a board not wider than 7 inches, and on boards wider than 7 inches 1/2 inch of sap is allowable on both edges. It is also to be free from shakes, rot, and large or unsound knots. Knots not exceeding 3/4 of an inch in diameter, and sound, not more than one knot to every 1 foot of contents, are allowed. It is expected that this grade shall make (when worked) at least 85 per cent. of clear face flooring. All flooring not coming up to No. 1 grade is classed as No. 2, excepting condemned boards which are thoroughly unsound or rotten.

DELIVERY OF LUMBER. A delivery of lumber, shingles, etc., shall be considered complete upon presentation of the bill; and when inspected, accompanied by the tally or claim for incorrect inspection or error in count of shingles, etc., shall be entertained after the expiration of seven days.

WHOM A WHOLESALEMAN CAN SELL. The wholesale trade must sell exclusively to the lumber dealers, manufacturers by motive power, steam railroad corporations, ship-builders, parties for export, and to any concern at one time, for one delivery, not less than 100,000 feet of one character of lumber, excepting on long shingles, which may be sold and delivered in a like manner in quantities of not less than 25,000 feet, or 10,000 shingles, or 250,000 lath. The retail trade shall buy as far as practicable from the wholesale members of the Exchange, giving them preference at all times over all other dealers.

TERMS. The buyer of lumber, lath, shingles, etc., has ten days from the day of purchase to remove the same, the seller paying the wharfage for that time, and on long shingles the buyer responsibility for any extra wharfage. CHARGES ON LUMBER CONTRACTS. Freight advanced, per bill lading. Wharfage 15 cents per 1,000 feet first ten days, and same ratio thereafter on all city and few private wharfs. Some of the latter charge 20 cents for first ten days, and same ratio thereafter. Inspection, one-half, or 12 1/2 cents per 1,000 feet.

HAULING, 12 cents per 1,000 feet on Virginia, North Carolina, and white pine, on long shingles and hardwood shingles, 30 cents per 1,000 feet when actually landed. Commission, 5 per cent. on gross sales. When lumber comes by rail, unless sold to arrive or immediately thereafter, there is an additional charge of hauling to wharf or storage yard.

BOSTON.

(First Massachusetts Lumber District.)

HARDWOODS.

Hardwood boards, plank, and joists are inspected as No. 1, No. 2, and refuse or culls. The word culls will be used in this definition, as it expresses more clearly the intent of this grade. All hardwood should be well manufactured, parallel in width, with square ends, plump in thickness, and sawed square edge, unless otherwise ordered.

The inspection should be from the poorest side of all boards and plank, except strips for flooring and sheathing, which shall be 3, 4, 5, and 6 inches wide. Splints are considered a defect, and will reduce a piece one grade if over 12 inches long, but must be straight and in one end only to be allowed. All lumber 1 inch and under shall be measured face measure.

All badly sawed lumber shall be graded as culls, and all culls to have a marketable value must have not less than one-half of the entire piece, as a whole, fit for use without waste.

The standard knot shall be sound, and not exceed 1 1/4 inches in diameter. Standard lengths are recognized as 12, 14, and 16 feet; standard thickness as 1, 1 1/4, 1 3/4, 2, 2 1/4, 3, 4, and 5 inches.

Special lengths and thicknesses are 8 to 10 feet, and 3/4, 1, 1 1/4, 1 3/4, and 2 inches, and must be specified on inspection statement.

Counter-tops are 12 feet and upward, 20 inches and up wide, 1, 1 1/4, 1 3/4, and 2 inches thick, and should be clear of all defects.

Squares 3 x 3, 4 x 4, 5 x 5, 6 x 6, 7 x 7, 8 x 8, 9 x 9, 10 x 10, are not exempt from this inspection on account of width.

WHITEWOOD (YELLOW POPLAR). Inspected as No. 1, No. 2, and culls. No. 1 shall not be less than 10 inches wide and free of defects; at 12 inches wide will admit of defects equal to 2 inches, and at 16 inches and up wide equal to 4 inches of white sap on outside. No. 2 shall not be less than 8 inches wide and free of defects; at 10 inches wide will admit defects equal to 2 inches of bright sap or one standard knot, and at 12 inches equal to 4 inches of sap or two standard knots on face side; defects may increase with width, but two-thirds of entire piece, as a whole, must be suitable for first-class work without waste. Culls shall include all lumber not up to the standard of the above grades. Black or discolored sap is excluded from No. 1 grade.

CYPRESS. Is inspected the same as whitewood. Shakes and pecks are excluded from No. 1 grade. Plain sycamore, basswood, and cottonwood inspected the same as whitewood.

BLACK WALNUT. Inspected as No. 1, No. 2, and culls. No. 1 shall not be less than 7 inches wide and free of defects; at 10 inches wide will admit defects equal to 2 inches of sap on the outside; if wider, will admit of slightly increased defects, that will not cause waste for first class work. No. 2 shall be not less than 6 inches wide; at 8 inches will admit of one standard knot on face and 2 inches sap on outside; defects may increase with width, but not less than two-thirds of the entire piece, as a whole, must be suitable for first-class work without waste. Culls shall include all lumber not up to the standard of the above grades.

CHERRY. Inspected the same as black walnut. Gum spots are excluded from No. 1 grade.

BUTTERNUT AND CHESTNUT. Inspection the same as black walnut. Worm holes are excluded from No. 1 grade.

SWEET GUM. Inspection the same as black walnut. Sap is worthless, and excluded from No. 1 grade.

QUARTERED SYCAMORE. Inspection the same as black walnut. Sap is excluded from No. 1 grade.

ASH, OAK, MAPLE, BIRCH, BEECH, ELM, AND HICKORY. Shall be inspected as No. 1, No. 2, and culls. No. 1 shall be 7 inches and up wide, and free of all defects. No. 2 shall be 6 inches and up wide, and may have a few small sound knots, but two-thirds of the entire piece, as a whole, must be suitable for first-class work without waste. Culls shall include all lumber not up to the standard of above grades. Sap, if bright and in good condition, is no defect. Heart shake, rot, dot, or worm-holes are excluded from No. 1.

Whitewood, cypress, black walnut, cherry, and other hardwood strips for flooring and sheathing, are inspected as No. 1, No. 2, and culls. No. 1 must have one face and two edges free of all defects. No. 2 may have a little bright sap (except black walnut and cherry) on face side, or a few small sound knots, but must be suitable for second-class flooring without waste. Culls shall include all strips not up to the standard of No. 2.

CHARGES. Lumber shipped to Boston to a commission dealer is subjected to the following charges:

Commission for selling, 5 per cent. Charge for inspection is 10 cents per 1,000 on hardwoods, and 50 cents per 1,000 on pine and poplar, and all other stock classed as soft woods, such as spruce, hemlock, bass, etc.

Every railroad terminating in Boston owns a shed in which to store lumber, and the charge for unloading a car is \$3. This pays also for one month's storage. The charge for the second month is also \$3, and for each succeeding month \$5.

Cars can be switched from one railroad to another for 2 1/2 cents per hundred pounds, and transferred by lighter for \$1.

When a car of lumber is sold on arrival and at once unloaded, there are no expenses attendant; but if for the buyer's accommodation it is allowed to stand on the track for several days, the railroad company charges 50 cents per day demurrage.

When lumber is shipped by rail in conjunction with either the Norfolk, Savannah, or Philadelphia steamers, it must be removed from the docks within four days from arrival, and if not sold and stored becomes necessary, the cost of teaming is \$1 per 1,000 feet, piling \$3 per car-load, and storage \$3.50 per month.

The inspection of lumber in Boston is regulated by State law entirely, and there is no variation from this. The Surveyor-General, or head of the department, is appointed by the Governor of the State, and upon taking possession of his office, he appoints a certain number of deputies, who inspect the lumber under the direction of the General. If any of stock is to be inspected, the dealer sends word to the General, and he sends one of his deputies to attend to it. When the work is completed the deputy makes out three statements of inspection or survey bills, as they are termed, and leaves them at the head office. These bills are then entered on the books of the department kept for the purpose, and the official stamp is placed upon them. One of the bills is retained in the office, and the other two are sent to the dealer or person who ordered the work done. Both the Surveyor-General and the deputies are required to give a good and sufficient bond for the faithful performance of their duties.

CHICAGO.

As officially adopted by the Lumberman's Exchange, 1855. Revised June 10, 1886, and January 22, 1897.

HARDWOOD LUMBER, CAR OR CARGO.

INSTRUCTIONS TO INSPECTORS. Inspectors of lumber are not manufacturers, and must measure and inspect lumber as they find it, of full length and width, except as to wane, which must be measured out or inspected in a lower grade, making no allowance for the purpose of raising grade, unless so instructed by the buyer or seller.

In hardwood inspection the inspector is instructed to use his best judgment, based upon the rules for his guidance.

The standard knot shall not exceed 1 1/4 inches in diameter, and must be of a sound character.

Splints are always more or less damage to a piece of lumber. An allowance must be made, either in determining the quality or quantity, according to the nature of the splint. A splint extending to exceed 1 foot will reduce it to one grade lower.

All lumber should be sawed plump thickness. Thin lumber is not considered marketable, and must be reduced to the next standard thickness, or at least one grade lower, on account of thinness.

A cull which will not work one-half of its size without waste is a mill cull of no recognized value.

When lumber for other than does not come up to grade or contract, it must be placed in the next lower grade named.

Lumber sawed for specific purposes, such as axles, bolsters, tongues, reaches, newels, balusters squares, etc., must be inspected with a view to the

adaptability of the piece for the intended use, as in many cases it can not be used for other purposes.

In inspecting the grade of firsts and seconds an undue predominance of seconds should always be judiciously ascertained, as the purchaser is entitled to the full average in grade, which must not comprise more than 66 2/3 per cent. of seconds.

Standard lengths are always recognized as being 12, 14, and 16 feet. Shorter than 12 and longer than 16 feet does not come within the range of standard. In black walnut and cherry an exception is made, and 10 feet is recognized as a standard length. Shorter or longer than standard lengths, in all varieties of hardwood lumber, except in counter tops, are to be reduced one grade lower, unless otherwise agreed between buyer and seller.

Mixed lots, containing boards, plank, flooring, bolsters, reaches, etc., shall be measured and inspected according to the rules governing the measurement and inspection of boards and plank, unless otherwise agreed between buyer and seller.

Flooring strips should be 4 and 6 inches in width, 1 and 1 1/4 inches in thickness. Other widths and thicknesses shall be designated as special sizes. It must have one face and two edges clear.

Common flooring strips shall be of the same size and general character as clear, but may have two small, sound knots not exceeding 3/4 inch in diameter, or a small amount of wane on one edge which will not injure it for working to its full size.

Hickory should never be cut while the sap is rising, as it is then liable to powder, rot, and indications of deterioration of this character should be carefully scrutinized.

Newels from all kinds of timber must be clear and free from heart, to square 5, 6, 7, 8, 9, and 10 inches plump. The length must be 4 feet full or multiples thereof.

Balusters and table legs shall be clear and square, 2 x 2, 2 1/2 x 2 1/2, 3 x 3, and 4 x 4, 3 1/2 inches long.

Newels, balusters, and table legs not coming up to the grade of clear shall be classed as cull.

Counter tops shall be 12 feet and over long, 1, 1 1/4, and 1 3/4 inches thick, and must be strictly clear, not less than 20 inches wide.

Clear lumber shall be 10 inches wide and over, free from all defects of every kind or nature.

Bolsters must be 4 feet, 4 feet 6 inches, or multiples thereof, in length, and the size must be 3 x 4, 3 1/2 x 4 1/2, 3 3/4 x 5, or 4 x 5 inches.

Reaches must be 2 x 4 or 2 1/2 x 4 1/2 inches, and the lengths 8, 10, 12, and 16 feet.

Harrow timber must be 2 1/2 x 2 1/2 inches, and the lengths 5, 10, and 14 feet.

Hickory axles must be clear, and in lengths of 6 or 12 feet for sizes 3 1/2 x 4 1/2, 4 x 5, 4 x 6, and 4 1/2 x 6, and 7 or 14 feet for 5 x 6 and 5 x 7 on special order, cut from sound, tough butt logs.

Wagon tongues must be clear and straight, 3 x 4 at small end and 4 x 4 at butt end, or 2 1/2 x 4 at small end and 4 1/2 x 4 1/2 at butt end, 12 feet long, from tough, straight-grained timber.

Bolsters, reaches, harrow timber, hickory axles, and wagon tongues not up to the grade of clear will be classed as cull.

Standard thickness shall be 1, 1 1/4, 1 3/4, 2, 2 1/4, 3, and 4 inches, except poplar, which will allow 3 1/2 inch.

When lumber is sold on this market to be measured merchantable, the inspector must measure full, except in culls, which are to be measured at one-half.

It is important that all lumber should be parallel in width, square-edged, and with square ends. Tapering lumber should be measured at the small end. Ordinary season checks are not considered defects.

Square shall be 4 x 4, 5 x 5, 6 x 6, 7 x 7, and 8 x 8 inches.

Stains, specks, hearts, shakes, rot, worm-holes, etc., are considered serious defects, reducing lumber to grades lower than firsts and seconds.

Log-run is always understood to be the unpecked run of the logs, mill culls, etc.

POPULAR AND WHITEWOOD. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds shall be 8 inches wide and over. At 11 inches may have 1 inch of sap or one standard knot, and at 13 inches two standard knots or 3 inches of bright sap. At 15 inches three standard knots or 4 inches of bright sap may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall include 6 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Slightly discolored sap is no defect. Culls shall comprise all widths and sizes below the description of common.

Box boards shall be 12, 14, and 16 feet long, from 13 to 17 inches wide, and free from all defects, except bright sap one-third of their width.

ASH. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Bright sap is no defect. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

ELM. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Thick plank may contain sound hearts if well boxed. Cull shall comprise all widths and sizes below the description of common. Wagon stock must be cut from good sound, tough, straight-grained timber, free from knots. Timbers must be free from unsound knots. Sound hearts not showing on the outside will be allowed.

HICKORY AND PECAN. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Bright sap is no defect. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

BLACK WALNUT. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 11 inches may have 1 inch of sap or one standard knot, and at 13 inches two standard knots or 3 inches of bright sap may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 5 inches and over wide, and shall include all lumber not up to the grade of firsts and seconds, but available full three-fourths of its size without waste, free from hearts and unsound lumber.

Cull shall comprise all widths and sizes below the description of common. **CYPRESS.** The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches may have 1 inch of sap or one standard knot, and at 10 inches two inches of sap or two standard knots. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 5 inches and over wide, and shall include all lumber not up to the grade of firsts and seconds, but available full three-fourths of its size for use without waste, free from hearts and unsound lumber. Cull shall comprise all widths and sizes below the description of common.

NOTE.—Gum spots are considered a serious defect, and when their damage exceeds one-sixth of the size of the piece, shall reduce to the grade of

common. When their damage exceeds one-third of the size of the piece, it shall be reduced to cull.

BUTTERNUT AND CYPRESS. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches may have 1 inch of sap or one standard knot, and at 10 inches 2 inches of sap or two standard knots. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 5 inches and over wide. At 6 inches 1 inch of sap or one standard knot, and at 8 inches 3 inches of sap or two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

GUM. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one standard knot, and at 10 inches two standard knots or 1 inch of bright sap may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall include all lumber available for use full three-fourths of its size without waste, free from hearts and unsound lumber. Clear sap may be included in this grade. Cull shall comprise all widths and sizes below the description of common.

HARD AND SOFT MAPLE. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over (except flooring). At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall be sound, 5 inches and over in width, and may have defects not injuring it for ordinary use without waste. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

BASSWOOD AND COTTONWOOD. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Bright sap is no defect. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Slightly discolored sap is allowed. Cull shall comprise all widths and sizes below the description of common.

BIRCH. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Bright sap is no defect. Common shall be sound, 5 inches and over in width, and may have defects not injuring it for ordinary use without waste. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

BEECH AND SYCAMORE. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Bright sap is no defect. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

ELM. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Bright sap is no defect. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

QUARTER-SAWN HARDWOOD LUMBER—OAK, SYCAMORE, ETC. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 5 inches wide and over. At 7 inches one, and at 9 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 4 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

CYPRESS. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 8 inches wide and over. At 10 inches two standard knots and 3 inches of bright sap may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall be sound, 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

Shakes and pecks are of great damage, and should be closely scrutinized. **SOUTHERN OR YELLOW PINE.** Inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 8 inches wide and over (except flooring), free from defects, except narrow bright sap on the face side, or two small sound knots not over 3/4 inch in diameter. Common shall include all lumber not up to the grade of firsts and seconds, but free from shakes, large knots, hearts, and unsound lumber. Cull shall comprise all widths and sizes below the description of common.

Firsts and seconds clear flooring and strips must be free from all defects except bright sap, which is allowable. Blue sap is excluded. Common flooring and strips must be of the same size and general character as firsts and seconds, but may have two or three small sound knots of no more than 3/4 inch in diameter, or a small wane on one edge which will not injure it for working to its full size.

Step planks, firsts and seconds clear, must not be less than 12 inches wide and 1 1/2 and 2 inches thick, free from all defects on one side, except 2 inches of bright sap.

RED CEDAR. Red cedar should be sold log-run, to be measured for what it can be used for. Lengths and widths are no defects. Caution should be used in determining defects.

[NOTE.—Inspectors are authorized to measure and inspect all kinds of hardwood lumber that are not included in these rules, according to the rules governing the inspection of hard and soft maple.]

PINE LUMBER.

Adopted by the Lumbermen's Exchange of Chicago, 1878, '82, '86, '89, '90.

FIRST CLEAR WHITE PINE LUMBER. First clear white pine lumber shall be not less than 12 inches in width, and no imperfections allowed unless 14 inches wide and upward; will then allow imperfections equal to sap 1 inch on one side extending the whole length of the piece, on pieces 14 inches wide and well manufactured, but the face side must be perfect; as width increases, will allow larger imperfections in proportion to the width, but not imperfections enough to decrease the value below the above-described piece.

SECOND CLEAR WHITE PINE LUMBER. Second clear white pine lumber shall be not less than 11 inches wide, and perfect up to 11 inches in width; will then allow imperfections equal to sap 1 inch on one side of the whole length of the piece, if well manufactured; as width increases, will allow other or larger imperfections in proportion to the width, but not imperfections enough to decrease the value below the above-described piece.

THIRD CLEAR WHITE PINE LUMBER. Third clear white pine lumber shall be not less than 9 inches in width, and perfect up to 9 inches; will then allow imperfections equal to sap 1 inch on one side of the whole length of the piece, if well manufactured. The imperfections in this quality shall not exceed 100 per cent. over those allowed in second clear.

SELECT WHITE PINE LUMBER. Select white pine lumber shall include all lumber of poorer quality than third clear, the imperfections of which shall not exceed 100 per cent. over those allowed in this grade.

WHITE PINE FLOORING. Clear white pine flooring shall be 1 inch thick, 6 inches wide, and no imperfections.

SECOND CLEAR WHITE PINE FLOORING. Second clear white pine flooring shall be in thickness and width same as clear flooring, and will allow of one small knot or sap 1/4 inch on one side, with clear face.

COMMON WHITE PINE FLOORING. Common white pine flooring shall be of the width and thickness of first and second clear flooring, and may have three knots then sap equal to 2 inches on one side, and shall be free from rot, splits, and shakes. Four-inch flooring strips, equal in quality to first and second clear flooring, shall be classed as common 6-inch flooring.

COMMON PINE LUMBER. Common pine lumber includes all boards, planks, joists, scantling, timber, fencing and 1-inch strips, that are of a generally sound character, well manufactured, and not included in the foregoing qualities. Boards should be square-edged, full thickness, and free from large loose knots or bad shakes. In wide boards, 12 inches and over, will allow a straight split one-sixth the length of the piece, when otherwise sound. Fencing should be of good sound character—pieces that will not break easily, 6 inches wide and 1 inch thick. Scantling, joists, and timber should not have imperfections that would weaken the piece so that it can not be used for substantial building purposes, and uniform in width and thickness. Timber should be measured at the small end, and as much wane on the piece, reasonable allowance made for it. Norway pine lumber shall be classed as common lumber, unless otherwise agreed upon. Cargoes of piece stuff or timber containing over 25 per cent. Norway shall not be considered standard, and all edge boards and such lumber in cargoes of piece stuff shall be subject to special agreement.

All badly stained white pine lumber that is otherwise better than common shall be inspected into a lower grade than when bright and free from stain.

All lumber described in the foregoing rules of inspection shall not be less than 1 inch in thickness and not less than 12 feet long.

CULLS. A quality that can not be received into any of the foregoing, consisting of even lengths of 10 feet and upward, and so imperfect as not fit for ordinary uses without waste.

MILL CULLS. Refuse lumber.

All cargoes and under straight measure shall consist of lumber 12 feet and over; and where, by imperfection of manufacture, such lumber is reduced in grade so as not to answer the purpose for which it was intended, it shall be measured at only one-half the amount in the piece for which it was intended. And all pieces containing auger-holes, if 14 feet in length and over, and bored only at the ends, shall be measured in full, excluding 2 feet in the length of the piece; if bored in the center it shall be measured for only one-half the amount of lumber in the piece, but not less than 12 feet. Such contract has been made shall be measured in even lengths. Mill culls excluded in all cases. All boards and strips to be at least 1 inch thick; joists and scantling 2 or 3 inches thick.

SHINGLES. All pine and cedar shingles shall be not less than 16 inches in length and 3/4 inch thick at the butt, and shall be classed and known as follows: The first grade is to be denominated clear, and to consist of shingles not less than 3 inches in width, and to be absolutely free from all defects. The second grade is to be denominated extra A, and this shall consist of shingles not less than 3 inches wide, and with the butts clear for 10 inches of the length. The third grade is to be denominated standard A, and not to be less than 3 inches clear from the butt, and not less than 3 inches wide. The fourth grade is to be denominated shaded A, the shingles to be clear for a distance of not less than 5 inches from the butt. The fifth grade is to be denominated No. 1, and to include everything poorer than shaded A, but to be made of sound timber with no unsound knots in the butt. Culls are a quality manufactured from winding, worm-eaten, shaky, or dry rot timber, badly manufactured, or less than 16 inches in length. It is recommended that quarter-thousand bunches be packed in bands 20 inches in length, with twenty-five courses; half-thousand bunches in 35-inch bands, with forty courses. Shingles shall always be full count, and pay shall be collected only for the number of shingles actually delivered, regardless of the pretended number contained in each package. If delivered in even lengths, there shall be no culls in every lot of 1,000 shingles the equivalent of 1,000 pieces 4 inches wide.

LATH. No. 1, should be 4 feet (no more, no less) in length, not less than 3/4 inch thick and 1 1/2 inches wide, free from shakes, rot, wane, or worm-holes. No. 2, same length as No. 1, may be less than 3/4 inch thick, and must be not less than 1 1/4 inches wide, will admit of wane and worm-holes not to exceed ten pieces in a bundle of 100. Cull, all that will not pass in the above-named qualities.

INSTRUCTIONS TO INSPECTORS AND MEASURERS.

It is understood that where the term strips is used in the sale of cargoes the said strips shall be 6 inches wide, unless otherwise specified. All tapering pieces of lumber to be measured one-third the distance from the narrow end, when 12 inches and over in width at the center, and when less than 12 inches wide in center, to be measured at the narrow end; all lumber to be measured in even lengths (except culs), from 12 to 30 feet inclusive in length, and above that length timber shall be counted for what it will measure.

Culls commence 6 feet in length, and then measure the same as other qualities. Manufacture should be taken into consideration in all qualities, and if badly manufactured should reduce the grade.

Pieces of lumber that have auger-holes near the ends should be measured for lengths between the holes, if 12 feet and over, and what it so measures to be called in its proper quality; if auger-holes in the center as well as at the ends, should go into culls and be measured full.

Inspectors and measurers are instructed that the rule herein given, as to width and thickness, is the standard width and thickness for merchantable lumber of each grade. But when some slight deviation, either in width or thickness, should occur by accidental manufacture, so long as it will not hinder the lumber from being used for the purpose for which it was intended, such lumber shall not be reduced in grade on account of such deviation—fit being the purpose of the foregoing rules of inspection to grade lumber so that the grades sold on the lumber market and out of the yards shall be the same.

Inspectors and measurers inspecting or measuring any cargo of lumber shall have full control of the unloading of the lumber, so far as determining how fast the lumber shall be delivered off the vessel.

In no case shall mill culls be considered a quality for the purpose of increasing the inspection fees.

Inspectors shall be required to draw six shingles from each end of each half-thousand bunch, and three shingles from each end of each quarter-thousand bunch, and to put their brand on each bunch.

After the chief inspector or measurer has received his instructions from both buyer and seller, given together, no attention shall be paid to any different instruction or suggestion from either party, given singly.

When either inspector or measurer has been ordered on a cargo of lumber, and they should be delayed in doing the work, either from want of dock or any other cause that might have been avoided by either buyer or seller, then in that case the actual damages arising from such delay shall be added to the fees for measuring or inspecting such lumber.

All inspectors who inspect lumber by grades under the foregoing rules in this market, shall mark the quality upon all lumber so inspected when required.

Inspectors or measurers shall call out in quantities of not over 60 feet (in ordinary cases), and be answered back by their deputies distinctly.

No journeyman inspector or measurer, or any other person licensed by the Lumbermen's Exchange of Chicago for the purpose of inspecting or measuring lumber, shall be directly or indirectly interested in the business of buying or selling lumber, either for himself or other parties; nor shall any one so licensed by this Exchange receive other than customary compensation for inspecting or measuring such lumber; and no person shall, directly or indirectly, offer to such journeyman inspector or measurer, or other persons licensed by this Exchange, any sum of money or gratuity other than the fees established by the Chicago Lumber Market.

The chief inspector shall keep the original tally sheets, with date, name of vessel, names of buyer and seller, and the names of inspectors or measurers and tallyman, at their offices for at least one year, and the said tally sheet shall at all times be accessible to any of the parties interested therein.

Chief inspectors or measurers are required to include the entire cargo in their certificate, including lumber, lath, shingles, posts, etc.

CINCINNATI.

Adopted by the Lumbermen's Exchange, January 14, 1888.

HARDWOOD.

In hardwood inspection the inspector should use his best judgment, based upon the general rules laid down for his guidance. He should inspect all boards and plank on the poorest side. The standard knot is to be considered as not to exceed 1 1/4 inches in diameter and of sound character. Splits are not to exceed the width of the piece in firsts, and twice the length of the width of the piece in seconds, and not more than 25 per cent. can be split.

All lumber shall be sawed thick enough to meet the required thickness when seasoned.

All lumber must be sawed square-edged, unless otherwise ordered, and boards or plank having bark or wane must be reduced one grade, and measured inside the bark or wane.

All boards 1 inch and under in thickness shall be measured face measure. If sawed scant 1 inch, shall be reduced to next standard thickness.

All badly manufactured lumber shall be classed as culls. No cull is considered as having a marketable value which will not work one-half its size without waste.

Tapering lumber shall be measured one-third its length from the narrow end.

Lumber sawed for specific purposes must be inspected with a view to the adaptability of the piece for the intended use, as in many cases it can not be utilized for other purposes.

In the inspection of combined grades of firsts and seconds, an undue predominance of seconds should always be ascertained, as the purchaser is entitled to full average in quality.

Combined "firsts and seconds," as a grade is understood to mean 65 per cent. firsts and 35 per cent. seconds, unless otherwise stated hereinafter.

Standard lengths are 10, 12, 14, and 16 feet, but shorter than 10 feet does not come within the range of marketable, although sometimes admitted.

In walnut and cherry, 10 per cent. of 8-foot lengths may be admitted in firsts and seconds, and 6 feet long in lower grade.

Mill culls are never recognized as marketable, and all culls which will not work without wasting more than one-half is a mill cull, and shall be so reported on certificates.

Table legs, crib posts, and chair legs should be cut outside the heart to insure the proper size; hearts in all varieties of lumber are excluded from all grades above culls.

It is important that all lumber should be parallel in width, square edge and square ends.

Thickness of hardwood shall be recognized as 1, 1 1/4, 1 1/2, 2, 2 1/4, 3, 4, and 5 inches.

Poplar, or whitewood, marketable thickness, shall be 5/8, 3/4, 1, 1 1/4, 1 1/2, 2, 2 1/4, 3, and 4 inches.

Worm-holes are to be considered one of the most serious defects in lumber.

Measurers and inspectors shall inspect each board or plank full face measure, and in no case shall a board or plank be cut in length or width to make its grade.

It shall be the duty of each measurer or inspector to ascertain the true and full contents of each and every piece of lumber or stick in each car or lot of lumber measured, and keep a correct piece tally of the same in a plain, legible account in a tally-book, and his certificates of inspection must contain correct report of number of pieces in each grade, and the total number of feet in each grade; and the records of the General Inspector, or any of his deputies, shall at all times be open to the inspection of members of this Exchange.

All applications for inspection shall be made to the General Inspector, and all inspections made by his deputies shall be under his direction.

He shall, by himself or his deputies, inspect and measure all lumber brought into this market, and make when a piece is made therefore by him, the purchaser or seller, and he shall enforce all the rules of this Exchange.

If a measurer or inspector is guilty of or connives at a fraud or deceit in inspecting, marking, or numbering, as to contents or quality of any kind of lumber, or if such inspector, when requested by the owner or dealer in lumber to inspect the same, refuses without good reasons to perform the duty, he shall forfeit for each offense not less than \$50 nor more than \$100.

If a seller or purchaser of lumber, being a member of this Exchange, attempts to induce an inspector to make a false inspection, he shall forfeit for each offense not less than \$50 nor more than \$100.

WALNUT. Walnut lumber shall be graded as firsts, seconds, rejects, and culls. Firsts and seconds may be combined in one grade, to be designated "firsts and seconds." The combined grades of firsts and seconds shall consist of 50 per cent. of firsts and 50 per cent. of seconds, unless otherwise stated. Standard lengths are 10, 12, 14, and 16 feet, admitting 10 per cent. of 8 and 10 foot lengths—8-foot lengths, 12 inches wide, to be clear and graded as firsts; 12 to 15 inches wide must be clear and graded as seconds. Firsts, or No. 1 grade, shall be 8 inches and over in width, and 12 feet and over in length; 8 to 11 inches wide must be clear on both sides and free from all defects; 12 to 15 inches wide, 10 feet long, will admit of bright sap on one side, not exceeding 1 inch in width, and only on one edge, or one standard knot, showing only on one side, and must be close to the edge or end of the board; 16 to 20 inches wide and over will admit bright sap on one side, not exceeding 2 inches in width, and two standard knots, showing only on one side, and must be near the edge or end of the board. Checks on ends shall be deemed a defect, and shall not exceed 12 inches in length. Seconds, or No. 2 grade, are to be 6 inches and over in width, 10 feet and over in length; 6 and 7 inches wide shall be clear; 8 to 10 inches wide will admit one standard knot, or equal defects; 11 to 15 inches wide will admit two standard knots, or equal defects; 16 inches and over wide will admit of three standard knots, or equal defects. In any case over 8 inches not more than one-fifth of the surface of one side shall be sappy, and the piece shall be without other defects. Both the above grades must be entirely free from wormy wood, worm-holes, wind shakes, etc., or rot. Rejects are 4 inches and over in width, 8 feet and over in length; 4 and 5 inches must be clear on both sides; 6 to 7 inches wide must be clear on face. Over 7 inches wide shall include all lumber not equal to a grade of seconds, but available at full three-fourths of its size for use without waste. Heart boards or plank not admitted; all worm-holes on one edge or end of board 12 inches and over wide, with no other defects, such as sap and knots, will be admitted.

Culls shall include any width and all lumber not up to the standard of firsts, in which not less than one-half the piece is fit for use without waste. All other than as above stated shall be classed as mill culls. Marketable thickness shall be 5/8, 3/4, 1, 1 1/4, 1 1/2, 2, 2 1/4, 3, and 4 inches.

CHERRY AND SWEET GUM shall be graded the same as walnut. Gum spots on cherry shall be deemed a serious defect, and if excessive shall lower the piece one or two grades.

POPLAR (WHITEWOOD). Grades, firsts, seconds, common, and culls. Firsts are to be 10 inches and over in width; 10 to 12 inches wide shall be clear and sound; 13 to 15 inches wide will admit 1 inch of bright sap, showing only on one side; 16 to 20 inches wide will admit 2 inches of bright sap, showing only on one side, or one standard knot, showing only on one side. Seconds are to be 8 inches and over in width; 8 inches wide shall be clear; 9 to 12 inches wide will admit 2 inches of bright sap, or one standard knot; 13 to 15 inches wide will admit 3 inches of bright sap, or two standard knots; 16 to 20 inches will admit 4 inches of bright sap, or three standard knots. Common is to be 5 inches and over in width; 5 and 6 inches wide shall be clear; 7 inches and over in width include all lumber not equal to the grade of seconds, two-thirds of each piece being merchantable, or will admit of one-third the surface discolored sap, or all bright sap-boards, when otherwise free from defects. Culls include all lumber not equal to the grade of common, one-half of each piece being merchantable. Other than as above stated shall be classed as mill culls.

OAK (PLAIN). In this grade shall be included firsts, seconds, and culls. Firsts are to be 10 inches and over in width; 10 to 12 inches wide shall be clear; 13 to 15 inches wide will admit one standard knot, showing only on one side; 16 to 20 inches wide will admit two standard knots, showing only on one side; 11/2 sap admitted on one side, not to exceed one-tenth of the surface, if without other defects; worm-holes not admitted. Seconds are to be 8 inches and over in width; 8 to 12 inches wide will admit one standard knot; 13 to 15 inches wide will admit two standard knots; 16 inches wide and over will admit three standard knots and live sap admitted on one side, not to exceed one-fifth of the surface, if without other defects. Culls include all lumber not equal to the grade of seconds, one-half of each piece being merchantable. Other than as above stated shall be classed as mill culls.

QUARTERED OAK is graded as firsts and seconds. Firsts are to be 6 inches and over in width; 6 to 9 inches wide shall be clear; 10 inches and over in width will admit one standard knot, showing only on one side, or equal defect. (Equal defect means sap or splits.) Seconds are to be 5 inches and over in width; 6 to 9 inches wide will admit one standard knot, or sap 1 1/2 inches, or split 10 inches; 10 inches and over in width will admit two standard knots, or 2 to 2 1/2 inches sap, or split 12 inches; 4 to 5 inches wide shall be clear on one side. Culls same as walnut. (See walnut culls description.)

CHESTNUT AND BUTTERNUT shall be graded same as oak.

HICKORY shall be classed as boards, plank, and axles. Boards and plank shall be inspected as firsts and seconds in one grade, and must not be less than 4 inches wide. Firsts and seconds must be clear; 8 to 10 inches wide may have one standard knot, or a split not over 10 inches long; 10 to 12 inches may have two standard knots, or a split not over 12 inches long; 12 to 15 inches may have three to four standard knots, owing to width of board, or splits not to exceed 12 inches at one or both ends; all boards 15 inches and over may have four to five standard knots, or two splits not to exceed 12 inches long. Sap will be admitted in the above grade, but it must be bright, sound, and free from defects. Culls shall include any width, and all lumber not up to the grade of firsts and seconds, in which not less than one-half the piece will work without waste. Axles must be clear and of tough timber.

WHITE AND BLACK ASH. White and black ash should be in lengths of 12, 14, and 16 feet. The usual thicknesses are 1, 1 1/4, 1 1/2, 2, 2 1/4, 3, 3 1/2, 4, and 5 inches, and is inspected in the market as firsts, seconds, and culls. Firsts must be not less than 8 inches wide, and free from all defects up to 10 inches; when 12 inches and over wide will admit of one or two small defects, and a split of not over 15 inches will be allowed; if over 15 inches, will reduce lumber one grade, and if in each end, will reduce it two grades. Sap is not considered a material injury if bright and in good condition. Seconds must be not less than 6 inches wide; at 6 inches must be free from all defects; at 10 inches may have from one to three standard sound knots. Defects may increase with width of board, must be free from heart, dry rot, dead or doty timber. Defective sawing will reduce a board or plank to the next grade below. Culls, any width or length, in which not less than one-half is fit for use without waste.

MAPLE graded same as ash.

BIRCH graded same as ash.

SYCAMORE graded same as ash.

LOUISVILLE.

Adopted by the Lumbermen's Exchange, May 7, 1888.

INSTRUCTIONS. It is impossible to make rules that will govern every piece of lumber, there being no two pieces of lumber exactly alike; it is therefore expected that the inspector shall be a person of experience and use his best judgment, based upon the general rules given, making no allowance for the purpose of raising or lowering the grades of a piece.

The inspector must not favor either the buyer or seller, but take lumber as he finds it, and pass upon each piece to the grade to which it belongs. Inspectors should examine all lumber on the poorest side, including flooring. All lumber must be measured in even lengths, excepting stock that is cut to order for special purposes, when it shall be measured for the full contents. Bark or waxy pieces shall be measured inside the bark or wane. All tapering pieces will be measured one-third the length of the piece from the small end.

All badly cut or mis-sawed lumber shall be classed as cull, or placed one grade below what it would be if properly manufactured. All lumber shall be sawed thick enough to meet the required thickness when seasoned. Lumber sawed for newels, columns, balusters, axles, or other specific purposes, must be inspected with a view of the intended use of the piece and the adaptability for that purpose, as in most cases it can not be utilized for other purposes. In the inspection of the combined grade of firsts and seconds, it will be the duty of the inspector to see that an undue amount of seconds do not appear. Heart pieces are excluded from all grades above culls. Worm-holes and worm-eaten lumber are serious defects. Gum spots in cherry is a defect, and if excessive will lower the piece one or two grades. Warped, twisted, flood-stained, stick-rotten lumber shall either be classed as cull or mill cull and refuse.

The standard lengths of poplar to be 12, 14, and 16 feet, admitting 10 per cent. of 10-foot lengths; walnut and cherry, 10, 12, 14, and 16 feet lengths, admitting 10 per cent. of 8-foot, 8-foot to be admitted as No. 1 must be 12 inches wide and over; No. 2 grade as No. 2, 8 inches wide and upward.

A standard knot must not exceed 1 1/4 inches diameter, and must be sound. Log-run shall be the unpecked rim of the log, mill cull out. Lumber sold on grade, and without special contract, will be measured according to these rules. The inspector will be required to keep a correct copy of all measurements, and give duplicate of same to both buyer and seller.

HARDWOODS.

BLACK WALNUT. Combined grade of firsts and seconds, rejects and shipping culls. Firsts, from 8 to 10 inches, shall be clear of all defects; 10 to 16 inches wide may have 1/2 inches bright sap, or one standard knot; 16 inches wide and upward may have 2 inches bright sap, or two standard knots, showing on one side only. Seconds, 6 inches wide and upward, must be clear at 7 inches; at 8 inches, at 10 inches will admit of 1/2 inches sap, or two standard knots; 10 to 16 inches wide will admit of 2 inches sap, or two standard knots; 16 inches wide and upward may have

3 inches sap, or three standard knots; 12 inches wide and upward will admit of a split, if a eighth the length of the piece, provided the piece be equal to firsts in all respects. Not over 10 per cent. of seconds will be taken with splits of the above character. Defects: 5 inches wide and upward, at 7 inches may have 1 inch sap, or one standard knot; 7 to 12 inches wide may have 2 inches sap, or two sound knots; 12 to 18 inches wide may have 4 inches sap, or four sound knots; above 18 inches, may have 5 inches bright, sound sap. Shipping cull will include all lumber not equal to the above, that will average and work two-thirds its width and length.

CHERRY AND BUTTERNUT (or white walnut) will be graded and inspected according to the rules given for black walnut, with the exception of gum sickness in cherry. (See instructions.)

POPULAR. Will include the combined grade of firsts and seconds. No. 1 common. No. 2 common, or shipping cull. The combined grade of firsts and seconds shall not be less than 65 per cent. of No. 1. No. 1 shall be 20 inches wide and upward and clear of all defects at 12 inches; 12 to 15 inches may have 1½ inches bright sap, or one standard knot, showing on one side only; 15 to 18 inches may have 2 inches sap; 18 inches and upward may have 3 inches sap, or two standard knots, showing on one side only. Seconds, 5 inches wide and upward, clear of all defects at 9 inches; at 10 inches wide may have one standard knot, or a split not over 12 inches long; 15 to 18 inches wide may have two standard knots, or 3 inches bright sap; 18 to 20 inches may have three standard knots, or 4 inches bright, sound sap. No. 1 common shall be in length not over 12 feet, and clear sap not a defect in this grade; 8 to 12 inches wide may have three standard knots; 12 to 16 inches wide, four standard knots; 16 to 24 inches, five standard knots, or may have straight heart crack not showing over one-fourth the length of the piece, if it have no other defect excepting bright sap. No. 2 common, or shipping cull, will include lumber with more defects than the No. 1 common. Pieces will be counted where two-thirds of the piece will be available to use for rough manufacture, including stained or other defects, with the exception of the following: Defect and rotten sap, and other lumber than as above named, will be classed as mill cull or refuse, and have no standard value. Six-inch weatherboard strips should be cut full width, and full 1¼ inches thick. No. 1 must be clear of all defects. No. 2 may have 1¼ inches bright, sound sap, showing on one side only, or two standard knots.

RED SWEET GUM will be inspected according to the rules governing popular, with the exception of sap over 12 inches wide and upward, a proportionate amount being allowed on pieces running from that down to 10 inches.

ASH, BEECH, COTTONWOOD, SUGAR MAPLE, SOFT OR WATER MAPLE, SYCAMORE, AND CHESTNUT will be inspected according to rules governing popular, with the exception of bright and sound sap, which will not be considered a defect.

PLAIN OAK. Firsts, 8 inches wide and upward, shall be clear at 12 inches; 12 to 15 inches wide will admit of one standard knot; 16 to 20 inches wide will admit of two standard knots, showing on one side only, or 2 inches sound sap. Seconds, 8 inches wide and upward; 8 to 12 inches wide will admit of two standard knots; 13 to 16 inches wide will admit of three standard knots; 15 to 18 inches will admit of 3 inches bright, sound sap. Cull and common oak will be inspected according to rules governing popular.

HICKORY inspection same as oak, excepting that bright, sound sap is not to be considered a defect, and firsts and seconds to be 6 inches wide and upward.

First and second RED ELM will be inspected according to rules given for oak.

QUARTERED OAK. Firsts and seconds: Firsts, to be 6 inches and over in width, must be clear at 8 inches; 8 to 12 inches will admit of one standard knot, showing on one side only, or an equal defect. Seconds, 5 inches and over in width; 5 to 9 inches will admit of one standard knot, or equal defect; 9 to 12 inches wide will admit of two standard knots, or equal defect.

NASHVILLE.

Adopted by the Lumberman's Exchange, April 10, 1884. Revised and corrected April 19, 1887.

TO INSPECTORS AND MEASURERS. It is understood that when the term strips is used the said strips shall be 6 inches in width, unless otherwise specified. All tapering pieces of lumber to be measured one-third the distance from the narrow end, when 12 inches and over in width at the center; and when less than 12 inches wide to be measured at the narrow end. All lumber to be measured in even lengths (except culls), from 12 to 30 feet inclusive in length. Above that length timber shall be counted for what it will measure.

Culls commence 10 feet in length, and then measure the same as other qualities. Manufacture should be taken into consideration in all qualities, and if badly manufactured should reduce the grade.

Inspectors and measurers are instructed that the rule herein given as to width and thickness is the standard width and thickness for merchantable lumber of each grade. In no case shall mill culls be considered a quality for the purpose of increasing the inspection fees.

HARDWOOD.

In hardwood inspection the inspector is instructed to use his best judgment, based upon the general rules laid down for his guidance. He must inspect all boards and plank on the poorest side, excepting in flooring. The standard knot is to be considered as not exceeding 1¼ inches in diameter, and of a sound character. Splits are always a greater or less damage to hardwood lumber, and will reduce a piece to one grade lower if the split is over 12 inches in length in boards and plank, or 6 inches in strips, but splits must be straight and in one end only to be allowed. All hardwood lumber should be sawed 1-16 inch plump. All lumber must be sawed square-edged, unless otherwise ordered, and boards and plank having bark or wane must be reduced one grade and measured inside wane or bark. All boards 1 inch and under thick shall be measured face measure. If sawed 1 inch scant, shall be reduced one grade; if under ¾ of an inch, reduced two grades. All badly mis-sawed lumber shall be classed as culls. A cull is considered as having a marketable value which will not work one-half its size without waste.

Lumber sawed for specific purposes must be inspected with a view to the adaptability of the piece for the intended use, as in many cases it can not be utilized for other purposes. In the inspection of combined grades of firsts and seconds, an undue predominance of seconds should always be judiciously ascertained, as the purchaser is entitled to the full average in quality, based upon the average mill run of the kind of timber involved.

Standard lengths are always recognized as being 12, 14, and 16 feet, but 10 per cent. of 10-foot lengths may be allowed. Shorter than 10 feet does not come within the range of marketable, although sometimes admitted. In black walnut and cherry an exception is made, and 10 feet is recognized as a standard length, and any cut of 8-foot lengths may be admitted in the firsts and seconds, and even 6 feet in lower grades. Mill culls are never recognized as marketable; and all culls which will not work to the use for which the timber or the size is applicable, without wasting more than one-half, is a mill cull, and shall be so reported on certificate.

Hickory should never be cut while the sap is rising, as it is then liable to powder-post, and indications of deterioration of this character should be carefully scrutinized by the inspector.

Merchantable includes only sound lumber, free from rot, shake, and unsound hearts; hearts in nearly all varieties of lumber are to be excluded from all grades above culls.

It is important that all lumber should be parallel in width, square-edged, and with square ends.

In poplar or whitewood marketable thickness shall be recognized as 5½, 4½, 1½, 1½, 2, 2½, 3, and 1 inches; 1½, 5, and 6 inches are classed as special sizes. When squared, the sizes shall be 4x4, 5x5, 6x6, 7x7, 8x8, 9x9, and 10x10, and shall be sawed ¼ inch plump.

Worm-holes are to be considered as one of the most serious defects in hardwood lumber.

DRESSED LUMBER. All dressed lumber, such as weatherboards or siding, ceiling, flooring, moulding, etc., shall be measured full width as ripped to second clear.

POPULAR OR WHITEWOOD. Inspection grades shall be known as clear, second clear, common, and culls. Clear must be 10 inches or more in width, and free from all defects. The square pieces are exempt from this rule only as to width. Second clear must not be less than 8 inches in width, and clear up to 10 inches. Boards or plank 10 to 12 inches wide may have one standard knot, but no other defects; or may have bright sap not over 3 inches in width in the square, and in other defects. Boards and plank 13 to 16 inches may have two standard knots and no other defects; or may have 4 inches bright sap, not to exceed 2½ inches on any one edge, and no other defects. Boards and plank 17 inches and over will allow 5 inches sap, not to exceed 3 inches on any one edge, or two standard knots, or 2 inches sap and one standard knot. The two grades above enumerated may be combined in one grade, to be designated "firsts and seconds." Combined grades of firsts and seconds shall consist of not less than 60 per cent. of firsts. Boards and plank 14 inches thick shall be 5 inches wide and over; 5½ inch thick shall be 12 inches wide and over. Common shall include any width not less than 7 inches, and will allow of bright or discolored sap and knots beyond those described in second clear. Two unsound standard knots will be allowed in this grade if over 12 inches wide, and straight splits shall not be considered a defect; otherwise lumber must be sound. Culls shall comprise all widths and sizes having more defects than have been listed in common, whether in the lumber or character of the knots, badly checked, and generally such lumber as is unfit for ordinary purposes without waste. "Box boards" is a special grade.

Poplar strips must be full 6 inches wide, 1 inch plump thick when dry, 12, 14, and 16 feet long. Clear shall be free of all defects. Second clear may have bright sap, and must be free of all other defects. Common shall embrace all sound strips with more defects than second clear, but shall include all unsound strips that will work to one-half their contents, and all tapering strips.

WHITE ASH. The inspection grades shall consist of firsts and seconds, and culls. Firsts and seconds must be 6 inches and over wide, 10 feet and over long, and clear up to 8 inches in width. Over 8 inches wide and up to 10 inches will allow one standard knot; 10 inches wide and over will allow two standard knots, but must be free of hearts and dry-rot. Culls include all defective lumber—heart-shaken, knots beyond standard, and defective sawing.

Wagon tongues must be cut from tough timber, straight, and free from all defects.

Flooring must have one face and two edges clear, and 4 to 7 inches wide, inclusive.

WHITE AND BURR OAK shall be inspected as firsts, seconds, common, and culls. Firsts must be 8 inches and over wide, and clear up to 10 inches; 10 to 12 inches will allow one defect, and defects may increase with the width. Seconds at 6 inches wide will allow one standard knot, or a little bright sap. No other defects shall be allowed in this grade, but their extent may increase with the size of the piece. A combined grade of firsts and seconds must not comprise more than 60 per cent. of seconds. Common must be free from heart-shake, but thick plank may contain sound hearts. All knots must be sound. Culls consist of bad-heart plank, wormy or generally unsound lumber.

Oak timber must be sound in all respects; sound knot and hearts not showing on the outside of the stick shall not be considered defects.

HICKORY. Hickory shall be classed as boards, plank, and axles. Boards and plank shall be inspected as firsts and seconds in one grade, and must not be less than 6 inches wide if less than 2 inches thick; this grade shall not admit of more than one or two standard knots, but no other imperfections. Axles must be free from all defects. Culls include all lumber not up to the preceding description. Wane is permitted in boards and plank.

BLACK WALNUT shall be inspected in three grades—firsts, seconds, and culls. Firsts shall not be less than 8 inches wide and 10 feet long, and may allow one standard knot or 1 inch bright sap on one side, or a check 10 inches long in a board that is 11 inches wide and over when dry. Seconds shall be free from heart, win-shake, and rot. All strips 6 and 7 inches wide, 10 feet and over long, must be straight and straight. Boards 10 and 11 inches wide, two defects, provided one is small; boards 12 to 16 inches wide, three defects, if two of them are small; and those 16 inches and over will allow three defects. All boards must have one black face. Boards 8 inches wide and over will admit of sap, but not more than one-third on sap side, and the sap shall be counted as a defect. A few worm-holes will be allowed in a second, but as it depends upon their location and the width of the board, it will be left to the inspector. Ten per cent. of the lumber may be 8 feet long, and graded the same as lumber of other lengths. Culls are all boards that do not come up to the above grades and will work one-half good. Mill culls are such lumber as is not included in above grades. All mis-cut boards are to be classed one grade below, and must be measured at the thinnest place. Common, or reject, is to be considered a special grade, quality to be decided between seller and buyer.

CHERRY shall be classified and graded the same as black walnut.

BUTTERNUT AND CHESTNUT. Butternut and chestnut shall be inspected in firsts and seconds and culls. Firsts and seconds must not be less than 6 inches wide, and clear up to 8 inches, but at 8 inches may have an inch of sap, or two standard knots; sap on the face side shall be measured out. Defects may increase with the width in proportion. Worm-holes are absolutely excluded from this grade. Culls include all lumber not up to the standard of seconds, but available, not less than one-half, to work without waste.

SWEET GUM. Sweet gum shall be inspected in grades of firsts and seconds and common. Firsts and seconds must not be less than 6 inches wide, and must be clear up to 10 inches; over 10 inches may have two standard knots. Sap is wholly excluded from this grade. Common shall include all lumber not up to the standard of firsts and seconds, in which not less than three-fourths of the piece is available for use without waste. Culls, worthless.

BASSWOOD, ELM, SYCAMORE, BEECH, ASP. COTTONWOOD. The above-named varieties of lumber shall be classified under an inspection of good and cull, and shall not be less than 6 inches in width. Good shall include all sound lumber free from shake and hearts. Standard knots from one to five in number do not condemn from this grade, in proportion to the width of the piece. Culls include all lumber not good enough for the preceding grade, but in which one-half the piece will work without waste.

YELLOW PINE shall be classed as clear, second clear, standard, and common. Clear must be 10 inches or more in width, and free from all defects. Second clear must be 8 inches or more wide, and bright sap not called a defect; will allow one or two small sound knots, not over ¾ inch in diameter, showing through, if free of other defects; face being clear, one narrow wane may be allowed. Standard is firsts and seconds classed together, 50 per cent. being firsts and seconds and 50 per cent. common. Common shall include all lumber poorer than that described as seconds, but free from shake, large unsound knots, or rot. Flooring strips shall be 3 to 6 inches wide, and be classed as first and second clear; 3 and 4 inches wide may have one sound knot not over ½ inch in diameter, and free of other defects. No strip in this class shall have knot on edge of piece. Bright sap shall not be classed as a defect, but blue stain excluded. Standard shall contain 50 per cent. firsts and seconds and 50 per cent. common. Common shall contain all sound strips below firsts and seconds. Knots large enough to weaken a strip will throw it into culls. Culls, all unsound

pieces, and all bled sap pieces. Timber and joists must be square edge, and have no defects that will impair the strength of the piece for the purpose intended.

RED CEDAR. Inspection grades shall consist of No. 1, common, and culls, both in regard to boards and dimension stuff. Sound knots in cedar not considered a defect. No. 1 must be full 6 inches wide and up, 8 to 16 feet long; will admit $\frac{1}{2}$ inch of sap on each edge of one face; one face must be red, free from all splits and checks, any thickness from 1 to 2 inches, evenly sawed. Common will admit of boards 4 inches wide and up, 6 to 16 feet long, one sap face, with sound knots, checks and splits not exceeding 12 inches clear of wane edges. Culls will include all boards not good enough for preceding grades, but in which one-third of a piece will work without waste. Dimension stuff—No. 1 will include all sizes from 2x4 up, not less than 6 feet in length, and will admit of $\frac{1}{2}$ inch sap on each face in sizes 6 inches square and over; a $\frac{1}{2}$ inch hollow in one end shall not be considered any defect; otherwise must be sound and perfect. Common will in no wise differ from No. 1, except that sap will be considered no defect, and will admit of small hollow in each end without regard to size; otherwise sound and perfect. All pieces that do not come up to the above grades will be considered culls.

NEW ORLEANS.

Adopted by the Mechanics', Dealers', and Lumberman's Exchange.

LOGS, TIMBER, AND HARDWOODS.

The following rules are to govern in all cases when agreements have not been made otherwise, and in all such cases written instructions must be given to inspectors.

LOGS. Logs, in or out of water, to be measured with hooks which shall not be less than 2 and no more than 3 inches crook. The sticks or iron handles of hooks to be distinctly marked and painted in inches on two sides. The measurement shall be as follows: Length of logs measured to square butt of log, fractions of a foot not to be allowed. If with pins at the ends, length to be measured inside of one of the pins, allowing the other, if so placed as to be not farther than 1 foot from the end. Diameters taken at small end, and inside of the bark; no fractional part of an inch to be allowed. Contents to be calculated by what is generally termed the two-thirds rule.

The above rule of measurement shall govern the following named timbers: Ash, cottonwood, cypress, pine, poplar, oak, and walnut.

SQUARE AND WANE LOGS. In or out of the water, to be measured with callipers at the middle of the logs, allowing for saw kerf of 2 inches on two sides of logs, and if wane an additional deduction proportional to wane. Lengths of logs, if without pins, to be taken to the square butt; if with pins or pin-holes, length to be measured inside of same when placed at 6 inches from ends; fractions of feet not to be counted. Full allowance shall be made and deducted from measurement of timber for extra pins, bad knots, crooks, or any other faults. Certificate of inspection to call only for the net measurement, but tally-books of inspectors to show the allowances made, for reference when necessary.

DOMESTIC SAW LOGS. Logs shall be measured out of the water; fractions of feet or inches not to be allowed in taking lengths, and full contents without deductions to be given in certificate of inspection. All questions in regard to pins, wane, or other faults to be determined and regulated by the class of timber inspected according to adopted rule and standard.

CABINET AND FURNITURE TIMBER, whether foreign or domestic, shall be measured by special rules given hereafter, when speaking of their different kinds.

FLITCH of all kinds to be measured at the narrowest place, and inside the sap.

LOGS FOR EXPORT, of domestic timber, losing one-half of their measurement for faults, shall be rejected from cargoes, and can not, under any circumstances, be branded as inspected, even when admitted by private agreement.

STRING MEASUREMENT. Give the log, and one-quarter of said girth shall be considered as one-fourth of its finished square, to be multiplied by itself and by the length, and divided as usual when working contents of squared logs. All timber measured string measurement shall be reckoned in cubic feet. Fractions of feet in length will not be allowed. Deductions for defects in timber shall be made from lengths, and if necessary in fractions of feet. Certificates of string measurement shall only give the net measurement of logs, but inspector's tally-book shall show deductions made for faults.

OCTAGON LOGS, or logs having more than four faces, shall be measured at small end by string measurement rules.

FREIGHT MEASUREMENT. Straight timber, whether square or octagon, shall be measured at extreme length and with callipers where their sides are larger, the same if crooked, flae to be drawn from crook to extreme lengths, being the chord of the arch of crooks or bends, thus shaping it to a perfect square log. Round logs shall be measured for freight by string measurement rule, girthing the log at its least circumference. Diameters taken at small end, and inside of the bark to be received, unless by special agreement, and will and must remain unclassified. All that are not within said classifications are to be called rejected, and can not be branded as inspected, although by special contract it may be accepted by the purchaser.

CLASSIFICATION OF ROUND LOGS.

CYPRESS. In round logs, when pecky at one end, 10 feet of the length of each log so conditioned shall be deducted as compensation for such faults, and if pecky at both ends another 10 feet in length shall be deducted. Lengths of less than 10 feet shall not be accepted as a log.

POPULAR AND COTTONWOOD. In round logs, must measure 26 inches in diameter inside of the bark to be received, and 12 inches to be received at inspection. No smaller sizes shall be received when inspected, unless by special agreement, and will and must remain unclassified.

BLACK WALNUT. None shall be received as merchantable having less than 20 inches diameter inside of the bark, and less than 10 feet in length. Smaller dimensions may be accepted by special agreement, but will and must remain unclassified.

CHERRY AND MAPLE. To be received as merchantable, must not be less than 10 feet long and 12 inches in diameter inside of the bark, though other dimensions may be received when measuring by private agreement.

WHITE OAK, to be accepted as merchantable, must not be less than 21 inches in diameter inside of the bark and 20 feet in length. Smaller dimensions are not entitled to be classed, but may be received by private contract.

ASH, to be accepted as merchantable, if intended for sawing and manufacturing purposes, must not be less than 20 feet in length and 20 inches in diameter, though if for other purposes smaller timber may be accepted by private contract, but must not be classed.

INSPECTOR'S RULES.

Cargo lots of domestic timber or lumber must average the medium grade or classification of their different kinds, unless differently agreed upon by private contract, and the inspector must have authority and discretion when allowing for faults, exercising said discretion to the best of his skill and experience. In case of a doubt in the inspector's mind he must allow to the utmost of his judgment.

Certificates must be plainly written on printed forms suitable for each kind of inspection, and must have a complete and full detail of the measurement of each log or piece of lumber according to these rules. Cabinet and furniture timber certificates, whether foreign or domestic, must have a column of remarks, wherein the defects of timber shall be mentioned, that

the percentage of allowances may be easily ascertained both by vendor and purchaser.

In all cases of inspection or measurement of timber and lumber where the same has been made according to special agreement, and which deviates from the established rules, the certificate of inspection must mention the fact. All certificates must bear the signature of the inspector and seal of his office, and a copy of each certificate issued must be faithfully kept and recorded at his or their office.

RESURVEY AND REMEASUREMENT. All certificates of inspection and measurements of timber shall be considered good and binding to both vendor and purchaser during three months from date thereof; but a purchaser may ask a resurvey and remeasurement, and the cost of said inspection and measurement, moving material, etc., and all expenses attending to said resurvey, shall be borne by the party or parties ordering the same, as he or they are the real beneficiaries.

TIMBER AND LUMBER.

WHITE OAK. Measurement as by preceding rules given for measurement of timber and lumber.

TIMBER. Classification of timber shall be No. 1, No. 2, and No. 3. No. 1 to be from the body of the tree, 30 to 50 feet long and upward, and from 19 to 30 inches and upward square; to be square-buted with saw, straight-grained, free from heart, rot, worm-holes, large or unsound knots, splits, checks, shakes, frost or sun cracks; good sound sap allowed on one corner, not exceeding 1 inch to every 12 inches in width. When hewn, shall be free from spails and ax-scors, and not tapering over 1 1/2 inches for every 15 feet in length; must be hewed or sawed to perfect square, and no wane allowed; pins permitted if they should be the only defect, provided the same be found only at 6 inches from the end, and on one side only, but none of the middle or two sides. No. 2 to be of the same length and square, but to be square-edged with saw, and evenly sawed, width to be from 30 to 14 inches square; to be of the same taper and manufacture as classes No. 1 and No. 2; sap permitted on three corners, but not to exceed in each corner 1 inch for every 12 inches width of piece; to be free from large or unsound knots and worm-holes; wind or other shakes allowed at one end only, or decay at one end, provided shakes or decay will not exceed one-tenth of diameter of the piece and one-fifteenth of its length. Wane may be allowed, but must not exceed 2 inches to perfect square of stick.

LUMBER. No. 1, to be of the same length and square, shall be sound, square-edged, butted with saw, and evenly sawed, width to be from 30 to 14 inches and upward, thickness from 1/2 to 8 inches; lengths to be from 25 to 50 feet and upward; entirely free from splits, checks, large or unsound knots, pins or pin-holes, and with not more than 1/4 of an inch of sound sap on one corner for every 20 inches in width. No. 2 shall be square-edged, butted with saw, and evenly sawed; width from 16 to 20 inches and upward, length from 20 to 50 feet and upward; entirely free from shakes, frost and sun cracks, splits, large or unsound knots, and worm-holes; thickness to be the same as No. 1; only two pins or pin-holes permitted at each end, at from 6 to 9 inches from the ends, and not more than 1 inch sound sap on two corners allowed for every 16 inches in width. No. 3 shall be square-edged, butted with saw, and evenly sawed; one heart-face on one side, and must show heart on at least two-thirds of the length of the other face; sap, however, must be sound; shall be free from through shakes or splits, and entirely free from large or unsound knots, pins or pin-holes, and shall be allowed in wane, frost, and sun cracks, and decay, allowed only on sap face, and must not be more than 2 inches in depth; lengths to be from 16 to 20 feet or more.

FLITCH shall be classified as above, but dimensions are to be taken as stated under the head of measurement.

ASH shall be measured and classed the same as white oak, and all specifications in each class of same shall apply to ash, but with the following exceptions, viz.: No. 1 can be 30 feet long and upward; No. 2 can be 18 feet long and upward; No. 3 can be 16 feet long and upward.

For furniture and export must be free from bluish veins, and must show close white grain, whether it be straight or curly.

BLACK WALNUT, CHERRY, and other woods of similar texture, and used for cabinet-work. Measurements as by preceding rules for measurement of timber and lumber.

TIMBER shall be in four classes—No. 1, No. 2, No. 3, and No. 4. No. 1 to be from the body of the tree, straight-grained, and from 18 feet and upward in length, and from 28 inches and upward square; to taper only 1/2 inch for every 12 feet in length; shall be square-buted with saw, free from all defects, making it suitable for best kind of work; wane allowed 1 1/2 inches to full square of piece for every 10 inches in width or depth; pins allowed if they are the only defect, provided they be only at ends and on one side, and not farther than 6 inches from ends. No. 2 to be from body of the tree, and to be in length the same as No. 1, with the same taper, and from 22 inches and upward square; shall be square-buted with saw, and from 22 inches and upward square; shall be free from shakes, frost and sun cracks, splits, large or unsound knots, heart or side rot, 1 1/2 inches for every 10 in width or depth allowed for wane and corresponding sap to same, also pins at both ends, but they must not be farther than 6 inches from each end. The timber shall also be free from splits not parallel to one face. No. 3 to be in lengths of 10 feet and upward, and 18 inches and upward square; taper and wane will be allowed as in class No. 2; shall be free from bad shakes, large or unsound knots and bad splits; pins allowed as in class No. 2, and splits at the ends, though not parallel to sides. No. 4—When losing one-third or more of its measurement as allowance for defects, shall be called No. 4, and will be considered unfit for shipment, unless differently stipulated in contract or sale.

Lumber shall be divided into three classes—No. 1, No. 2, and No. 3. No. 1 includes all boards, plank, and joists, free from rot, shakes, and nearly free from knots, sap, and bad taper; all pieces to be evenly sawed, square-buted, and square-edged; knots to be small and sound, and as few as possible for the best kind of work. A small split is allowable on one end of a board or plank, if not too long and is parallel to the edge of the piece. No. 2 must be square-edged and evenly sawed. This class includes all other descriptions of material manufactured, except when one-third is worthless—boards, plank, joist, or scantling containing sap, knots, splits, or not evenly sawed, when all these imperfections combined will make less than one-third of a piece, unfit for good work and as few as possible for the best kind of work. Boards, plank, joist, or scantling badly manufactured by being sawed in a diamond shape, smaller in one part than in another, splits on both ends, or with long splits or splits not parallel to edge, with large and bad knots, worm or pin holes, sap, rot, shakes, or any other imperfection which will cause any one piece of lumber to be one-third worthless or waste.

MAHOGANY AND CEDAR.

TIMBER. Certificates of inspection for mahogany or cedar shall show the gross and net measurement of each log.

MEASUREMENT. Timber shall be measured midway of logs with callipers for their gross measurement, and if wane or octagonal or other faults shall be noted, and a proportional deduction for such wane when entering the net measurement of same, in addition to the deduction stated hereafter. The gross measurement shall be entered as such in the inspector's tally-book. The gross inspected measurement when the log is perfect shall be brought without deduction to the net measurement, but if it show any faults a proportional deduction for same shall be made from the gross measurement, and the remainder shall constitute the net measurement. That which is defective from worm-holes in the heart, rots, rotten

knots, or are doughy or badly split, shall be measured full contents for gross measurement and called "refuse." All such refuse to be marked "R" by the inspector, and half of the gross measurement deducted for net measurement; all lengths to be taken as square butt of pieces and entered as usual, every six inches being called a full foot.

CROOKED. If slightly crooked a deduction shall be made from gross measurement for such faults, and if very crooked, particularly if there is more than one crook, and short, the measurement shall be as governs "refuses" in above article, and shall be marked as such.

SMALL CROTCHES. Such as received from St. Domingo, shall be measured as follows: If the crotch is taken as sap or gray wood at the upper end, allowing the same as for timber in gross measurement. When sound the gross measurement shall be brought over as net, but those having bark or rotten defects tending to injure the crotch will be measured as refuses in timber and marked as such.

CANNON LOGS to be made straight one way and subject to same allowances as the crotches.

CLASSIFICATIONS shall be in four classes, viz.: Nos. 1, 2, 3, and 4. No. 1 cedar must be straight-grained, free from knots and every other defect, shall be manufactured straight and even, but may be hewed or sawed, and ought to be square-butt with saw before shipment, as all slant-heads shall be deducted from gross to sale measurement—that is to perfect square; shall be from 12 feet and upward in length, and 18 inches and upward square. Wane of three-fourths of 1 inch to perfect square will be permitted, but must be deducted from gross to net measurement. No. 1 mahogany will correspond to above specifications, but may be curly or cross-grained, and must be 12 feet and upward in length, and 20 inches and upward square. No. 2 cedar must be straight-grained and free from large knots—small ones, if sound, admissible; shall be manufactured as in class No. 1; wormy sap not objectionable if wormholes do not go through to body of the wood, and a wane of 2 inches to perfect square permissible; also rotten or decayed heart, not exceeding one-eighth of an inch. Split not over 6 inches for every 10 feet of the length, and sun-checks not over 2 inches deep on any one face are also permitted, but shall be deducted from the gross to the net or sale measurement. Lengths to be 10 feet or more, and 16 inches or more square. No. 2 mahogany shall correspond to all the above specifications, but may be cross-grained, curly, and have large knots if sound; shall be 10 feet or more in length, and 18 inches or more square. No. 3 cedar may be manufactured somewhat crooked, but must be square-butt with saw as explained in class 2. Can be crooked, waxy, sappy, wormy, split, sun-checked, and have rotten heads and knots large or small, provided the loss shall not be more than one-third from the gross to the net measurement for these defects. Lengths to be 9 feet or more, and 14 inches or more square. Wood may be curly and cross-grained. No. 3 mahogany shall correspond to all the above specifications governing cedar. No. 4 cedar and mahogany will embrace all other descriptions which are not covered by the foregoing, but shall not be more than one-third but not over one-half from gross to net measurement, provided lengths shall not be less than 9 feet, and square at least 12 inches.

LUMBER.

MAHOGANY LUMBER shall be put in three classes—Nos. 1, 2, and 3. No. 1 includes all boards, planks, joists, which shall be evenly sawed, free from sap, rot, shakes, or splits, knots, if any, to be small and sound, and free from any fault which may cause waste for the best kind of work. Boards or plank shall not be less than 8 inches in width and 8 feet long. Counter-tops shall be 1, 1½, 1¾, and 2 inches thick, 20 inches and upward in width, 12 feet and over long, and shall be perfect boards. No. 2 to be manufactured as in class 1; splits parallel to the edge of the piece permitted if they do not exceed 6 inches long for every 10 feet in length of the piece. The width of piece, and length, shall not be less than 6 feet and 12 inches, and all other description of boards, plank, and joists, provided all the imperfections combined in any one piece shall not make one-third of the measurement; when they do, the piece shall be rejected and not entitled to classification.

YELLOW PINE.

SAWN TIMBER. Sawn timber shall be put in three classes, which will be designated as follows: Nos. 1, 2, and 3. No. 1 must be sound, square-edged, and butt square; must not have more than 1 inch of sap on corners, and free from shakes which show on surface; sizes 10 x 10 and up. No. 2 must be sound and butt square; show heart on each face, and may show places of wane not to exceed 4 feet in length, and not more than three places of wane on any one corner; sizes 10 x 10 and up. No. 3 must be sound and butt square, not more than 3 inches width of wane on a corner, and need not show heart on sides; sizes 10 x 10 and up.

DEALS. Deals shall be put in three classes and designated as follows: Nos. 1, 2, and 3. No. 1 must be sound, square-edged and square-butt, all heart with one exception, an inch of sap on one corner, free from knots exceeding 1½ inches in diameter, and not more than two knots in one piece, entirely free from shakes and splits, 9 inches and upward in width, 3 inches and upward in thickness, and 12 feet and upward in length. No. 2 shall be sound, square-edged and square-butt, one heart-face, two-thirds heart in opposite face, comparatively free of shakes and splits, entirely free of unsound knots, 9 inches wide and upward, by 3 inches thick and upward, and 12 feet long and upward. No. 3 must be sound, square-edged and square-butt, one heart-face and two-thirds heart on other face, and free from through shakes, splits, and unsound knots, 3 inches thick and upward by 9 inches wide and upward, 12 feet long and upward.

PLANK. Plank shall be put in three classes, viz.: Nos. 1, 2, and 3. No. 1 must be sound, evenly sawn, free from sap, knots, shakes, and splits. No. 2 must be sound, evenly sawn, one heart-face, two-thirds heart on other face, comparatively free from shakes and splits, and entirely free from unsound knots. No. 3 must be sound, evenly sawn, not over 2 inches of sap on heart-face, free from through shakes and splits and unsound knots, 1½ to 4 inches thick, 10 inches and upward wide, 12 feet and upward in length.

SCANTLING. Scantling shall be put in three classes, viz.: Nos. 1, 2, and 3. No. 1 must be sound, evenly sawn, free from sap, through shakes, splits, and knots exceeding 1 inch in diameter, 12 feet and upward in length; sizes 2 x 4 to 9 x 9 inclusive. No. 2 must be sound, evenly sawn, free from through shakes and splits, not to show more than 1 inch of sap on corners. No. 3 must be sound, evenly sawn, free from through shakes and splits, free from floorings.

FLOORING. Flooring shall be 1½ and 1¾ inches thick and from 3½ to 7 inches wide, 12 feet and upward in length, and shall be of three classes. No. 1 must be sound, free from knots, shakes, splits, and sap, and sawed plumb. No. 2, clear face. No. 3 must be sound, free from sap, shakes, and knots exceeding 1½ inches in diameter, and not more than two knots in a piece. No. 4 must be sound, one heart-face free from sap, free from shakes, splits, and knots exceeding 1½ inches in diameter, and not more than four knots in any one piece.

CEILING. No. 1 should be strictly clear. No. 2 shall have the face clear of sap and knots. No. 3 shall be sound and free from shakes.

WEATHERBOARDS. Weatherboards shall be ½ to ¾ inches thick, 5½ to 8 inches wide, 8 feet and upward long, and shall be put in two classes. No. 1 must be clear of sap, knots, shakes, and splits. No. 2 must be clear of knots exceeding 1½ inches in diameter, and not more than four knots in one piece, and not over 1 inch sap on one edge.

BOARDS. Boards shall be 1 inch thick by 10 inches wide and over, and 12 feet long and upward, and shall be of four classes. No. 1 shall be sound, evenly sawn, free from sap, shakes, splits, and knots exceeding 1½ inch in diameter. No. 2 shall be sound, evenly sawn, free from shakes, splits, and unsound knots, not more than 1½ inches sap on one face. No. 3 shall be sound and evenly sawn, not over 2 inches of sap on heart-face, and show heart on the other face, free from through shakes and splits and loose knots. No. 4 shall be sound, evenly sawn, and free from splits.

CYPRESS. All cypress lumber will be classified, according to the specifications indicated below, as Nos. 1, 2, 3, 4, 5, and 6. It will be sawed 1-15 of an inch more than the thickness indicated, to allow for shrinkage and loss in becoming seasoned and in dressing. The length of Nos. 1, 2, and 3 will run from 10 feet and upward, and the width from 9 inches and upward, unless otherwise specified. No. 1 will be free of sap and perfectly clear of all defects. No. 2, square-edged, sound, one heart-face, the other face two-thirds heart, and two sound knots, not over 1½ inches in diameter, to each 10 feet. No. 3, square-edged, one face three-fourths heart, and show heart on other face, and sound knots. No. 4 will run from 4 to 8 inches inclusive, and will be sound, square-edged, and free from sap. No. 4 not sold to fill any special schedule, but must be taken just as the sizes run, within the dimensions given. No. 5 will be 1 inch full thickness, square-edged, and any width that may be made. No. 6, any cypress not admissible to the above classes, will be sold according to its merits.

All cypress dimension lumber shall be classed and inspected according to rules of classification, etc., governing pine lumber.

SHIMS. Plastering-laths shall be of one class, viz., merchantable, to be 1¼ to ¾ of an inch in thickness, 1¼ to 1½ inches wide, and 4 feet long; to be perfectly sound.

SINGLES. Shall be of three classes, which shall be designated as follows: Nos. 1, 2, and 3. No. 1 shall be 13 or 20 inches long, ¾ to 1½ of an inch thick at butt end, and not less than 3 inches wide, clear of sap and knots. No. 2 shall be 18 to 20 inches long, ¾ to 1½ of an inch thick at butt end, and not less than 3 inches wide, clear of unsound or loose knots; two sound knots will be allowed if not over ½ of an inch in diameter. No. 3 shall be 16 to 20 inches long, 1¼ to ¾ of an inch thick at butt end, and not less than 3 inches wide.

INSTRUCTIONS TO INSPECTORS AND MEASURERS OF CYPRESS AND PINE LUMBER.

All inspections, measurements, and classifications are to be made according to the adopted standards of this Exchange, unless otherwise adopted upon and ordered by both buyer and seller; but when some slight deviation, either in width or thickness, should occur by accidental manufacture, so long as it will not hinder the lumber from being used for the purpose for which it was intended, shall not be reduced in grade on account of such deviation, it being the purpose of the foregoing rules to grade lumber so that the grades sold on the market and out of the yards shall be the same.

Inspectors and measurers inspecting or measuring any cargo of lumber, shall have full control of the unloading of the lumber, so far as determining the quantity of the lumber shall be delivered out of the vessel.

All inspectors who inspect lumber by grades under the foregoing rules in this market, when required, shall mark the quality upon the pile or lot so inspected, in at least four places.

No inspector or measurer commissioned by this Exchange shall be directly or indirectly interested in the business of buying or selling lumber, either for himself or other parties.

The inspector or measurer shall keep the original tally-sheets, with date, name of the vessel, and for whom inspected, at their office for at least one year, and said tally-sheets shall at all times be accessible to any of the parties interested. Duplicates of tally-sheets shall be rendered to party ordering inspection immediately on completion of said inspection.

The remuneration of inspector and measurer to be by fees equally paid by seller and buyer, unless otherwise agreed upon.

NEW YORK CITY.

Adopted by the New York Lumber Trade Association, April 12, 1887.

Revised April 9, 1889.

HARDWOOD.

The question of determining the quality of lumber by grading and inspection is so much a matter of judgment, that the inspector must necessarily be guided in a measure by his own discretion, governed by the following rules:

A standard knot is not to exceed 1½ inches in diameter, and must be sound.

Larger and loose knots grade the piece of lumber lower, in accordance with the judgment of the inspector.

Splits are not to exceed 12 inches in length in firsts, or one-sixth the length of the piece in seconds, in the aggregate, and not more than 25 per cent. of the whole in either quality may be so split.

Worm-holes not admitted in firsts and seconds, except as otherwise provided.

Shakes and heart boards and plank are not admitted in firsts, seconds, or rejects.

Warped, twisted, fluted, stained, and stick-rotted lumber is marketable only by special agreement.

Tapering lumber shall be measured one-third of its length from the narrow end.

All lumber must be squared square-edged and be full thickness when seasoned.

All badly sawn, missawn, and uneven lumber to be classed as culls, except when such will dress down the full length and width to the thickness below, in which case the price shall be reduced one grade.

Lumber sawn for specific purposes, and dimension stock, must conform to the requirements of size and quality for the purposes intended, and be so inspected and measured.

Mill culls are not marketable, except by special arrangement.

Log-run understood to be the run of the unpecked logs, mill culls out. Standard lengths are to be 12, 14, and 16 feet, admitting 5 per cent. of 10-foot lengths.

Standard lengths in walnut and cherry will admit 5 per cent. of 8, and 10 per cent. 10-foot lengths, 8-foot lengths 12 inches and wider to be clear and graded firsts, and 9 to 12 inches clear and graded as seconds.

Kewels, from all kinds of lumber, are to be cut outside the heart, to square 5, 6, 8, 9, and 10 inches when pecked out.

Balusters to be cut exactly square, full size, and clear, and to be 75 per cent. 32 inches long; 25 per cent. may be 28 inches long.

WALNUT. Grades, firsts, seconds, rejects, and culls. Firsts are to be 7 inches and over in width; 7 to 10 inches wide shall be clear; 11 to 14 inches wide will admit bright sap not exceeding 1 inch in width, or one standard knot; 15 to 20 inches wide will admit bright sap not exceeding 2 inches in width, or two standard knots. Seconds are to be 6 inches and over in width; 6 inches wide shall be clear; 7 to 11 inches wide will admit one standard knot; 12 to 15 inches wide will admit two standard knots; 16 to 20 inches wide will admit three standard knots. In any widths not more than one-fifth of the surface of one side shall be sappy. Rejects are to be 4 inches and over in width; 4 and 5 inches wide shall be clear, or clear one side; 6 inches and over in width shall include all lumber not equal to the grade of seconds, two-thirds of each piece being merchantable. Heart boards or plank not admitted. Culls include all lumber not equal to the grade of rejects, one-half of each piece being merchantable. All other than as above stated shall be classed as mill culls.

WALNUT JOISTS. 4 x 4 inches to 10 x 10 inches square. Firsts are to be 10 feet and upward in length, sound, and free from knots and checks, and full size when seasoned; splits to be measured off. Seconds are to be sound, and free from heart splits 10 to 12 feet long; they admit two standard knots and 2 inches of sap on two corners; 14 to 16 feet lengths will admit three standard knots and 2 inches of sap on two corners. These defects are based on 6 x 6 joists, and bear the same ratio in other sizes. Culls in-

YELLOW PINE.

Adopted by the Southern Lumber and Timber Association, at a convention held at Savannah, Ga., February 14, 1883.

SCANTLING shall embrace all sizes from 2 to 5 inches in thickness and 2 to 6 inches in width. For example: 2x2, 2x3, 2x4, 2x5, 2x6, 3x3, 3x4, 3x5, 3x6, 4x4, 4x5, 4x6, 5x3, and 5x6.

PLANK shall embrace all sizes from 1½ to 5 inches in thickness by 7 inches and up in width: 1½, 2, 2½, 3, 3½, 4, 4½, 5x7 and up wide.

DIMENSION SIZES shall embrace all sizes 6 inches and up in thickness by 7 inches and up in width, including 6x6. For example: 6x6, 6x7, 7x7, 7x8, 8x8, 8x9, and up.

STEPPING shall embrace 1 to 2½ inches in thickness by 7 inches and up in width. For example: 1, 1½, 1¾, 2, 2½, 3 and up wide.

ROUGH EDGE OR FLITCH shall embrace all sizes 1 inch and up in thickness by 5 inches and up in width, sawed on two sides only. For example: 1, 1½, 2, 3, 4, and up thick, by 8 and up wide, sawed on two sides only.

SQUARE-EDGED INSPECTION. Scantling shall be free from injurious shakes, unsound knots, or knots to impair strength; sap no objection. Plank shall be free from unsound knots, wane through or round shakes; sap no objection. Dimension sizes—Sap no objection, no wane edges; no shakes to show on outside of stick. All stock to be well and truly manufactured full to sizes and saw-batted.

MERCHANTABLE INSPECTION. Scantling shall show three corners heart, free from injurious shakes or unsound knots. Plank, 9 inches and under wide, shall show one heart-face and two-thirds heart on opposite side; over 9 inches wide shall show two-thirds heart on both sides, all free from round or through shakes, large or unsound knots. All square lumber shall show two-thirds heart on two sides, and not less than one-half heart on two other sides. Other sizes shall show two-thirds heart on faces, and show heart two-thirds of the length on edges, excepting where the width exceeds the thickness by 3 inches or over, then it shall show heart on the edges for a half its length. Stepping shall show three corners heart, free from shakes and all knots exceeding half an inch in diameter, and not more than six in a board. Rough edge or flitch shall be sawed from good heart lumber, and shall be measured in the middle of the narrow face, free from injurious shakes or unsound knots. All stock to be well and truly manufactured full to size and saw-batted.

PRIME INSPECTION. Scantling shall show three corners heart, and not to exceed 1 inch of sap on fourth corner measured diagonally, free from heart, shakes, large or unsound knots. Plank shall show one entire heart-face on opposite side, not exceeding one-sixth its width of sap on each corner, free from round knots, through or round shakes; sap to be measured on face. Dimension sizes—On all square sizes the sap on each corner shall not exceed one-sixth the width of the face. When the width does not exceed the thickness by 3 inches, to show half heart on narrow faces; the entire length exceeding 3 inches, to show heart on narrow faces the entire length; sap on wide faces to be measured as on square sizes. Rough edge or flitch shall be sawed in the middle or narrow face inside of sap, free from shakes or unsound knots.

CLEAR INSPECTION. Scantling and plank shall be free of sap, large knots, or other defects. Dimension sizes shall be free from sap, large or unsound knots, shakes, through or round.

DESIGNATIONS OF THE TRADE. Resawed lumber—lumber sawn on four sides; rough-edge or flitch—lumber sawn on two sides; timber—hewn only.

RULES FOR INSPECTION OF FLOORING.

Adopted by the Maritime Exchange, May 11, 1881.

MERCHANTABLE FLOORING. One inch and 1½ inches in thickness, and from 3 to 6 inches in width, and shall show one face free from sap and two-thirds heart the entire length on the opposite face. Shall be free from rot, split, shakes, and unsound knots; sound knots to be allowed as follows, viz.: Two knots in boards under 16 feet long; three knots in boards 16 feet long and over, of not over 1 inch in diameter, or six knots if not over half an inch in diameter.

MERCHANTABLE FLOORING PLANK. One and one-half to 3 inches in thickness, and 5 to 10 inches in width, shall show one face free from sap, except on each edge of the face one-half inch of sap shall be allowed, and two-thirds heart on opposite face. Free from rot, split, shakes, unsound knots, and knots exceeding 1½ inches in diameter.

MERCHANTABLE WHITE BOARDS AND PLANK. One inch to 2 inches in thickness, and 10 to 14 inches in width, shall show one face free from sap, rot, and two-thirds heart entire length on opposite face. Free from rot, through shakes, splits, and unsound knots. Six sound knots of 1 inch and under in diameter, or three of 1½ inches in diameter, to be allowed in any piece.

PRIME WHITE BOARDS AND PLANK. One to 2 inches in thickness, and 10 to 14 inches in width, shall show one face and one edge free from sap, and two-thirds heart on the other face the entire length. Free from rot, shakes, splits, and knots.

MERCHANTABLE SIDING. One inch, 1½ inches, and 1½ inches in thickness, and 1 inches and over in width, sap shall be allowed on the face, or best side (regardless of sap on the opposite face), as follows: One-half inch on one edge on boards 7 inches and under in width and one-half inch on each edge of boards over 7 inches wide. Must be free from through shakes, rot, splits, and unsound knots, and on the face side the following allowance for knots shall be made, viz.: Three sound knots not exceeding 1 inch in diameter in boards under 14 feet long; four sound knots not exceeding 1 inch in diameter in boards 14 feet long and over, or six sound knots not exceeding ½ inch in diameter in boards of any length.

INSPECTION OF WHITE PINE FOR EXPORT.

SOUTH AMERICAN SHIPPERS should be 1, 1½, and 2 inches by 12 inches, 12 to 16 feet long. No. 1 must be sound, red-knotted lumber. There should be no black knots, and the edge of the piece should be free from knots altogether. It must be free from shakes or splits. The market term for above in Albany would be selected dressing; in Michigan, the very best of No. 1 common, and in Chicago it would be a good D stock.

WEST INDIA SHIPPERS should be 8 inches and up wide, 12 to 16 feet long. Specifications for this vary, requiring for an average per board from 12½ to 15 feet. It must be sound-knotted, free from shakes, and no splits to exceed 1 inch in any end. Stained or discolored lumber is not wanted. The grade is about equal to No. 1.

AUSTRALIA. This market takes good fourths, selects, and pickings. No. 1 shelving (Albany dressing, or better). This shelving runs from 12 to 22 inches, 12 to 16 feet long, and is dressed 2 two sides and two edges. All stock in every case must be dry, free from splits (except as otherwise stated), and well manufactured.

COMMISSION CHARGES. The charges for handling stock are 5 per cent. commission, 2 per cent. additional for each settlement, and when inspected, if lumber, one-half the inspection charges (to be paid by the other half), or if logs, all the inspection fee, such being the custom here.

INSPECTION CHARGES. The fees adopted by the New York Lumber Trade Association are as follows per 1,000 feet: Walnut, ash, oak, cherry, gum, chestnut, hickory, birch, butternut, sycamore, in single car-load lots, 50 cents; in two or more car-load lots, 40 cents. Poplar, basswood, cottonwood, elm, locust, in single car-load lots, 40 cents; in two or more car-load lots, 30 cents. Two or more woods, in a single car, 50 cents.

The fee for measuring logs is \$1 per 1,000.

The charges per 1,000 board measure, for measuring and inspecting lumber, as adopted by the New York Lumber and Timber Inspectors' Association, are as follows:

OUTSIDE PORT LIMITS. Spruce timber, straight measurement, 31 cents; spruce timber, scheduled measurement, 35 cents.

WHITE PINE LIMITS. Spruce timber, straight measurement, 25 cents; spruce timber, scheduled, 31 cents; eastern pine, straight measurement, 30 cents; eastern pine, scheduled or in quantities, 37½ cents; yellow pine sawn, measured and inspected, 40 cents; yellow pine straight measurement, 38 cents; yellow pine timber, tallying, 35 cents; yellow pine boards, tallying, 30 cents; yellow pine, hewn, measured and inspected, 50 cents; white pine decking, measured and inspected, 50 cents; white pine shipping, measured and inspected, 37½ cents; hardwood, measured and inspected, 50 cents; cedar and mahogany, measured and inspected, 50 cents; white pine and oak raft timber, measured and inspected, per cubic foot, \$1.50; yellow pine and oak piling, measured and inspected, per lineal foot, \$2; spruce piling, measured and inspected, per lineal foot, \$1.

For work done outside the limits of the port of New York, spruce excepted, expenses are charged.

NORTHWESTERN RULES.

Adopted by the manufacturers of the Northwest.

WHITE PINE.

No arbitrary rules for the inspection of lumber can be maintained with satisfaction. The variations from any given rule are both numerous and suggested by practical common sense, so nothing more definite than the general features of different grades should be attempted by rules of inspection. In making grades that are standard and uniform, free scope must be given to the grader to exercise his judgment in ways that no rule can prescribe. Prominent among the features that should be taken into consideration and which are not within the province of rules to describe, is the quality of the pine, whether soft and harsh, or hard and tough; whether on account of being narrow a board can not be made without defects; a rule allows, or if extra wide can have more. The particular use in building or manufacture to which a piece of lumber may be adapted, often warrants an inspection at variance with definite rules. The following, therefore, are submitted as the general characteristics of the different grades:

UPPERS. In the grading of finishing lumber in common practice there is a recognized difference in classifying inch lumber and lumber thicker than inch; a very large percent of the 1½, 1¾, and 2 inch lumber used for finishing purposes goes into work requiring each face to be shown, as in doors, sash, etc. With inch lumber the uses are quite different, the almost invariable practice being that one face of the board is shown, and that face the best one. These facts justify the practice of grading thick uppers with particular reference to each face, and inch uppers with more particular reference to one face.

The grades of first, second, and third clear in thick uppers, each side should be up to the required standard. In the grades of A, B, or C select in thick uppers, a piece that will grade A select on its best face may be no better than a B select on the reverse side, and a B select, best face, may be a C select on the reverse side, etc. In inch finish more latitude may be taken in considering the reverse side of the best face, except when both faces are exposed, as in partition. All uppers must be white pine.

The first CLEAR shall be 12 inches or over in width, and free from all defects of whatever nature, up to 1½ inches wide than that, a half inch of sap on one edge, or a less amount on two edges on one side, will be admissible, but the face side must be perfect.

SECOND CLEAR shall be 10 inches or over in width. When under 12 inches the piece must practically be free from all defects; from 12 to 16 inches in width will admit of white sap on each edge not to exceed ½ inch in width or 1 inch in width on one edge only. When there is no sap one or two small sound knots, not to exceed ½ inch in diameter, will be admissible.

THIRD CLEAR shall be 8 inches or over in width. When over 16 inches in width the defects may be doubled, and up to 10 inches shall be free from all defects. A 10-inch piece may have an inch of white sap on each edge, and one or two very small sound knots not to exceed ½ inch in diameter. When 12 to 16 inches, white sap 2 inches in width on each side, or three small knots scattered at some distance apart, not to exceed an inch in diameter, will be admissible. A piece 8 inches and over may have 4 inches of white sap on one edge, with not to exceed three small sound knots, or four or five small knots of same size well scattered, when there is less or no sap. No shake allowed in this grade.

A SELECT shall be 8 inches or over in width. In this grade an 8-inch piece should not have more than 1 inch of white sap on each edge, or more than 2 inches on one edge and one small knot. In the absence of sap an 8-inch piece may have two or three small sound knots, not to exceed a half inch in diameter. Wider than 10 inches the defects may be increased. In a piece otherwise a third clear, 12 inches and over in width, a single defect, such as a knot as large as a dollar, or a single worm-hole, or a small local spot that is shakey, or white sap on each edge 2 or 3 inches wide, or less sap on one edge and a corresponding increase on the other, or four or five small sound knots not larger than a nickel, are each admissible in the grade of A select.

B SELECT. Some shake is admissible in this grade, a very little in 8 or 10 inch pieces, more when the lumber is wider but never to such an extent that will prevent three-fourths of the piece being used for cutting-up purposes. Consequently the shakes should be local, and not scattered over the piece. The presence of white sap is no objection in this grade, and should not be considered a defect. Other defects admissible are three to six small knots, depending on the width, or if in a wide piece where there are no other defects, two or three large knots of the size of a dollar. A little blue sap on one edge of a wide piece is admissible in this grade, or when the sap is but slightly stained 1 or 2 inches of it will be admissible on each side of a wide piece, provided there are but few other defects. In narrow pieces but little stained sap is admissible, and then only on one edge, or across the face at one end. The reverse side of any sap-stained B select should not be discolored entirely across it. To summarize, no defect nor combination of defects are admissible in this grade when three-fourths of the piece can not be used for first-class finish.

C SELECT. This grade will admit of quite serious defects. If the piece retains at the same time a fair appearance. Black sap on each edge of a wide piece, or on one edge of a narrow one, or sap slightly stained entirely across the face at one end or in the middle, or from 3 to 4 inches wide on each side of a wide piece, accompanied by some shake or a half-dozen small knots, depending on the width, are admissible in this grade; or a piece may have considerable blue shake scattered over its face, or more of it locally at either end, or in the middle, and be admissible. This being the lowest grade of finish, it admits of many defects that are serious; but such defects as very coarse knots, or large streaks of rot, or such others as give to the lumber a coarse, unsightly appearance, should not be put in this grade. This grade is generally used by, and made for, the retailer, and is not adapted for factory work.

SHOP COMMON. Should be 6 inches and over in width. Its legitimate use is for factory work, or cutting-up purposes. Its leading defects consist of large coarse knots, so distributed that pieces of clear lumber 3 feet or over in length and 6 inches and over in width can be cut out between the defects. Other defects, such as considerable rot, black sap, or splits, may all be so located to admit of good cutting. The defects that characterize this grade are too coarse in appearance to be admissible in any grade of finish, and they should be so located as to admit of at least 60 per cent. being cut into pieces, free from serious defects, of the length and width outlined above.

BOX AND STOCK BOARDS. All grades of stock boards should be free from shake or wane or any radical defect that would prevent their being used full length and width without cutting out defects. With especial reference to

grade on one face, boards 13 inches and wider are box, and the term stock is applied to such boards 8, 10, and 12 inches wide.

A stock is practically the same grade as second clear, and will admit of white sap on each edge not to exceed $\frac{1}{2}$ inch in width, or 1 inch in width on one edge only.

B STOCK. The same as third clear. The exceptions to this are the 8 and 10 inch stock may have the same kind of defects as in 12-inch stock, only not quite so much sap nor so large or numerous knots.

C STOCK. can have 3 or 3 inches of white sap on each side, or more if on one side, either case with three or four sound scattered knots as large as a quarter, or six or eight sound knots as large as a nickel well scattered. In the absence of knots a board can have some more white sap, or a few more knots when there is no sap.

D STOCK may have some sap stala, but not too blue, 3 or 4 inches in width on each edge, with eight to twelve small sound knots varying in size from a nickel to a quarter, or five or eight sound knots varying in size from a quarter to a dollar. Without sap more knots are admissible, and with fewer knots more sap. The 8 and 10 inch D stocks are graded similarly, width considered.

SIDING AND THREE-EIGHTHS CEILING. Siding and $\frac{3}{8}$ ceiling are graded on the merits of the face side. Ceiling shall be graded by the same rules governing the grading of siding. Any flaw in the manufacture should be treated as a defect. Clear siding must be clear from all defects.

NOS. 1 AND 2 OR A AND B SIDING can have half an inch of white sap on the thin edge, or two of three sound knots a half inch in diameter. Either of these defects is admissible, but not both.

No. 3 or C SIDING can have white sap 2 or 3 inches wide on either edge, or an inch of white sap with two or three sound knots well scattered, not exceeding an inch in diameter, or with one or two more knots if smaller. No shake admissible.

No. 4 or D SIDING may have some shake and considerable stained sap. The shake should be fine, and the stained sap not very blue. With or without either of these defects, may be as many as a dozen small knots well scattered, as large as a nickel, or some larger in less number, but no piece of siding No. 4 should contain more than four knots as large as a quarter, and they should be well scattered.

FENCE SIDING should consist of the regular grade of No. 1 fencing made into siding.

FOUR AND SIX INCH FLOORING, DROP SIDING, CEILING, AND PARTITION. All flooring, drop siding, and ceiling should be graded on the merits of the face side, and according to the rules governing the grading of flooring. Partition must present both faces equal in grade, or else be graded according to the poorest face. All flooring, drop siding, and ceiling should have the tongue and groove well supported on the lower side, and this reverse side should have enough smooth surface to support the board. If on account of wane, this is not the case, the piece should be placed in the grade next below where its face entitles it.

No. 1 or A FLOORING can have one or two sound pin knots, as large as the end of lead pencil, or half inch of white sap on one edge, but can not have both defects.

No. 2 or B FLOORING may have an inch of white sap on one edge, or a half inch on both edges. With less sap, one or two small knots as large as a dime scattered; or without sap, as many as three knots no larger than a dime.

No. 3 or C FLOORING will admit of considerable white sap, which may extend across the face at either end, or be 3 inches in width along one edge of a 6-inch piece. Also two or three sound knots an inch in diameter, four or five knots $\frac{1}{2}$ inch in diameter, or two knots as large as a quarter, are each admissible.

No. 4 or D FLOORING will admit of an entire face of white sap and considerable stained sap if not too blue; a dozen small knots, well scattered, five or six sound ones an inch in diameter, also some shake.

The different grades of fencing dressed and matched should be nothing more nor less than the regular grade of rough fencing made into flooring.

FIRST COMMON BOARDS AND FENCING should be sound lumber, free from shake, split, worm-holes, or large coarse knots that weaken the board. It is generally understood that a No. 1 board should turn water when used on a roof, the knots sound and firmly set. Boards and fencing should retain these qualities after being worked into shiplap, drop siding, grooved roofing or flooring.

SECOND COMMON BOARDS AND FENCING will admit of some considerable shake, larger and more numerous knots not necessarily sound, sap stala, narrow rotten streaks that are firm in substance. In fencing, the knots should not be so large, nor bunched together in seriously weak places, nor should there be much shake on the ends. Some small, fine worm-holes are admissible. When worked to shiplap, flooring, etc., no knot-holes are admissible.

THIRD COMMON BOARDS AND FENCING consists of lumber having a great deal of shake, coarse knots that materially weaken the boards, knot-holes, splits, wane, or firm red rot covering not more than one-third of the board face.

DIMENSION. First Common, must be sound, well manufactured, and free from rot. Some shake is admissible and some wane, but the ends should generally be square-edged. The larger in size the dimension, larger and more numerous knots are admissible.

SECOND COMMON will admit of considerable wane, numerous large, coarse knots that materially weaken it, streaks of red firm rot, or numerous worm-holes. Dimension in quality good enough for No. 1, but poorly sawed, should be graded No. 2.

SHIPPING CULLS, whether in boards or dimension, should be uniform in length and width, well trimmed, and strong enough to be handled without breakage. The predominating defect is red rot covering more than one-half of its surface. This grade should be free from lumber that is absolutely worthless.

The above rules are all based on the supposition that lumber is well manufactured to recognized standards of width and thickness.

shakes and through splits. Merchantable must show heart on each face, may show wane on two corners not exceeding 15 inches long to each 12 feet in length, 1 inch wide on 10 x 10, and wider in proportion on larger sizes, free from injurious shakes and through splits.

PLANK AND BOARDS. Classes, stepping, prime, and merchantable. Sizes, 1 inch to 2 1/2 inches by 7 inches and up. Stepping must be square edge, one heart face, the other face two-thirds heart surface, to show heart the entire length; provided that where one edge is sap the edge at the opposite point must be heart; to be entirely free from splits, not to have more than two knots 1/2 inch in diameter, or one knot 3/4 inch in diameter, to each 12 feet in length; provided that 50 per cent. shall be clear of knots. Prime must be square edge, one heart-face, two-thirds heart surface on other face, to show heart the entire length, free from through shakes and through splits, not to have more than two knots 1/4 inches in diameter in sizes under 1 1/2 inches thick, or two knots 1/2 inches in diameter in sizes 1 1/2 inches and up thick, to each 12 feet in length. Merchantable must be square edge, one heart-face, and show heart on other face, free from through shakes and through splits; provided that sizes 1 1/2 inches and up wide may show sap on one edge of test face not exceeding 1 1/2 inches wide at any one place.

FLOORING. Classes, Boston, prime, and merchantable. Sizes, 1 inch, 1 1/4 inches, and 1 1/2 inches by 3 inches to 6 inches. Boston must be square edge, all heart with exception of small streaks of sap on one side not exceeding 2 inches wide at any one place, free from shakes and splits, not to have more than two knots 1/2 inch in diameter, or one knot 3/4 inch in diameter, to each 12 feet in length; provided that 70 per cent. shall be clear of knots. Prime must be square edge, one heart-face, and show heart the entire length on other face, free from splits and shakes, not to have more than two knots 3/4 inch in diameter, or one knot 1 inch in diameter, to each 12 feet in length. Merchantable must be square edge, one heart-face, with exception of 1/2 inch sap on edge of best face, free from splits and through shakes and knots exceeding 1 1/2 inches in diameter.

ONE-DIXEY. Classes, prime, merchantable, and sap. Sizes, 1 inch and 1 1/4 inches by 3 inches and up, 3 inches to 6 inches wide being designated as narrow, and 7 inches and up as wide. Prime must be square edge, one heart-face, and same allowance for knots as merchantable, free from splits and through shakes. Merchantable must be square edge; sap shall be allowed on best face, regardless of sap on other face, as follows: In narrow sidings 1/2 inch sap shall be allowed on one edge of best face, and in wide sidings 1/2 inch sap on each edge of best face, free from through shakes and through splits, with following allowance for knots: In narrow sidings two knots 1 inch in diameter, or three knots 3/4 inch in diameter, to each 12 feet in length, and in wide sidings two knots 1 1/4 inches in diameter, or three knots 3/4 inch in diameter, to each 12 feet in length; provided that 60 per cent. shall be clear of knots. Sap must be square edge, free from through shakes and through splits, and same allowance for knots as merchantable.

SAW-TIMBER. Classes, prime, merchantable, and square-butt with saw, free from unsound knots and hollow knots. The limitation as to size and number of knots refers to the best face. The distribution of knots need not be proportionate—i. e., two knots to each 12 feet means that a piece 24 feet long may have four knots anywhere in the piece, and not two knots to each separate 12 feet. The allowance for knots in flooring, plank, and boards is for the narrowest width of each division; the number may be increased in proportion to the width. In stepping, flooring, and sidings, sound knots may be allowed on all sides of the maximum knot, and in prime plank and boards one-half the diameter of the maximum knot, shall not be considered. In measurement of knots the average diameter must be taken. Unless otherwise specified, lumber shall be 2 feet and up long. The term resawn lumber shall include all of the sizes above mentioned. The general distinction between sawn timber and dimension stuff is that dimension stuff is generally bought and sold by the 1,000 superficial feet, and is usually a part of a schedule including several other kinds of resawn lumber. Saw timber is bought and sold by the cubic foot, the price being based on the cubic average, and is generally shipped in cargo lots or as a part of a cargo of hewn timber and deals.

SAWN TIMBER. Classes, "A" and "B." Class "A" must be sound, square-butt with saw, square edge, and well made, free from injurious shakes and unsound knots, showing heart the entire length on two faces, and showing heart on the other two faces. Class "B" must be sound, square-butt with saw, and well made, free from injurious shakes and unsound knots, showing heart on each face; may have slight places of wane not exceeding 1 inch across in the widest place by not exceeding one-third the length of the piece in the aggregate, and not exceeding 2 inches across in the widest place by not exceeding 3 feet in length, and the total number of such places of wane not to exceed one, as above mentioned, on any one corner.

HEWN TIMBER. Classes, "A 2," "B 1 Good," and "B 1." "A 2" must be sound, straight, well manufactured, free from unsound knots and injurious shakes, showing heart the entire length on all sides; may show 1 inch to 20 feet in length, and may show places of wane 1 1/2 inches in width and not to exceed 6 feet in length at top end. "B 1 Good" may have 1 inch sweep to each 20 feet in length one way only, not exceeding 15 per cent. of the number of pieces in any one raft; must be sound, well manufactured, free from unsound knots and injurious shakes; to show heart on two sides the entire length, and on other two sides two-thirds of the length; may taper 1 inch to 20 feet in length, and may show places of wane 2 inches in width, and not to exceed 10 feet in length at top end. "B 1" may have 1 inch sweep or crook to each 10 feet in length one way only, not exceeding 15 per cent. as above; must be sound, well manufactured, free from unsound knots and injurious shakes, to show one-half heart on all sides; may taper 1 1/2 inches to 20 feet in length, and may show places of wane 2 inches in width and 2 feet long at one place, provided wane at the top end shall be allowed 8 feet in length. All timber to be square-butt and free from splinter draws.

PHILADELPHIA.

Adopted by the Lumbermen's Exchange, Printed by permission. Copyright, 1888, by the Lumbermen's Exchange of Philadelphia.

WHITE PINE. First clear shall be not less than 12 inches in width and 12 feet in length; must be perfect up to 14 inches in width; on that width sap may be allowed equal to 1 inch the whole length of the piece on one side, but the face must be perfect; over that width imperfections may be allowed in proportion to the width based on the description of a 14-inch piece. Second clear shall be not less than 11 inches in width and 12 feet in length; must be perfect up to 12 inches in width; at that width sap may be allowed equal to 1 inch the whole length of the piece on one side; over that width imperfections may be allowed in proportion to the width based on the description of a 12-inch piece. Third clear shall be not less than 10 inches in width and 12 feet in length; must be perfect up to 11 inches in width; at that width sap may be allowed equal to 1 inch the whole length of the piece on one side; over that width imperfections may be allowed in proportion to the width based on the description of a 10-inch piece. Selects shall be not less than 9 inches in width and 12 feet in length; must be perfect up to 10 inches in width; at that width sap may be allowed equal to 1 inch in width on both edges on one side; over that width imperfections may be allowed in proportion to the width based on the description of a 9-inch piece. Fine common shall be not less than 8 inches in width and 12 feet in length; at that width shall have one clear face; 9 inches and over in width may admit of some knots, and less sap in proportion to the width. This grade makes good one-side lumber, and in general knots shall be allowed, so that this grade is not injured for finishing purposes. No. 1 shelving shall be 12 inches and over in width and not less than 12 feet in length, with clear edges and a smooth heart surface on one face; the other side shall be clear of knots and over in width and not less than 12 feet in length, with clear edges and medium-sized sound knots. No. 1 cuts shall be 9 inches and over in width, with 75 per cent. of good lumber in the piece. No. 2 cuts shall be 8 inches

PENSACOLA, FLA.

In effect August 1, 1887.

PITCH PINE RESAWN LUMBER, SAWN AND HEWN TIMBER.

DEALS. Classes, prime, standard, 1st, merchantable, and stowage. Sizes, 3 inches to 6 inches by 9 inches 8 and up. Prime must be square edge, one heart face, two-thirds heart surface on other face, to show heart the entire length, free from injurious shakes and through splits and knots exceeding 2 inches in diameter. Standard 1st must be square edge, one heart-face, two-thirds heart surface on other face, to show heart the entire length, free from injurious shakes and through splits. Lengths, 14 feet and up. Merchantable must be square edge, one heart-face, and show heart on other face, free from through shakes and through splits. Stowage must be square edge, free from through shakes and through splits.

SCANTLING. Classes, prime and merchantable. Sizes, 2 inches to 9 1/2 inches by 2 inches and up, except sizes included under deals and plank; provided that deals 4 1/2 inches and up, and plank, when included in bills of scantling or dimension stuff, may be inspected as such. Prime must be one face all heart, one face all heart two-thirds of the length, the other third of that face two-thirds heart at every point, and one other face to show heart, free from through splits and through shakes and injurious knots; provided that sizes 7 inches and up by 7 inches and up, instead of heart as above stated, may have two-thirds heart surface on each face, showing heart the entire length. Merchantable must be square edge, show heart on two faces the entire length, free from through shakes and through splits.

DIMENSION STUFF. Classes, prime and merchantable. Sizes, 10 inches and up by 10 inches and up. Prime must be square edge, two-thirds heart surface on each face, showing heart the entire length, free from injurious

and over in width, with about 60 per cent. of good lumber in the piece. This grade will admit of some shake. No. 1 moulding shall be 5 inches and over in width and not less than 12 feet in length, straight-grained, with one clear heart-face; will admit of slight discoloration of sap on the back. No. 2 moulding when under 6 inches in width shall have one clear heart-face; when 6 inches and over in width, will admit of a few small sound knots, or sound spots on one or both faces of the piece. Case boards shall be 16 inches and over in width and not less than 12 feet in length, free from split, rot, shake, and loose knots. Barn quality shall be 8 inches and over in width and not less than 12 feet in length, free from split, rot, shake, and unsound knots. It is understood that all the above grades shall be full thickness and well manufactured. Culls shall be 5 inches and over in width, of a generally unsound character, and when the imperfections are due to factors of an inferior grade or of a poor quality. Mill culls—all lumber below culls, not actually worthless.

DRESSED LUMBER. Six-inch clear fencing shall be not less than 12 feet in length, $\frac{7}{8}$ inch in thickness, and $\frac{5}{8}$ inch face, and shall be perfect. Six-inch No. 1 fencing shall be of the same dimensions as clear fencing, and will admit of one small knot, or sap $\frac{3}{4}$ inch in width the full length of the piece, with perfect face. Six-inch No. 2 fencing shall be of the same dimensions as clear fencing, and admit of a few small sound knots, with sap $\frac{1}{2}$ inch the full length of the piece on one side; if fewer knots, more sap is allowed. Six-inch No. 3 fencing, shall be of the same dimensions as the clear fencing, free from rot or large unsound knots; slight shakes will be admitted, if without other imperfections. Six-inch No. 4 fencing shall be of the same dimensions as clear fencing; rougher than No. 3 grade, but not so unsound that it can not be used for its intended purpose. Promiscuous width fencing—Imprecise fencing the quality shall be the same as above grades, and the face shall be the full width represented.

GERMAN SIDING, BASE BOARDS, CEILING (OR ONE-SIDE FENCING), AND FLOORING. Six-inch clear shall be not less than 12 feet in length, $\frac{7}{8}$ inch in thickness, and $\frac{5}{8}$ inch in width, and shall be perfect on the face. Six-inch No. 1 shall be the same dimensions as clear, and will admit of one small knot, or sap $\frac{3}{4}$ inch in width the full length of the piece on the face. Six-inch No. 2 shall be of the same dimensions as clear, and will admit of one small knot, or sap $\frac{1}{2}$ inch the full length of the piece; if less knots, more sap is allowed in proportion. Six-inch No. 3 shall be of the same dimensions as clear, and shall be free from shake, rot, or large unsound knots.

BEVEL SIDING. Clear shall be not less than 12 feet in length and $\frac{5}{8}$ inch in width, and must be perfect on face side. No. 1 shall be the same dimensions as clear, and will admit of one small knot, or sap $\frac{3}{4}$ inch in width the full length of the piece on the face side. No. 2 shall be the same dimensions as clear, and will admit of two or three small knots, or 1 inch of bright sap the full length of piece on face side. No. 3 shall be the same dimensions as clear, and will admit of four or five small knots, or 2 inches of bright sap the full length of the piece on face side. No. 4 shall be the same dimensions as clear, and will admit of larger knots than the No. 3 grade; will also allow fine shake.

PLASTERING LATH. No. 1 shall be 1 foot in length, not less than $\frac{3}{8}$ inch in thickness, $\frac{1}{8}$ inch in width, free from rot, wane, or worm-holes.

WHITE PINE SCANTLING shall be from 2x3 to 8x3 in dimensions, well manufactured, and shall be principally 16 feet long; quality shall be small sound knots.

WHITE PINE TIMBER shall be square edges, straight-grained, free from large or loose knots or other imperfections that will materially injure the strength of the piece.

WHITE PINE PALES. No. 1 shall be clear of knots, wane, and black sap, not less than $\frac{7}{8}$ inch in thickness and $2\frac{1}{2}$ inches in width. No. 2 shall be the same dimensions as No. 1, and will admit of sap and sound knots.

YELLOW PINE. All lumber of merchantable quality must be sound, square-edged and square-buted, 12 feet and over in length. Scantling to average 35 feet in length, unless otherwise ordered. All to be well manufactured, and full to size. Merchantable edge-boards must be either 1 inch or $\frac{1}{4}$ inches thick, 3 inches and over in width, free from loose or unsound knots, or knots over $\frac{1}{4}$ inches in diameter; also free from rot, shake, turpentine deposit, or worm-holes, and one face free from discolored sap that will not plane off bright when worked in flooring. If sawed tapering, to be measured at narrowest part. Common edge boards—All light, 1 in. in width, and not up to 6 inches in thickness, shall be called common, and must be 10 feet and over in length, and either full $\frac{3}{4}$ inch, 1 inch, or $\frac{1}{4}$ inches thick, and better than a worthless or mill cull board. No. 1 heart-face boards must be 1 inch or $\frac{1}{4}$ inches thick, 3 inches and over wide, and free from knots and all other imperfections on the face side, and sound on the opposite side. No. 2 heart-face boards must be 1 inch or $\frac{1}{4}$ inches thick, 3 inches and over in width, and free from rot, shake, and unsound or loose knots. No. 3 boards under 6 inches wide, bright sap shall be allowed on the face or best side, not more than 1 inch on one side. Boards 6 inches and over wide may have bright sap on both edges of the face side not to exceed $\frac{1}{4}$ inch in width. Knots shall be allowed on the heart-face side, viz.: On boards 6 inches and under wide and 16 feet long and under, one knot of not over $\frac{1}{2}$ inch in diameter; over 16 feet long and same width, two knots of same description. Boards over 6 inches wide and 16 feet long and under, three knots not over $\frac{1}{2}$ inch in diameter, and same, or 16 feet long and over, three knots in diameter, and same, and over 16 feet long, number of knots may increase in proportion as the length of the board increases. All boards not up to grade of No. 1 or No. 2 heart-face shall be inspected as "merchantable" and "common" edge boards. All boards shall be manufactured parallel width, and so counted. No. 1 heart step boards and plank must be either 1 inch, $\frac{1}{4}$ inches, $\frac{1}{2}$ inches, or 2 inches thick, and $10\frac{1}{2}$ inches to 14 inches wide (80 per cent. 12 inches and over on one face and one edge entirely free from all imperfections, and sound on opposite face. No. 2 heart step boards and plank must be 1 inch, $\frac{1}{4}$ inches, $\frac{1}{2}$ inches, or 2 inches thick, allowing $\frac{1}{4}$ inch of sap on one corner of the face side, and one knot not exceeding 1 inch in diameter to every 4 feet in length; to be free from rot, shake, and split; same widths as No. 1. In the measurement of side and edge boards, heart-face boards and step boards and plank, the fraction of a foot in contents shall not be counted, and in heart-face boards they shall be counted whole, and half inches only in width, viz.: $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$, 1, $\frac{1}{2}$, etc. Merchantable plank, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

purchase. In scantling, fractions of a foot in length shall not be counted except when ordered to be specified lengths in feet and inches.

VIRGINIA AND NORTH CAROLINA PINE. All lumber of merchantable quality must be sound, square-edged, and parallel width, 12 feet and over in length, and all to be well manufactured, and full to size. No. 1 heart-face quality shall be 4, 5, 6, or 8 inches in thickness, 6 inches and over in width, clear of sap stain and other imperfections on face side, and sound on the opposite side. No. 2 sap flooring quality, shall be 4, 5, 6, or 8 inches in thickness, 3 inches and over in width, shall be perfect on the face side up to 6 inches in width; 6 inches and over shall admit of a few sound knots and slight discoloration from stain, and sound on the opposite side. Sap pine, rough quality, shall be 4, 5, 6, or 8 inches in thickness, 3 inches and over in width, and shall include all grades of boards which are sound in quality, and not specified in above grades. All boards less than 1 inch and not less than $\frac{3}{4}$ inch in thickness in No. 1 and No. 2 flooring quality shall be counted as rough. The same thickness in rough shall be counted as thin. No. 1 heart-step boards and plank shall be 4-4, 5-4 inches in thickness, $10\frac{1}{2}$ inches and over in width, and 6-4 and 8-4 inches in thickness, 12 inches and over in width. One face and one edge must be perfect, and sound on the opposite side. No. 3 sap flooring quality, shall be 4, 5, 6, or 8 inches in thickness, and will admit of 1 inch of sap on one edge of face side, and one sound, tight knot, not exceeding 1 inch in diameter, to every 4 feet in length; free from rot, shake, split, and turpentine deposit. Heart flooring grade shall be 4-4, 5-4, 6-4, and 8-4 inches in thickness, and shall consist of all boards and plank equal in quality to No. 1 stepping, and less than $10\frac{1}{2}$ inches in width; that width and over will admit of a few small knots or 1 inch of sap on each edge. The rough grade shall be 4-4, 5-4, 6-4, and 8-4 inches in thickness, and of same grade as specified in rough quality sap pine. All boards and plank below the grades above specified shall be inspected as culls. North Carolina and Virginia heart scantling and plank, from 3x4 to 3x12, and 4x4 to 4x12, shall be heart on face side and three-fourths heart on opposite side, and will admit of sound knots that will not impair the strength of the piece; 5x5 and upward will admit of 1 inch of sap on each corner and of sound quality. All the above sizes shall be free from rot, shake, split, and of same grade as specified in rough quality sap pine. All boards and plank below the grades above specified shall be inspected as culls. Any piece of scantling or plank not up to size intended shall be counted as the next lower size or thickness.

HARDWOODS.

The question of grading and inspecting lumber is so much a matter of judgment to the inspector as each piece comes before him, that no definite and positive rules can be laid down on paper by which any piece or any thousand feet can be inspected.

The variety of defects, and their location upon a piece, and their size, have such relations to each other that the inspector necessarily must depend upon his own judgment in grading, guided by the following rules, so far as they will apply practically:

Any standard knot is not to exceed $\frac{1}{4}$ inches in diameter, and must be sound; larger and loose knots grade the piece of lumber lower, as the judgment of the inspector thinks proper.

Spills are not to exceed in length the width of the piece in firsts and twice the length of the width of the piece in seconds, and not more than 25 per cent. can be split.

Shakes are not admitted in firsts and seconds. Worm-holes to be excluded in firsts, and only admitted in seconds in quantities equal to defects hereafter described in this quality.

Tapering lumber shall be measured one-third of its length from the narrow end.

All lumber must be sawed square-edged, and be full thickness when seasoned.

Lumber sawed for specific purposes, and dimension stock, must conform to the requirements of size and quality for the purposes intended, and be so inspected and measured.

Culls are not marketable unless one-half the surface of the board is free from defects.

Mill culls are not a marketable except by special arrangement.

Log-run is understood to be the run of the unpicked logs, mill culls out.

Combined firsts and seconds, as a grade, shall have 50 per cent. of first quality, unless otherwise stated differently hereafter.

Standard lengths are to be 12, 14, and 16 feet, admitting 10 per cent. of 8 and 10 feet.

Newels from all kinds of timber are to be cut outside the heart, and to be clear, to square 5, 6, 7, 8, 9, and 10 inches when seasoned, and to be in lengths of 4 feet or any multiple thereof.

Balusters to be cut exactly square, of full size, and clear, and to be 75 per cent. 36 inches long, 25 per cent. 32 inches long.

WALNUT. Grades, firsts and seconds, rejects and culls. Firsts are to be 8 inches and over in width; 8 to 10 inches wide shall be clear; 13 to 15 inches wide will admit of bright sap on one side not exceeding 1 inch in width, or one standard knot, showing only on one side; 16 inches wide and over will admit of bright sap on one side not exceeding 2 inches in width, or two standard knots, showing only on one side. Seconds are to be 6 inches and over in width; 6 and 7 inches wide shall be clear; 8 to 10 inches wide will admit of one standard knot; 11 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Culls to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Culls are to include all lumber not equal to the grade of good rejects, half of each piece being clear. Other than as above stated shall be classed as mill culls.

CHERRY AND BUTTERNUT. Grades, firsts, seconds, rejects, and culls. Firsts are to be 8 inches and over in width; 8 to 10 inches wide shall be clear; 11 to 14 inches wide will admit of bright sap on one side not exceeding 1 inch in width, or one standard knot, showing only on one side; 15 inches wide and over will admit of bright sap on one side not exceeding 2 inches in width, or two standard knots, showing only on one side. Seconds are to be 6 inches and over in width; 6 and 7 inches wide shall be clear; 8 to 10 inches wide will admit of one standard knot; 11 to 14 inches wide will admit of two standard knots; 15 inches wide and over will admit of three standard knots. Culls to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls. Strips 3 to 7 inches wide shall be clear or clear-faced; the reverse side will admit of one-half sap, or one defect.

OAK (plain, white, or red). Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 12 inches wide shall be clear; 13 to 15 inches wide will admit of one standard knot, showing only on one side; 16 inches wide and over will admit of two standard knots, showing only on one side. Live sap admitted on one side, not to exceed 10 per cent. of the surface, if without other defects. Must be entirely free from worm holes. Seconds are to be 6 inches and over in width; 6 and 7 inches are to be clear; 8 to 12 inches wide will admit of one standard knot; 13 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Live sap admitted on one side, not to exceed 30 per cent. of the surface, if without other defects. Worm 1 to 2 inches wide will admit of one standard knot, but not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

ASPE. Grades, firsts, seconds, and culls. Firsts are to be 5 inches and

over in width; 8 to 12 inches wide shall be clear; 13 to 15 inches wide will admit of one standard knot; 16 inches wide and over will admit of two standard knots. Live white sap allowed. Seconds are to be 6 inches and over in width; 6 to 7 inches wide shall be clear; 8 to 12 inches wide will admit of one standard knot; 13 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Heart or dotted boards and plank will not be admitted. Culls to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

ELM. Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 12 inches wide shall be clear; 13 to 15 inches wide will admit of one standard knot; 16 inches wide and over will admit of two standard knots. Live white sap allowed. Must be entirely free from worm-holes. Seconds are to be 6 inches and over in width; 6 to 7 inches wide shall be clear; 8 to 12 inches wide will admit of one standard knot; 13 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Live white sap allowed. Worm-holes are serious defects. Culls are to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

MACE (hard and soft). Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 12 inches wide shall be clear; 13 to 15 inches wide will admit of one standard knot; 16 inches wide and over will admit of two standard knots. Live white sap allowed. Seconds are to be 6 inches and over in width; 6 to 7 inches wide shall be clear; 8 to 12 inches wide will admit of one standard knot; 13 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Live white sap allowed. Heart or dotted boards and plank will not be admitted. Culls are to include lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

MAPLE SQUARES, 4 X 4 inches to 10 X 10 inches square. Firsts are to be 10 feet and upward in length, clear, sound, and free from all defects, and of full size when seasoned. Seconds are to be sound and free from hearts, shakes, and checks; 10 and 12 feet lengths admit of two standard knots; 14 and 16 feet lengths admit of three standard knots. Bright sap admitted when not exceeding 10 per cent. of the surface. These defects are based on 6 X 6 squares, and a ratio to be observed in other sizes. Culls are to include all squares not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

QUARTERED OAK (shall be figured). Grades, firsts and seconds. Firsts are to be 6 inches and over in width; 6 to 9 inches wide shall be clear; 10 inches and over will admit of one standard knot, showing only on one side, or equal defect. Seconds are to be 6 inches and over in width; 6 to 9 inches wide shall be clear; 10 inches and over will admit of one standard knot, showing only on one side, or equal defect; 10 inches and over in width will admit of two standard knots, showing only on one side, or equal defect. Strips, 4 and 5 inches wide, only accepted by special agreement. Combined grade of firsts and seconds shall contain not less than 75 per cent. of firsts.

POP-LAR (WHITEWOOD). Grades, firsts, seconds, and common. Firsts are to be 10 inches and over in width; 10 to 12 inches wide must be clear; 13 to 15 inches wide will admit of 1 inch of bright sap, showing only on one side; 16 inches wide and over will admit of 2 inches of bright sap. Seconds are to be 8 inches and over in width; 8 to 10 inches wide shall be clear; 11 to 13 inches wide will admit of 2 inches of bright sap, or one standard knot; 13 to 15 inches wide will admit of 3 inches of bright sap, or two standard knots; 16 inches wide and over will admit of 4 inches of bright sap, or three standard knots. Common shall include any width not less than 5 inches, and will allow bright sap on one side, or one-third discolored sap on one side. Two unsound knots will be allowed in this grade if over 1 inches wide, or one sound knot in excess of those allowed in width of 1 inch. Culls are to include all straight splits not over one-third the length shall be admitted; otherwise lumber must be sound. In this grade two-thirds must be good lumber. Culls include all lumber not equal to the grade of common, one-half of each piece being good lumber. Mill culls shall include all lumber not one-half good.

POP-LAR (WHITEWOOD). Grades, firsts, seconds, and common. Firsts are to be 10 feet and upward in length, clear, sound, and free from all defects, sawed square, and of full size when seasoned. Seconds are to be sound and free from hearts, shakes, and checks; 10 and 12 feet lengths admit of two standard knots and 2 inches of bright sap on two corners; 14 and 16 feet lengths admit of three standard knots and 2 inches of bright sap on two corners. These defects are based on 6 X 6 squares, and bear the same ratio in other sizes. Culls include all squares not equal to the grade of good seconds, one-half being clear. Other than as above stated shall be classed as mill culls.

RUFF. Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 10 inches wide shall be clear; 11 to 13 inches wide will admit of one standard knot, showing only on one side; 14 inches wide and over will admit of two standard knots, showing only on one side. Seconds are to be 6 inches and over in width; 6 and 7 inches wide shall be clear; 8 to 10 inches wide will admit of one standard knot; 11 to 13 inches wide will admit of two standard knots; 14 inches wide and over will admit of three standard knots. Culls to include all lumber not equal to grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

CHESTNUT. Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 15 inches wide shall be clear; 16 inches wide and over will admit of one standard knot. Seconds are to be 6 inches and over in width; 8 to 12 inches wide will admit of one standard knot; 13 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Worm-holes in these grades not admitted, except when in a bunch not larger than the standard knot or knots, as provided for the width of board in which they appear. Culls to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above described shall be classed as mill culls.

GRAND SYCAMORE. Grades, firsts, seconds, rejects, and culls. Firsts are to be 8 inches and over in width; 8 to 10 inches wide shall be clear; 13 to 15 inches wide will admit of bright sap on one side not exceeding 1 inch in width, or one standard knot, showing only on one side. Seconds are to be 6 inches and over in width; 6 and 7 inches wide shall be clear; 8 to 12 inches wide will admit of bright sap on one side not exceeding 2 inches in width, or two standard knots, showing only on one side. Seconds are to be 6 inches and over in width; 6 and 7 inches wide shall be clear; 8 to 12 inches wide will admit of one standard knot; 13 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Worm-holes in these grades not admitted, except when in a bunch not larger than the standard knot or knots, as provided for the width of board in which they appear. Culls are to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

COTTONWOOD. Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 12 inches wide must be clear; 13 to 15 inches wide will admit of 1 inch of bright sap on one side, or one standard knot, showing only on one side; 16 inches wide and over will admit of 3 inches of bright sap on one side, or three standard knots, showing only on one side. Culls to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

BASSWOOD. Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 12 inches wide shall be clear of knots; 13 to 15 inches wide will admit of one standard knot, showing only on one side; 16 inches

wide and over will admit of two standard knots, showing only on one side. Seconds are to be 6 inches and over in width; 6 and 7 inches wide shall be clear of knots; 8 to 12 inches wide will admit of one standard knot, showing only on one side; 13 to 15 inches wide will admit of two standard knots, showing only on one side; 16 inches wide and over will admit of three standard knots, showing only on one side. Culls to include all lumber not equal to the grade of good seconds, one-half of the piece being clear. Other than as above stated shall be classed as mill culls.

QUARTERED SYCAMORE shall be figured same as quartered oak, except as to sap; all sap, culls. Grades, firsts and seconds. Firsts are to be 6 inches and over in width; 6 to 9 inches wide shall be clear; 10 inches and over will admit of one standard knot, showing only on one side, or equal defect. Seconds are to be 6 inches and over in width; 6 to 9 inches wide will admit of one standard knot, showing only on one side, or equal defect; 10 inches and over in width will admit of two standard knots, showing only on one side, or equal defect. Strips 4 and 5 inches wide only accepted by special agreement.

HICKORY. Grades, firsts, seconds, and culls. Firsts are to be 8 inches and over in width; 8 to 12 inches wide shall be clear; 13 to 15 inches wide will admit of one standard knot, showing only on one side; 16 inches wide and over will admit of two standard knots, showing only on one side. Seconds are to be 6 inches and over in width; 6 to 7 inches wide shall be clear; 8 to 12 inches wide will admit of one standard knot; 13 to 15 inches wide will admit of two standard knots; 16 inches wide and over will admit of three standard knots. Culls to include all lumber not equal to the grade of good seconds, one-half of each piece being clear. Other than as above stated shall be classed as mill culls.

Incured-growth hickory, sawed through and through and rough-edged, shall be measured inside the wane, and the average width of the face.

HEMLOCK. The inspection of hemlock shall be as follows: Boards and fencing shall consist of three grades—mill culls, culls, and good. A mill cull shall consist of a board that is rotten, very badly shaken, that contains the shape but not the substance, which is not altogether worthless, but is used for some certain purposes, at a low price. A cull board shall consist of a board having a few loose knots or knot-holes, not over size of a 30-cent piece, or showing a small hole in the board, or streaky parts, or split half the length of the board. Good shall consist of all boards better than culls. All boards above mill culls shall be known as log-run, mill culls out, and all boards above culls shall be known as log-run, culls out.

Scantling shall consist of 2 X 3, 2 X 4, and 3 X 4, and shall be of two grades—good and culls. A good piece shall be well manufactured, may admit of wane one-quarter the length of the piece, one-half the thickness on one edge, except 2 X 3, which must be square to the end, with balance otherwise good, and no other defects that would materially injure the strength of the piece. A cull shall be a piece which is not included in the good.

Joists shall consist of two grades—culls and good. Cull joists shall consist of all pieces that are doted, badly shaken, very cross-grained, and such as are warped out of shape, provided that large knots or that one or two straight splits in either end of the joist shall not be construed to make it a cull, unless it reduces the strength of the piece. Wane shall not condemn a piece, unless over two-thirds the length and one-half the thickness of the piece. Good joists shall be well manufactured, and shall consist of all pieces above culls.

Shingling, lath, pickets, and pales shall be well made, parallel widths, and sawed from sound timber.

Plastering lath shall be well manufactured, from sound timber, and standard size shall be 1 1/2 X 5-16 inches, and 3 or 4 foot long.

Bill lumber shall consist of size 1 1/2 X 4 inches, and shall be well manufactured, of full size as designed in the bill, and the inspection shall be the same as for good joists, except that no wane be allowed that will destroy the strength of the piece.

SPRUCE. The inspection of spruce shall be as follows: Grades, merchantable, and culls. Merchantable boards shall be free from shakes and loose or unsound knots. All shank boards with loose and unsound knots shall be inspected as culls. Merchantable scantling, plank, and joists shall also be sound in character and free from cross-grain that will affect the strength of the piece, and will admit of wane not to exceed one-quarter the length of the piece, and one-third the thickness on one edge. A cull shall be a piece not included in the merchantable.

Pickets shall be either 4, 4 1/2, or 5 feet in length, and 3/4, 1, or 1 1/4 inches thick, and 3 inches in width, and shall be sound and parallel widths.

Plastering lath shall be sound and well manufactured, and standard size shall be 4 feet in length, and 1 1/2 X 5-16 inches, and 100 in a bundle.

PORTLAND, OREGON.

Adopted by the Oregon and Washington Lumbermen's Exchange, of Portland, November 1, 1890.

FR. No. 1 vertical grain stepping shall be well manufactured, the angle of the grain not over 45 degrees; bright sap admissible, not to exceed 2 inches in width on the face side. When 12 inches or more in width, may contain small knots equal to 1/2 inch diameter, or one pitch seam, not more than 4 inches in length for each 10 feet of lumber, the rounded edge to be free from defects.

No. 1 vertical grain flooring and rustic shall be well manufactured and clear of all defects upon the face side; bright sap admissible, not to exceed one-fourth of the face; the angle of the grain not over 45 degrees; lengths, 10 feet and upward.

Clear bastard rustic shall conform to No. 1 grade, except as to grain.

No. 1 ceiling shall conform to grade of No. 1 flooring, except as to grain. No. 1 finishing shall be well manufactured, and up to 8 inches wide shall be clear of all defects on face side; bright sap admissible, not to exceed one-fourth of the face; widths over 8 inches shall admit of small knots, equal to 1/2 inch diameter for each 10 feet of lumber; lengths, 10 feet and longer.

No. 1 clear rough lumber shall be well manufactured, and up to 8 inches shall be clear of all defects; bright sap admissible, not to exceed one-fourth of each face; widths over 8 inches wide shall admit of small knots, equal to 1/2 inch diameter for each 10 feet of lumber.

No. 2 flooring, rustic, ceiling, and finishing shall be sound lumber and well manufactured; but will admit of white sap and sound knots, or their equivalent, not to exceed 1/2 inch diameter to each 2 superficial feet, nor pitch blisters not showing an open seam and not exceeding 6 inches in length to each 2 superficial feet; lengths, 10 feet and over.

No. 3 flooring, rustic, and ceiling shall be good, sound, common lumber. Common lumber shall be well manufactured, and shall be free from rot, wane, shake, loose knots, or other defect which will materially weaken the piece; lengths, 10 feet and upward.

Cull lumber shall consist of merchantable lumber which has such defects as exclude it from the grades of common or better. All dressed lumber shall be measured as of contents before planing.

ST. LOUIS.

Adopted February 9, 1899

Inspectors of lumber are not manufacturers, and must measure and inspect lumber as they find it, of full length and width (except as to wane, which must be measured not or inspected in a lower grade), making no allowance for the purpose of raising grade, unless so instructed by the buyer and seller.

In hardwood inspection, the inspector is instructed to use his best judgment, based upon the rules for his guidance.

Firsties and seconds will allow one sound knot $\frac{3}{4}$ inch in diameter, or in place

thereof be one-half sap on sap side. Common will comprise sound pieces below firsts and seconds, or pieces all sap. Cull, all unsound pieces available one-half.

ROUGH SOUTHERN OR YELLOW PINE. Inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 8 inches wide and over (except flooring), free from defects, except bright sap or two small sound knots not over $\frac{3}{4}$ inch in diameter. Common shall include all lumber not up to the grade of firsts and seconds, but free from shakes, large knots, or unsound lumber. Cull shall comprise all widths and sizes below the description of common.

Firsts and seconds clear flooring boards and strips must be free from all defects except bright sap, which is allowable. Blue sap is excluded. Common flooring boards and strips must be of the same size and general character as firsts and seconds clear, but may have two or three small sound knots of not more than $\frac{3}{4}$ inch in diameter, or a small wane on one edge which will not injure it for working to its full size.

Step plank, firsts and seconds clear, must not be less than 10 inches wide, and 1, 1 $\frac{1}{4}$, 1 $\frac{1}{2}$, and 2 inches thick; free from all defects on one side, except 2 inches of bright sap.

Wagon bottoms must be 1 inch full thick, 6, 8, 10, and 12 inches wide, 11 feet long. Must be good sound lumber, blue sap or standard knots, without regard to number, being no objection if knots are not on edge.

Timber and joists must be square edge, and have no defects that will impair the strength of the piece for purpose intended.

RED CEDAR. Red cedar should be sold log-run, to be measured for what it can be worked for. Lengths and widths are no defects. Caution should be used in determining defects.

[NOTE.—Inspectors are authorized to measure and inspect all kinds of hardwood lumber that are not included in these rules, according to the rules governing the inspection of hard and soft maple.]

INSPECTION FEES.

SECTION 1. That to compete and conform with other first-class markets, it is hereby agreed that inspectors' and measurers' fees shall be as follows, viz.: On white pine and cottonwood, straight or merchantable, at 25 cents per 1,000 feet. On yellow pine, gum, poplar, chestnut, elm, soft maple, and basswood, straight or merchantable, or graded and dropped together, at 30 cents per 1,000 feet. If grades are separated, 40 cents per 1,000 feet. All other woods not herein specified, including cedar, shall be classed as hardwoods, for which the fees shall be 10 cents per 1,000 feet additional to the fees hereinbefore named. If tally sheet is furnished, an extra 10 cents per 1,000 feet shall be charged on the above prices.

SEC. 2. When the buyer or seller requests the separation of grades, such separation shall be made by the inspectors at the cost of the party so requesting, such cost not to exceed 10 cents per 1,000 feet.

ST. PAUL AND MINNEAPOLIS.

Adopted by the Northwestern Hardwood Lumbermen's Association, for the St. Paul, Minneapolis, Minnesota, and Wisconsin markets.

HARDWOODS.

INSTRUCTIONS TO INSPECTORS. Inspectors must measure lumber as they find it, except as to wanes and bad ends, which must be measured out.

In hardwood inspection the inspector is instructed to use his best judgment, based upon the general rules for his guidance.

The standard knot shall not exceed 1 $\frac{1}{4}$ inches in diameter, and must be of a sound character.

Splits are not to exceed one-fifth the length of the piece in seconds.

Standard lengths shall be 10, 12, 14, 16, 18, and 20 feet.

Standard thicknesses shall be 1, 1 $\frac{1}{4}$, 1 $\frac{1}{2}$, 2, 2 $\frac{1}{2}$, 3, 3 $\frac{1}{2}$, and 4 inches.

All lumber should be sawed plump thickness. Thin lumber is not considered marketable, and must be reduced to the next standard thickness, or at least one grade lower, on account of thinness.

A cull which will not work one-half of its size without waste is a mill cull of no recognized value.

Badly sawed, mis-sawed, and uneven lumber shall be reduced in grade sufficiently to equalize the loss from the defective sawing.

Lumber sawed for specific purposes, such as axles, bolsters, tongues, reaches, newels, balusters, squares, etc., must be inspected with a view to the adaptability of the piece for the intended use, as in many cases it can not be used for other purposes.

In inspecting the grade of firsts and seconds an undue predominance of seconds should always be judiciously ascertained, as the purchaser is entitled to the full average in grades, which must not comprise more than 66 $\frac{2}{3}$ per cent. of seconds.

Mixed lots, containing boards, plank, flooring, bolsters, reaches, etc., shall be measured and inspected according to the rules governing the measurement and inspection of boards and plank, unless otherwise agreed between buyer and seller.

Hickory should never be cut when the sap is rising, as it is then liable to powder-post, and indications of deteriorations of this character should be carefully scrutinized.

Newels from all kinds of timber must be clean and free from heart, to square 5, 6, 7, 8, 9, and 10 inches plump. The lengths must be 4 feet full, or the multiples thereof.

Balusters and table legs should be clear, and square 2 x 2, 2 $\frac{1}{2}$ x 2 $\frac{1}{2}$, 3 x 3, and 4 x 4, 24 to 32 inches long, as contracted for.

Newels, balusters, and table legs not coming up to the grade of clear shall be classed as cull.

Counter tops shall be 12 feet and over long, 1, 1 $\frac{1}{4}$, 1 $\frac{1}{2}$ inches thick, and must be strictly clear, not less than 30 inches wide.

Bolsters must be 4 feet, 4 feet 6 inches, or multiples thereof, in length, and the size must be 3 x 4, 3 $\frac{1}{2}$ x 4 $\frac{1}{2}$, 3 $\frac{3}{4}$ x 5, or 1 x 5 inches.

Reaches must be 2 x 4 or 2 $\frac{1}{2}$ x 4 $\frac{1}{2}$ inches, and the lengths 8, 10, 12, and 16 feet.

Narrow timber must be 2 $\frac{1}{2}$ x 2 $\frac{1}{2}$ inches, and the lengths 5, 10, and 14 feet. Hickory axles must be clear, and in lengths of 6 or 12 feet for sizes 3 $\frac{1}{2}$ x 4, 4 x 5, 4 x 6, and 4 $\frac{1}{2}$ x 6, and 7 or 14 feet for 5 x 6 and 5 x 7 on special order, cut from sound, tough butt logs.

Wagon tongues must be clear and straight, 2 x 1 at small end and 1 x 4 at the butt end, or 2 $\frac{1}{2}$ x 1 $\frac{1}{2}$ at small end and 1 $\frac{1}{2}$ x 4 $\frac{1}{2}$ at butt end, 12 feet long, from straight-grained timber.

Bolsters, reaches, narrow timber, hickory axles, and wagon tongues not up to the grade of clear will be classed as cull.

It is important that all lumber should be parallel in width, square re-edges, and with square ends. Tapering lumber shall be measured at the small end.

Ordinary season checks are not considered defects.

Squares shall be 1 x 1, 1 $\frac{1}{2}$ x 1 $\frac{1}{2}$, 2 x 2, 2 $\frac{1}{2}$ x 2 $\frac{1}{2}$, 3 x 3, and 4 x 4 inches.

Shakes, splits, knots, shakes, splits, rot, wormholes, etc., are considered serious defects, reducing the lumber to grades lower than firsts and seconds.

Log-run is always understood to be the unpecked run of the logs, mill culls out.

RED AND WHITE OAK, ASH, BASSWOOD, BURR, BIRCH, MAPLE, ELM, AND BUTTERNUT. Firsts shall be 8 inches wide and over, free from defects of every kind or nature. Seconds must be 6 inches wide and over, but clear to 8 inches; defects may be allowed equivalent to one standard knot, and at 10 inches two knots, and an allowance of more defects may be made in proportion to increased widths. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Thick plank may contain sound heart if well boxed. Any board

below the grade of common shall be a cull; and a shipping cull shall work at least 50 per cent. without waste. Mill culls shall consist of bad heart pieces, wormy or generally unsound lumber that will not work 50 per cent. without waste. Firsts and second flooring strips shall be 3, 4, and 6 inches wide, 1 inch thick. Firsts shall have one side and two edges clear. Seconds will admit of one standard knot or a defect equivalent to same, not to exceed a waste of 10 per cent. of the whole piece. Common flooring must work sound at least 75 per cent. of its surface. Common and better shall be construed to mean the run of the logs, culls and mill culls out, and in red oak shall contain at least 65 per cent. of firsts and seconds, and not over 35 per cent. of common; and in white oak, ash, basswood, birch, maple, and elm not less than 50 per cent. of firsts and seconds, and not over 50 per cent. of common.

POPULAR AND WHITE PINE. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must not be less than 8 inches in width, and clear up to 10 inches. Boards or plank 10 to 12 inches wide may have two standard knots, but no other defects; or may have bright sap not over 3 inches in width at any place or in the aggregate, and no other defects. Boards and plank over 14 inches wide may have two standard knots and 4 inches of bright sap. Boards and plank free of other defects may have bright sap, if over 12 inches wide. Common shall include any width not less than 6 inches, and will allow of bright or discolored sap and knots beyond those described in firsts and seconds. Two unsound standard knots will be allowed in this grade, if over 12 inches wide, and splits shall not be considered a defect. Otherwise lumber must be sound. Culls shall comprise all widths and sizes having more defects than described in common, whether in the number or character of the knots, badly checked, and generally such lumber as is fit only for ordinary purposes.

Box boards shall be 12, 14, and 16 feet long, from 13 to 17 inches wide, free from all defects, except may be one-half bright sap.

Poplar strips may be full 6 inches wide, 1 and 1 $\frac{1}{2}$ inches thick, 12, 14, and 16 feet long. Second clear may be one-half bright sap on sap side, and have one sound knot not over $\frac{3}{4}$ inch diameter. Common shall embrace all sound strips with more defects than second clear. Culls shall contain all unsound strips that will work to one-half its contents, and all tapering strips.

Half-plank bright sap, if over 12 inches wide. Common shall include full width and thickness as ordered.

Common flooring boards and strips must be of the same size and general character as first and second clear, but may have two or three small sound knots of not more than $\frac{3}{4}$ inch in diameter, or a small wane on one edge which will not injure it for working to its full size.

Step plank, first and second clear, must not be less than 10 inches wide, and 1, 1 $\frac{1}{4}$, 1 $\frac{1}{2}$, and 2 inches thick; free from all defects on one side, except 2 inches of bright sap.

Wagon bottoms must be 1 inch full thick, 6, 8, 10, and 12 inches wide, 11 feet long; must be good sound lumber, blue sap or standard knots, without regard to number, being no objection if knots are not on edge.

Timber and joists must be square edge and have no defects that will impair the strength of the piece for purposes intended.

HICKORY AND PECAN. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots or bright sap may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Culls shall comprise all widths and sizes below the description of common.

BEECH AND WALNUT. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches 1 inch of sap or one standard knot, and at 10 inches 2 inches of sap or two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 5 inches and over wide, and shall include all lumber not up to the grade of firsts and seconds, but available full three-fourths of its size without waste, free from heart and unsound lumber. Culls shall comprise all widths and sizes below the description of common.

CHERRY. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches may have 1 inch of sap or one standard knot, and at 10 inches 2 inches of sap and two standard knots. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 5 inches and over wide, and shall include all lumber not up to the grade of firsts and seconds, but available full three-fourths of its size for use without waste, free from heart and unsound lumber. Culls shall comprise all widths and sizes below the description of common.

[NOTE.—Gum spots are considered a serious defect and when the damage exceeds one-sixth of the size of the piece, shall reduce it to the grade of common. When the damage exceeds one-third of the size of the piece, it shall be reduced to cull.]

BEECH AND SYCAMORE. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall be sound, 5 inches and over wide, and may have defects not injuring it for ordinary use without waste. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

CHESNUT. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches may have 1 inch of sap or one standard knot, and at 10 inches 2 inches of sap or two standard knots. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 5 inches and over wide. At 6 inches 1 inch of sap or one standard knot, and at 8 inches 2 inches of sap or two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Cull shall comprise all widths and sizes below the description of common.

COTTONWOOD. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one, and at 10 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Bright sap is no defect. Common shall include 5 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Slightly discolored sap is allowed. Cull shall comprise all widths and sizes below the description of common. In chair plank, cross-splits and heart shakes are the only defects considered.

GUM. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 6 inches wide and over. At 8 inches one standard knot, and at 10 inches two standard knots and 2 inches of bright sap may be allowed on boards over 11 inches. An allowance for more defects of this character may be made in proportion to increased width. Common shall include all lumber available for use full three-fourths of its size without waste, free from heart and unsound lumber. Bright or slightly discolored sap may be included in this grade. Cull shall comprise all widths and sizes below the description of common.

CYPRESS. Boards and plank shall be in length 12, 14, or 16 feet, 1, 1 $\frac{1}{4}$, 1 $\frac{1}{2}$, 2, 2 $\frac{1}{2}$, 3, 3 $\frac{1}{2}$, or 4 inches thick, and be classed firsts and seconds, common and cull. Firsts and seconds shall be 8 inches and over wide, and clear up to 10 inches; at 10 inches and over may have two standard knots and 3 inches of bright sap. Free of other defects, may be one-half bright sap. Common will contain all sound lumber under second-class, and all shaly lumber that is available three-fourths. Cull shall comprise all unsound lumber that is available one-half.

Shakes and pecks are always a damage in cypress, and should be closely scrutinized.

Shakes must be 12, 14, or 16 feet long, 1 inch thick by 6 inches wide, unless otherwise ordered, and be classed as firsts and seconds, common and culls. Firsts and seconds will allow one sound knot $\frac{3}{4}$ inch in diameter, or in place thereof be one-half sap on sap side. Common will comprise sound pieces below firsts and seconds or pieces all sap. Cull, all unsound pieces available one-half.

ROTON SOUTHERN OR YELLOW PINE. Inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 8 inches wide and over (except flooring), free from defects except bright sap, or two small sound knots not over $\frac{3}{4}$ inch in diameter. Common shall include all lumber not up to the grade of firsts and seconds, but free from shakes, large knots, or unsound lumber. Cull shall comprise all widths and sizes below the description of common. Firsts and seconds clear flooring board and strips must be free from all defects except bright sap, which is allowable. Blue sap is excluded.

QUARTER-SAWN HARDWOOD LUMBER—OAK, SYCAMORE, ETC. The inspection grades shall consist of firsts and seconds, common and cull. Firsts and seconds must be 5 inches wide and over. At 7 inches one, and at 9 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Common shall be 4 inches and over wide. At 6 inches one, and at 8 inches two standard knots may be allowed. An allowance for more defects of this character may be made in proportion to increased width. Culls shall comprise all widths and sizes below the description of common.

RED CEDAR. Red cedar should be sold log-run, to be measured for what it can be worked for. Lengths and widths are no defects. Caution should be used in determining defects.

[NOTE.—Inspectors are authorized to measure and inspect all kinds of hardwood lumber that are not included in these rules, according to the rules governing the inspection of hard and soft maple.]

RULES OF ARBITRATION BOARD.

RULE I. Any party appealing shall be called an appellant. Any party resisting an appeal shall be called an appellee.

RULE II. Every person desiring to take an appeal from any decision or ruling of an inspector must do so within two days after learning of such ruling or decision.

RULE III. Any person taking an appeal must first present to the chairman of the committee on arbitration the inspector's certificate of the ruling or decision complained of, or a sworn copy thereof. Whereupon the chairman shall allow the appeal and fix the time and place for its hearing.

RULE IV. The appellant shall serve upon the appellee a written notice of the allowance of the appeal and of the time and place fixed for the hearing of the appeal, and shall incorporate into such notice a copy of the certificate of the inspector of the ruling or decision appealed from.

RULE V. Said notice shall be served upon the appellee not less than three nor more than ten days before the day fixed for hearing. In addition to one day for every 30 miles of travel by the most direct route from the place of service to the place of hearing, and the chairman in fixing the time of hearing shall allow sufficient time for such service to be made.

RULE VI. At the time and place fixed for hearing, all parties interested may appear by themselves, their agents, or attorneys. A majority of the members of the committee shall constitute a quorum for the transaction of any and all matters connected with such hearings. Upon the hearing the parties may respectively state their cases, and the committee shall summarily examine into the matters and things involved in the appeal and shall decide the controversy according to its merits. The opinion of a majority of the members of the committee present at the hearing shall be the opinion of the committee and shall be binding.

RULE VII. The chairman of the committee shall furnish to any party demanding it a certificate in writing of the committee's decision of any appeal, and shall also in all cases furnish the secretary of this association a written report of the decision of the appeal, as contemplated by Article 9 of the Articles of Incorporation.

INSPECTOR'S FEES, ETC.

From Association By-Laws.

The inspector shall be entitled to charge the sum of \$3 for each car lot or fraction thereof inspected, and to receive expenses, which shall be paid by the party in fault, unless otherwise agreed, and said fees shall be received by said inspector as full compensation for all his services.

Upon the request of either party the inspector shall issue a certificate of inspection, or of any of his rulings or decisions.

Any person not a member of this association who may require the services of the inspector or of the committee of this association shall pay to the chairman of the board of arbitration, in addition to the regular fee to be paid the inspector, the sum of \$2; and it shall be the duty of the chairman of the committee of arbitration to pay the said \$2 so collected over to the treasurer of the association.

SAN FRANCISCO.

Cargo Inspection, adopted by the Pacific Pine Lumber Co., San Francisco, February 2, 1888. Amended February 18, 1890.

PINE (OR FIR), SPRUCE, AND CEDAR (RED).

Grades shall be known hereafter as follows, and so designated in all surveys:

ROUGH PINE (OR FIR). Clears, selects, merchantable, seconds, refuse, car stock, ship stuff, kiln stuff.

DRESSED PINE. T and G Flooring.—No. 1, No. 2, rejects. Stepping.—No. 1, No. 2, No. 3. Other than flooring and stepping, as per grades in rough, and number of sides dressed, select.

ROUGH SPRUCE. Clears, selects, box stock, dunnage, refuse.

DRESSED SPRUCE. No. 1 shoving, No. 2 shoving, header beds.

ROUGH CEDAR (RED). Clears merchantable, refuse.

ROUGH PINE. Clears not to be surveyed as such unless surveyor is notified to that effect by both seller and buyer. Lumber in this grade shall be uniformly sawn, and exempt from all imperfections, excepting that in dimensions containing 24 inches or less to the linear foot, narrow pitch seams not over 6 inches long, not to exceed in number the average of one such seam to each 10 linear feet, may be allowed, and excepting, also, that in larger dimensions hard, bright knots not over 1 inch in diameter and a small amount of light-colored sap shall be permitted. Material intended for flooring and stepping surveyed in this grade shall in quality conform to dressed flooring and stepping.

Selects not to be surveyed as such unless surveyor is notified to that effect by both seller and buyer. Lumber in this grade shall be uniformly sawn, and exempt from shakes, wane, rot, rotten knots, and pitch seams over 8 inches long, in dimensions under 6 x 6, and not exceeding the average of one such seam to each 10 linear feet. The following imperfections may be allowed in this grade, to wit: A small amount of sap, if light-colored. Sound, bright knots in sizes up to 6 x 6, if not over 1 inch in diameter. In larger sizes knots may be proportionately larger. If sound and well fastened, but should not exceed $\frac{1}{2}$ inches in diameter, or average more than one such knot to each 10 linear feet. No knot materially impairing the strength of the piece shall be allowed. Material suitable for No. 2 flooring and stepping shall be placed in this grade.

Merchantable.—This grade shall consist of lengths of 12 feet and over (except shorter lengths be ordered), well sawn, and free from loose shakes and loose and rotten knots over $\frac{1}{2}$ inches in diameter. The following imperfections shall be allowed in this grade, to wit: Sound knots, when not rendering the piece unsuitable for substantial building purposes. Soft knots under $\frac{1}{2}$ inches in diameter, size of knot being considered in connection with size of piece. Sap streaks and stains. Pitch seams, if narrow, up to 12 inches in length. Loose shakes and splits, or wane, and rot at end of piece (if in dimensions over 2 inches in thickness), when not exceeding more than one-fourth its length, in which case the piece shall be surveyed for such length as shall be free from such imperfections; provided, always, such reduced length be not less than 12 feet. Occasional variations in sawing, when not rendering the piece unsuitable for the probable purpose intended. Under-variations in thicknesses of studding, plank, and joists, when not exceeding one-sixth length of intended thickness.

Seconds.—This grade shall consist of lengths under 12 feet (unless ordered), and all other rough lumber with such imperfections as shall impair its grading as merchantable; but all lumber in this grade shall be suitable for an inferior class of construction. Dimensions of 2 inches or less in thickness, with loose shakes and splits or wane or rot at end of piece, extending any material portion of the length, shall be placed in this grade.

Refuse.—This grade shall consist of all rough lumber grading below seconds, and shall be the equivalent of that which has been heretofore deemed firewood.

Car Stock. Not to be surveyed as such unless surveyor is notified to that effect by both seller and buyer, and furnished with a specification of sizes. No. 1 of this grade shall conform to the requirements of clears as above stated, and No. 2 shall be as of the grade of selects; any lumber hereunder in quality below selects shall be graded as merchantable or seconds, as the case may be.

Ship stuff. Not to be surveyed as such unless surveyor is notified to that effect by both seller and buyer, and furnished with a specification of the order or sale descriptive of the purposes for which the various dimensions are intended. This grade shall be divided into the following classes, with qualities respectively, to wit: Decking and bulwarks shall not average less than 33 feet in length (except otherwise ordered). Sap shall not extend more than one-sixth the length of the piece, or more than one-fourth the width or depth of the piece. Sound, hard knots not exceeding $\frac{3}{4}$ inch in diameter shall be allowed, when not on the corner of the piece, or averaging more than one such knot to each 8 linear feet. Narrow pitch seams may be allowed when not over 4 inches in length, or averaging more than one such seam to each 8 linear feet. Lumber intended for purposes named in this class should be strong, of live wood and good grain; square decking should present at least one face free from material imperfections. Ship plank should include material intended for plankings, garboards, wales, clamps, waterways, rails, stanchions, deck-beams, carlins, hatch-combings, and house-plates. Planking and similar dimensions shall average not less than 40 feet in length, unless otherwise ordered. Sap shall not extend more than one-sixth the length, or one-fourth the width or thickness. Sound, hard knots not exceeding 1 inch in diameter shall be allowed, when not on the edge of the piece, or averaging more than one such knot to each 6 linear feet. No pitch seams in this class of shalows not over 6 inches in length may be permitted when averaging not more than one such seam to each 8 linear feet. Other dimensions in this class shall be in quality equal to the grade of selects, the size of the piece always being considered. Lumber in this class should be strong, of live wood and good grain. Frames and ceiling. Dimensions intended for purposes of this class shall be in quality not inferior to the grade of merchantable, but must appear upon surveys separately from other merchantable. Ship stuff not to be surveyed as such unless surveyor is notified to that effect by both seller and buyer, and furnished with a specification of dimensions of such order or sale. Lumber in this grade shall consist of sizes especially ordered or sold for specific construction, and not intended for yard stock. Unless manifestly unfit for substantial building purposes, it shall be surveyed as of the grade of merchantable, except the order be for a different grade.

DRESSED PINE. T and G Flooring, No. 1.—This grade shall consist of lengths 12 feet and over (except shorter lengths be ordered), and shall show grain on edge for at least one-half its face width. It shall be worked so as to match perfectly, and dressed smooth by planer; it shall be free from knots on face or face edges, and all other imperfections, except narrow pitch seams not over 4 inches in length, or averaging more than one such seam to each 10 linear feet; but small sound knots when near the end of a piece otherwise perfect, as also light-colored sap when not extending more than one-fourth the width, or one-fourth the length of the piece, shall be allowed in this grade; provided, two or more of said imperfections do not appear in one piece.

T and G Flooring, No. 2.—This grade shall include lengths of 10 feet (unless ordered); shall be fairly well worked, and be generally such flooring, not grading as No. 1, as shall be suitable for an inferior class of construction. The following imperfections may be allowed in this grade: Light-colored sap, if not in excess of one-half the width, or one-half the face width, of the piece. A slight roughness caused by planer. Sound knots, if well fastened, when not over $\frac{3}{4}$ inch in diameter, or not appearing on face edges, provided there shall not be more than one such knot to the average of each 3 linear feet. Narrow pitch seams not over 6 inches in length, and small pitch blisters, when not averaging more than one such seam or blister to each 6 linear feet. When both said knots and seams appear in the same piece, it shall be excluded from this grade, except that in counting knots one small pitch seam may equal one knot.

T and G Flooring, Rejects.—This grade shall include all lengths under 10 feet (unless ordered), and such other flooring as by reason of imperfections will not grade as No. 2.

Stepping, No. 1.—This grade shall consist of lengths of 10 feet and over, be with grain-edge up, smoothly planed on one face, and free from all imperfections.

Stepping, No. 2.—This grade shall consist of lengths under 10 feet, and regardless of grain, if well planed on one face. The following imperfections may be allowed in this grade: Sap, if light colored and not extending more than one-sixth the face width or one-third the length of the piece. Narrow pitch seams, not over 6 inches in length or averaging more than one such seam to each 6 linear feet. Small pitch blisters, not averaging more than one such blister to each 3 linear feet. Hard knots in vertical grain, when not over $\frac{3}{4}$ inch in diameter or averaging more than one such knot to each 3 linear feet.

Stepping, No. 3.—This grade shall include all fairly planed stepping, which by reason of imperfections will not grade as No. 2, but the quality should not be below the grade of merchantable.

ROUGH SPRUCE. Clears.—Not to be surveyed as such, unless surveyor is notified by both seller and buyer. This grade shall consist of lengths of 12 feet and over, uniformly sawn, of full thickness, and free from all imperfections.

Selects.—Not to be surveyed as such, unless surveyor is notified by both seller and buyer. This grade shall consist of lengths of 12 feet and over, well sawn and of full thickness. Hard knots not exceeding $\frac{3}{4}$ inch in diameter, or averaging more than one such knot to each 6 linear feet, as also light-colored sap, not in excess of one-sixth the width of the piece (on one edge), may be allowed in this grade.

Seconds.—This grade shall consist of lengths of 4 feet and longer and widths of 4 inches and wider, and be the equivalent in quality of merchantable in pine; it shall be well sawn and of full thickness.

Dunnage.—This grade shall consist of lengths of 12 feet and over, and such other lumber as, by reason of under-variations in thickness or other immaterial imperfections, render it unfit for grading as box stock.

Refuse.—This grade shall consist of lengths under 12 feet (except box stock), and widths under 6 inches, and such other lumber with imperfections rendering it unfit for grading in the last preceding grade.

DRESSED SPRUCE. Shelving No. 1.—This grade shall be in quality the equivalent of select, smoothly planed, and not less in thickness than $\frac{1}{8}$ inch less than intended thickness.

Shelving No. 2.—This grade shall be such lumber as has imperfections rendering it unfit for grading as No. 1, but shall be superior to the grade of merchantable in pine; it shall also not have greater variations in thickness than No. 1.

Header Brds.—This grade shall not be in quality inferior to No. 2 shelving, and shall be free from loose knots or knot-holes.

ROUGH CLEAR (RED). Clears.—Not to be surveyed as such except under instructions to do so, either from both seller and buyer. This grade shall be the same as clears in pine.

Merchantable.—This grade shall be the same as the like grade in pine. Refuse.—This grade shall include all lumber below the grade of merchantable.

MISCELLANEOUS ITEMS.

All odd sizes, when especially ordered, shall be surveyed for their contents; otherwise as of the next regular size below.

All odd lengths, less than 32 feet (unless ordered), shall be surveyed as of the next regular length below; longer lengths in all cases shall be surveyed for actual lengths.

Lengths 16 and 21 feet, in sizes 1x4, 1x6, 1x8, 1 $\frac{1}{2}$ x6, and 1 $\frac{1}{2}$ x8, shall be surveyed separately from other lengths.

Lengths 41 to 50, 51 to 60, etc., shall be surveyed separately from other lengths.

All irregular lengths in ship stuff and bill stuff, especially ordered, shall be surveyed for the next regular length above, unless surveyor is otherwise notified by both seller and buyer.

The average length of each lot of decking and ship plank must be stated on surveys.

All dimensions less than 1 inch in thickness shall be surveyed as of 1 inch (except for freight), unless surveyor is otherwise notified by both seller and buyer.

All dressed lumber shall be surveyed as of contents before planing.

All lumber (rough or dressed) shall be surveyed for actual contents, as determined by linear feet, and not by estimated contents of the single piece.

In cases of reduced length by imperfections or reduced sizes by under-variations in thickness, the total feet board measure of such reduction must be stated in surveys.

All surveys must be in grades as to qualities, regardless of sizes or lengths, except where hereinafter otherwise specified.

All surveys shall be so made that a specification of pieces and lengths can be furnished if required, but when so required, the extra expense of such specification shall be for account of the party requiring same.

All surveys must be made uniformly, and to insure this blank forms will be furnished by supervising surveyor. Such forms must be made up with copying ink, to enable letter-press copies to be taken.

GENERAL INSTRUCTIONS.

It being impossible to adapt rules to every contingency liable to arise in the grading and survey of the various qualities, kinds, and sizes of the lumber hereinafter referred to, the inspecting surveyor, when in doubt as to the applicability of the foregoing rules to the question in hand, is instructed to refer the matter to the supervising surveyor, and in case of inability so to do (or until such time as such reference is possible), to consider the probable purpose for which the lumber is to be used, and survey the same as of the proper upper grade, except if he manifestly unsuited to such probable use. In such direction all surveyors are urged to make a study of the various usual purposes for which lumber in this market is used, as an aid to the exercise of equitable and discriminating judgment in all such matters.

Inspecting surveyors will be under the control and instructions of the supervising surveyor, and except in matters hereinafter referred to, to be decided by seller and buyer, and surveyor notified will neither receive nor act upon any instructions, advice, or opinion of either seller or buyer with regard to qualities, etc.

Questions as to proper rulings of supervising surveyor will be submitted to arbitration of seller and buyer, and their jointly chosen third, two of whom are competent to decide, and such decision shall be without further appeal.

N. B.—Above reference to supervising inspector will only apply when such officer is appointed by the Lumber Surveyors' Association.

TORONTO, ONT.

Adopted by the Lumber Section of the Board of Trade, June 16, 1890.

The following shall be the grades of lumber sanctioned by the Council of the Board of Trade for the Lumber Section of the Board of Trade of the City of Toronto:

PINE.

CLEAR LUMBER shall be perfect in all respects and free from wane, rot, shake, or check, not less than 12 feet long, 8 inches wide, and 1 inch thick. A piece 12 inches wide will admit of imperfections to the extent of one standard knot or its equivalent in sap. In lumber over 12 inches wide the inspector must use his best judgment, in accordance with the instructions above given.

PICKS. Pickings must not be less than 12 feet long, 8 inches wide, and 1 inch in thickness, well manufactured, and free from wane, rot, shake, or check. A piece 8 inches wide will admit of one standard knot or imperfections in sap to the same extent; a piece 12 inches wide will admit of two standard knots or imperfections in sap to the same extent. For lumber wider than 12 inches of this grade, inspectors will carry out the instructions as given regarding wide clear lumber.

No. 1 **CUTTING UP** shall not be less than 12 feet long, 7 inches wide, and 1 inch in thickness. Clear pieces 10 feet long and the required width are included in this grade; this must be free from wane, rot, shake, or check. Pieces from 7 to 9 inches wide will admit of imperfections to the extent of two standard knots or their equivalent in sap. Pieces from 10 to 12 inches wide will admit of three standard knots or imperfections equivalent to them in sap, and for wider lumber of this grade inspectors will follow instructions as given in two previous grades. Inspectors are informed that this grade of lumber is expected to cut out two-thirds clear in profitable lengths to the consumer.

No. 2 **CUTTING UP** shall not be less than 10 feet long, 6 inches wide, and 1 inch in thickness, and shall cut at least one-half clear in accordance with the instructions as given above regarding No. 1 cutting-up lumber.

FIXE. This grade of lumber shall be generally of a sound character, and shall be free from wane, rot, shake, or check, not less than 10 feet long, 7 inches wide, and 1 inch in thickness. A piece 7 inches wide will admit of one or more knots which can be covered with a recent piece, if they are sound. A piece wider than 7 inches will admit of one or more knots of the same size, according to the judgment of the inspector in regard to the width.

COMMON DRESSING shall not be less than 10 feet long, 7 inches wide, and 1 inch in thickness, and shall be free from wane, rot, shake, or check, and shall be generally of a sound character, and will admit of standard knots that will not unfit it for dressing purposes.

COMMON shall be free from rot and unsound knots, and well manufactured, not less than 10 feet long, 7 inches wide, and 1 inch in thickness.

STRIPS. Clear strips shall be from 1 to 6 inches wide, not less than 12 feet long and 1 inch in thickness, any shall have perfectly clear face free from all imperfections; bright sap will be permitted on the reverse side.

SAP STRIPS for the dressing shall be from 4 to 6 inches wide, not less than 12 feet long and 1 inch in thickness, and will admit of one knot which can be covered by a recent piece in a piece 4 inches wide, and two knots of like size in a piece 6 inches wide. All strips free from other imperfections and having bright sap on two sides will be admitted into this grade.

COMMON DRESSING. STRIPS shall be from 4 to 6 inches wide, not less than 10 feet long and 1 inch in thickness, and shall be well manufactured, and generally of a sound character; will admit of knots which are sound and not coarse, and which will not unfit it for ordinary dressing purposes.

COMMON STRIPS shall be from 4 to 6 inches in width, not less than 10 feet long and 1 inch in thickness, free from rot and wane and to be of a coarse, sound character.

No. 1 **CUTTING UP**. This grade shall consist of lumber above the grade of No. 2 culls, and shall admit of coarse knots and stain and be free from rot; it shall also admit of pieces imperfectly manufactured, below 1 inch in thickness and perfectly sound, and not rendered worthless through improper manufacture.

No. 2 **CULLS** shall be lumber that will work one-half sound.

No. 1 **LATH** shall be 4 feet long, and shall be, when cut, 1 $\frac{3}{4}$, 1 $\frac{1}{2}$, and 1 $\frac{1}{4}$ inches in width, cut out of good, sound, live timber, free from wane, rot, or knots, well manufactured, and trimmed square at the ends.

No. 2 **LATH** shall be of the same width and length as No. 1 lath, and shall admit of a small portion of wane, and also will admit of lath sap-stained, and will admit of small sound knots; must otherwise be well manufactured.

No. **XXX SHINGLES**, packed in four bunches to the 1,000, of 250 each, free from all rot, shake, sap, knots, pin-holes, bastards, or defects of any nature. A shingle 4 inches being the standard; 16-inch shingles should be 16 inches thick at butt and 1-1 $\frac{1}{2}$ inch at points, and 18-inch shingles five to 7 $\frac{1}{2}$ inches thickness at butt and 1-1 $\frac{1}{2}$ at points, to be well manufactured and well pointed.

No. **XX**, six clear butts must be perfect for at least 6 inches from butts, and the defects from this hereon to be of water-tight character, and same regulation regarding thickness as XXX shingles.

No. 1, to be of a grade not specially up to, so as to be considered in either of above grades, and to be sold by special agreement.

All other shingles are culls, and their value is to be a matter of arrangement, if they have any market value.

HARDWOOD.

It is impossible to make rules that will govern every piece of lumber, there being no two pieces of lumber exactly alike; it is therefore expected that the inspector shall be a person of experience, and use his best judgment, based upon the general rules given, making no allowance for the purpose of raising or lowering the grades of a piece of lumber. The inspector must not favor either the buyer or seller, but take lumber as he finds it, and pass each piece into the grade to which it belongs. Inspectors should examine all lumber on the poorest side, except flooring. All lumber must be measured in even lengths, excepting stock that is cut to order for special purposes, when it shall be measured for the full contents. Bark or wane pieces shall be measured inside the bark or wane. All tapering pieces will be measured one-third the length of the piece from the small end.

All badly cut lumber shall be classed as cull, or placed one grade below what it would be if properly manufactured. All lumber shall be sawed thick enough to meet the required thickness when seasoned. Lumber sawed for newels, columns, balusters, axles, or other specific purposes, must be inspected with a view of the intended use of the piece and the adaptability for that purpose, as in most of cases it can not be utilized for other purposes. Heart pieces are excluded from all grades above cull. Worm-holes are considered one of the most serious defects. Gum spots in cherry is a defect, and if excessive will lower the piece one or two grades. Warped, twisted, stained, and stick-rotten lumber shall either be classed as cull, or null cull and refuse.

The standard lengths of white-wood to be 12, 14, and 16 feet, admitting 10 per cent. of 10-foot lengths; walnut and cherry, 10, 12, 14, and 16 feet lengths, admitting 10 per cent. of 8 feet; 8 feet, to be admitted as No. 1, must be 12 inches wide and upward; to grade as No. 2, 8 inches wide and upward. A standard knot must not exceed 1 $\frac{1}{2}$ inches in diameter, and must be sound. Log-run shall be the unpicked run of the log, mill cut out. Lumber sold on grade, and without special contract, will be measured according to these rules. The inspector will be required to keep a correct copy of all measurements, and give duplicate of same to both buyer and seller, if required.

In all grades mentioned as combined in No. 1 and No. 2, all pieces less than 8 inches shall be considered as seconds.

BLACK WALNUT. Combined grade of first and seconds, rejects and shipping culls. No. 1, from 8 to 10 inches shall be clear of all defects; 10 to 16 inches wide may have 1 $\frac{1}{2}$ inches bright sap, or one standard knot; 16 inches wide and upward may have 2 inches bright sap, or two standard knots, showing on one side only. Seconds, 6 inches wide and upward must be clear of all defects at 7 inches; at 10 inches will admit of 1 $\frac{1}{2}$ inches sap or one standard knot; 10 to 16 inches wide will admit of 4 inches sap or two standard knots; 16 inches wide and upward may have 3 inches sap or 1 $\frac{1}{2}$ standard knots; 12 inches wide and upward will admit of a split, if straight, one-sixth the length of the piece, provided the piece be equal to No. 1 in other respects. Not over 10 per cent. of seconds will be taken with splits of the above character. Rejects, 5 inches wide and upward; at 7 inches may have 1 inch sap or one standard knot; 7 to 12 inches wide may have 2 inches sap or two standard knots; 12 to 18 inches wide may have 4 inches sap or 2 standard knots; above 18 inches may have 5 inches bright sap and sap. Shipping cull will include all lumber not equal to the above that will average and work two-thirds its width and length.

CHERRY AND BUTTERNUT will be graded and inspected according to the rules given for black walnut, with the exception of gum specks in cherry. See instructions.

WHITEWOOD, COTTONWOOD, OR BALM OF GILEAD will include the combined grade of firsts and seconds, No. 1 common, and No. 2 common, or shipping cull. The combined grade of firsts and seconds shall not be less than 10 per cent. of No. 1; No. 1 shall be 10 inches wide and upward, and clear of all defects at 12 inches; 12 to 15 inches may have 1 $\frac{1}{2}$ inches bright sap or one standard knot, showing on one side only; 15 to 18 inches may have 2 inches sap; 18 inches and upward may have 3 inches sap or two standard knots, showing on one side only. Seconds, 8 inches wide and upward, clear of all defects at 9 inches; at 10 inches wide may have one standard knot or one standard knot; 10 to 12 inches wide may have 2 inches sap or one standard knot; 12 to 15 inches wide may have 3 inches bright sap or 1 $\frac{1}{2}$ standard knots; 15 to 18 inches wide may have three standard knots or 4 inches bright sap. No. 1 common shall be 6 inches wide and upward; bright, sound, and clear sap not a defect in this grade; 8 to 12 inches wide may have three standard knots; 12 to 16 inches wide, four standard knots; 16 to 24 inches, five standard knots, or may have straight heart cracks not showing over one-fourth the length of the piece, if it has no other defect excepting bright sap. No. 2 common or shipping cull will include all lumber with more than 4 feet from the top of the piece, and will be received where two-thirds of the piece will be available for use for rough manufacturing purposes; stained sap or other defects will be received in this grade; dozed and rotten sap and other lumber than as above named will be classed as null cull or refuse and have no standard value.

BASSWOOD shall be inspected the same way as whitewood, cottonwood, or balm of Gilead, with the exception that seconds will take lumber 6 inches wide and up.

ASH AND OAK shall be graded as firsts and seconds, and shall be six inches wide and up. Boards or plank 8 inches wide will admit of one standard knot or one defect; 10 inches and over wide will admit of two or more defects, according to the width of the piece; bright sap is not considered a defect. Culls include all widths, lengths, and sizes, except such stock as

Genuine West Virginia

Lubricating Oil

IS PRODUCED ONLY AT VOLCANO, WEST VA.

I produce the same, and sell it in its purity at 25c.
per gallon—Volcano delivery, in barrels of 52 gallons.
Undoubtedly the **best** and, quality considered, the
cheapest lubricator for fine machinery.

I can also furnish reduced West Virginia Lubricating
Oil, the product by distillation of my production
of oil of 34° gravity, at market prices, Parkersburg
(W. Va.) delivery. This oil is suitable for tram cars
and cheap machinery.

Will furnish circulars and rates of freight upon ap-
plication.

WM. C. STILES, Jr.,

Volcano, Wood Co., W. Va.

DETROIT EDGE TOOL WORKS, DETROIT, MICH.

MANUFACTURERS OF

FOR WOOD WORKING MACHINERY.

Our Knives are widely known as Standard Goods

WE SPARE NO EFFORTS TO MAKE OUR KNIVES THE LEADERS.

WRITE FOR PRICES.

SMITH'S HOT BLAST DRY KILNS

The Oldest, Latest, and Best

DRY KILN IN THE WORLD.

You make a great mistake if you put in a kiln without first considering this one, and if you consider it you adopt it, if you know your business and we think you do.

Shavings Exhaust Fans

AND DUST ARRESTERS.

We make them under our own valuable patents, and contract for the piping and complete outfits.

WRITE US.

HUYETT & SMITH MFG. CO., DETROIT, MICH.

Established 1849.

Incorporated 1884.

DETROIT SAW WORKS,

Manufacturers of

Circular, Gang, Mulay, Drag, AND Cross-Cut Saws

MOULDING AND PLANING KNIVES,

French Band Saws, Emery Wheels, and General Mill Supplies

66, 68, 70, and 72 Fort St. East, DETROIT, MICH.

We use nothing but Wm. Jessop & Sons' English Steel in our saws, and the name speaks for itself.

ESTABLISHED 1855.

H. D. EDWARDS & CO.

16, 18, 20, 22,
and 24
WOODWARD
AVENUE,

DETROIT,
MICH.

WHEN YOU NEED

Leather, Rubber or Cotton Belting, Rubber, Cotton or Linen Hose, Steam Packings, Wire Rope, Manilla Rope, Plymouth Lath Yarn, Sectional Wood Pulleys, Lace Leather, Belt Fasteners, or anything in the Mill Supply or Ship Chandlery Line,

WE ARE THE PEOPLE

Who will give you reasonable prices on absolutely the best goods made.

DO YOU WANT

Rubber or Oiled Clothing of the best quality? WE HAVE IT.

WE MANUFACTURE

Leather Belting, Belt Cement, Hose Reels, Babbitt Metal, Smith's Patent Belt Fasteners, Etc.

BOSTWICK'S POLAR METAL

Stands at the head for all Babbitting purposes. It has been successfully used for all kinds of machinery during the past six years, and has repeatedly proved itself superior for actual service to fancy Babbitt Metals costing from 30 to 75 cents per pound. It is freely warranted for all high speed machinery, and gives the best of satisfaction for slow running and heavy machinery.

SMITH'S PATENT BELT FASTENERS

Have no equal. They are adapted to all kinds of belting; will run over any pulleys, upon wood-working machinery, under tightners, upon electric-light machines—in fact upon any place where belts are used.

OUR CATALOGUE

Will interest you, and we will be glad to mail one upon application.

Our prices will secure your orders and the quality of our goods will please you.
